1. *Ahnentafel* is German for “ancestor table,” a device employed by genealogists. It’s a way of assigning a standard number to each of the ancestors of a given person, depending on their position in the ancestral hierarchy. The person being genealogized is always assigned the number 1. Their father is always number 2 and their mother number 3 (other than the person being genealogized at number 1, an even number indicates a male ancestor and an odd number a female ancestor). To find the listing of the father of any person, double his or her number; for the mother, double his or her number and then add one.
