December 18, Thursday (Old Style): On this day, or on the 18th of 6th month according to [Quaker](#) records, Daniel Gould got married with Wait or Wate Coggeshall (who in all probability was a daughter of John Coggeshall the president of the colony of [Rhode Island](#)).

Daniel, eldest son of Jeremiah and Priscilla Gould, was settled by his father in that part of Newport, Rhode Island, (now called Middletown¹), and on that portion of the farm still in the possession of his descendants.² He married Wate, daughter of John Coggeshall (first President of the Colony), on the 18th of 6th month, 1651; with whom he lived in much love, to an advanced age. There is no particular date given, when he was convinced of the principles of [Friends](#), but unquestionably it was after he came to this country, as the principles of George Fox were not promulgated until 1647; but that he was a sturdy adherent to those doctrines is evident from divers certificates of Friends of several quarterly and monthly meetings, where he visited in the love and service of the Gospel, he being a minister of good standing at home and abroad. By the writings of Daniel Gould and by some sentences that have been handed down from one generation to another, spoken by him on divers occasions, he was a man of ready wit, deep penetration, and sound judgment; and although he served the Friends in divers capacities, both publicly and privately, it doth not appear that he ever entered into any public employ as an officer in outward government, though he did not escape being sought for on that account. The following extract is taken from a pamphlet of his in reference to the sufferings of Marmaduke Stevenson and Wm. Robinson, in Boston, with whom he was at that time. After saying that they came from Salem to Charleston Ferry, he says – "There meets us the constable and a rude company of people with him, and takes us all up (about 10 in number, besides the two banished friends) and after much scoffing and mocking examinations, all of us were led to prison, and God doth know, who is a just rewarder of all, how Harmless, Peaceable, & innocent we came into the town, behaving ourselves in much fear and humility of mind, yet, notwithstanding, being Quakers, to prison we must go, where we remained some days – it may be 3 or 4, or a week; there the Council sent searchers to search us & our Pockets, & took our papers & whatever they pleased, carrying them away, among which was Wm. Robinson's Journal of places he had been. After that our pockets had been picked we remained in Prison till the pleasure of the court was to send for any or all of us, for sometimes they would send for several or all, and sometimes for one alone. For I was once sent for, sifted and tried, being examined about many things. And seeing that they were as a company of Fowlers to draw the Bird into their net, I was sparing

of speech; then they called me Dumb Devil that could not speak & some said I was simple and ignorant and had no great harm in me, but that I was beguiled & led away by others that were more subtle. Then I said to them, if you think I am simply beguiled & not willfully in error how have you showed kindness to me? Or where has your love appeared to help me out of the ignorance & delusion you suppose I have fallen into? How have your endeavours appeared to open my understanding – to show me better? Do you think your prison, whips, and base usage are the way to do it? Is that the way, to begin with, to restore any one from the error of his ways? Then some one cried out and said: "he is more knave than fool!" Then I answered again and said – "If I hold my tongue I am a Dumb Devil, a fool & ignorant. If I speak I am a knave." After this Richard Bellingham the Deputy Governor being full of envy, said to me, "Well, Gould, you shall be severely whipped;" which was afterward done, with 30 stripes upon my naked back, being tyed to the Carriage of a great Gun. And this is my comfort to this day, & I bless the Lord for it, that my sufferings were in great Innocence. There were five others whipped at the same time there. Two men & three women; each having ten stripes – except the two men, fifteen, for no other cause than being Quakers. And after we were whipped we were all led to prison³ where our lodgings were with our sore backs upon the boards, where we remained untill after the Execution." This was in the year 1659. Daniel Gould sometimes wrote poetry, of which the following is a specimen, taken from his papers, sent to England to be published.

Concerning Self.

Concerning self, I thus have seen the thing
Self undenied will self much sorrow bring.
Then look to self, for self a creeping thief
Though he promises fair to the end, 'twill be thy grief
Take not his bait tho' seeming ne'er so fair
For in this bait is laid a deadly snare.

