"So long as the past and present are outside one another, knowledge of the past is not of much use in the problems of the present. But suppose the past lives on in the present: suppose, though encapsulated in it, and at first sight hidden beneath the present's contradictory and more prominent features, it is still alive and active; then the historian may very well be related to the non-historian as the trained woodsman is to the ignorant traveller."

— R.G. Collingwood, AN AUTOBIOGRAPHY
Oxford: Clarendon Press, 1939, page 100

"I go the way that Providence dictates with all the assurance of a sleepwalker."

—Adolf Hitler, 1936, München