Look, what thou loves & most inclines unto
In that he'll come & tempt thee sore to do
To cross his tempting & thy former lust,
Stand stiff against him, for deny thou must,
Then taking up the cross thou'lt see the thing
That in the end, it will much comfort bring.⁴

October 27, Tuesday (Old Style): This was “Lecture Day” in [Boston](#). The Reverend John Norton fulminated against “diabolical doctrines” such as those of “the cursed sect of the Quakers.” (This would be printed up and distributed at government expense.) A large company of soldiers escorted the three religious prisoners from the jail near what is now Dover Street at Washington Street, onto the Common.⁵

[Friend Daniel Gould](#) of [Newport, Rhode Island](#) accompanied Friend Marmaduke and Friend William to their gallows tree, and for doing that would be sentenced to be tied across a big gun and flogged.

[Friend Mary Dyer](#) was between two guards with her arms and legs bound. She was seen to have covered her face with a handkerchief, loaned to her for this purpose by her former pastor in the Boston church, the Reverend John Wilson. With the drums rolling to drown out the voices of the condemned (they were nevertheless heard briefly, as below), Friends [Marmaduke Stevenson](#) and [William Robinson](#) were [hanged](#) from the limb of a tree on Boston Common. When the corpse of Robinson was cut down, the head hit the ground and the skull broke. Their bodies were cast naked into a hole, and soon were covered over with water. “A Mr. Nichols built a fence about the place to protect them.”⁶

A week earlier, in the prison in [Boston](#), Friend Marmaduke had written a brief summation of his life:⁷

In the beginning of the year 1655, I was at the plough in the east parts of Yorkshire in Old England, near the place where my outward being was; and, as I walked after the plough, I was filled with the love and presence of the living God, which did ravish my heart when I felt it, for it did increase and abound in me like a living stream, so did the life and love of God run through me like precious ointment giving a pleasant smell, which mad me to stand still. And, as I stood a little still, with my heart and mind stayed upon the Lord, the word of the Lord came to me in a still, small voice, which I did hear perfectly, saying to me in the secret of my heart and conscience, “I have ordained thee a prophet unto the nations,” and, at the hearing of the word of the Lord, I was put to a stand, seeing that I was but a child for such a weighty matter. So, at the time appointed, Barbados was set before me, unto which I was required of the Lord to go and leave my dear and loving wife and tender children; for the Lord said unto me, immediately by His Spirit, that He would be as an husband to my wife and as a father to my children, and they should not want in my absence, for He would provide for them when I was gone. And I believed the Lord would perform what He had spoken, because I was made willing to give up myself to His work and service, to leave all and follow Him, whose presence

5. The illustration that one commonly sees, of these three being taken along to the Common with a drummer in front and a small dog cavorting in the foreground, is by William Bell Scott and dates to his own perfervid imagination as of the late date of 1888. Representative Daniel Gould of [Newport](#) accompanied Friends [Marmaduke Stevenson](#) and [William Robinson](#) to encourage them as they were being [hanged](#) and for that act of sympathy would be “tied to a big gun” and given thirty lashes in [Boston](#) during November 1659.

6. After this execution a military man of highest esteem in the colony, John Hull, whose take on such topics was of course always that of discipline, felt that if ever an enemy deserved to die, then someone who had made themselves an enemy of God especially deserved to be put to death. He wrote in his diary that “the rest of the [Quakers](#) had liberty, if they pleased to use it, to depart the jurisdiction though some of them capitally guilty,” and piously ejaculated into prayer: “The good Lord pardon this timidity of spirit to execute the sentence of God’s Holy Law upon such blasphemous persons.”—One is reminded of the little sermon that was given to the German soldiers used as concentration camp guards, which amounted to “We know this goes against your natural feelings, and we hope you will be able to overcome such weaknesses in yourselves.”

and life is with me, where I rest in peace and quietness of spirit, with my dear brother [Friend William Robinson] under the shadow of His wings, who hath made us willing to lay down our lives for His name's sake, if unmerciful men be suffered to take them from us. And, if they do, we know we shall have rest and peace with the Lord for ever in His holy habitation, when they shall have torment night and day.

So, in obedience to the living God, I made preparation to pass to Barbados in the Fourth month [June] 1658. So, after some time that I had been on the said island in the service of God, I heard that New England had made a law to put the servants of the living God to death if they returned after they were sentenced away, which did come near me at that time; and, as I considered the thing and pondered it in my heart, immediately came to word of the Lord unto me, saying, "Thou knowest not but that thou mayst go thither."

But I kept this word in my heart and did not declare it to any until the time appointed, so, after that, a vessel was made ready for [Rhode Island](#), which I passed in. So, after a little time that I had been there, visiting the seed which the Lord had blessed, the word of the Lord came to me saying, "Go to Boston with thy brother William Robinson," and at His command I was obedient and gave up to His will, that so His work and service may be accomplished. for He had said unto me that He had a great work for me to do, which is now come to pass. And, for yielding obedience to and for obeying the voice and command of the everlasting God, which created heaven and earth and the foundations of waters, do I, with my dear brother, suffer outward bonds near unto death.

And this is given forth to be upon record, that all people may know who hear it, that we came not in our own will but in the will of God.

Given forth by me, whom am know to men by the name of MARMADUKE STEVENSON, but have a new name given me, which the world knows not of, written in the book of life.

It turned out that the plan of the authorities was only to frighten this Quaker woman by the sentence of death and the witnessing of the execution of her fellow ministers. When it came time for her to be “turned off” – as the expression then was– upon the gallows tree, the authorities announced that she had been reprieved. Her bonds were loosed.

One of the Bostonians in the assembly, one John Chamberlain, however, announced then and there that he had been converted into a [Quaker](#), and he was taken back to town and thrown in jail. Shortly afterward, that jail released 17 religious prisoners.

After not being hanged, Friend Mary Dyer once again wrote to the court:⁸

**LETTER TO THE GENERAL COURT AT BOSTON,
AFTER BEING UNEXPECTEDLY REPRIEVED,
28TH OF 8TH MONTH, 1659.**

Once more to the general court assembled in Boston, speaks Mary Dyar, even as before. My life is not accepted, neither availeth in comparison of the lives and liberty of the Truth, and servants of living God, for which in the bowels of loved and meekness I sought you: yet, nevertheless, with wicked hands have you put two of them to death, which makes me to feel, that the mercies of the wicked are cruelty. I rather choose to die than to live, as from you, as guilty of their innocent blood: therefore seeing my request is hindered, I leave you to the righteous Judge, and searcher of all hearts, who, with the pure measure of light he hath given to every man to profit withal, will in his due time let you see whose servants you are, and of whom you have taken counsel, which I desire you to search into: but all his counsel hath been slighted, and you would have none of his reproofs. Read your portion, Prov. i. 24 to 32. For verily the night cometh on you apace, wherein no man can work, in which you shall assuredly fall to your own master. In obedience to the Lord, whom I serve with my spirit, and pity to your souls, which you neither know nor pity, I can do no less than once more to warn you, to put away the evil of your doings; and kiss the Son, the light in you, before his wrath be kindled in you; for where it is, nothing without you can help or deliver you out of his hand at all; and if these things be so, then say, there hath been no prophet from the Lord sent amongst you; though we be nothing, yet it be his pleasure, by things that are not, to bring to nought things that are.

When I heard your last order read, it was a disturbance to me, that was so freely offering up my life to him that gave it to me, and sent me hither so to do, which obedience being his own work, he gloriously accompanied with his presence and peace, and love in me, in which I rested from my labour; till by your order and the people, I was so far disturbed, that I could not retain any more of the words thereof, than that I should return to prison, and there remain forty and eight hours, to which I submitted, finding nothing from the Lord to the contrary, that I may know what his pleasure and counsel is concerning me, on whom I wait therefore, for he is my life, and the length of my days; and as I said before, I came at his command, and go at his command.

Mary Dyar.

Some of the [Quaker](#) group in [Newport](#), including some of the elders and some of the ministers, were, however little superior in morality to such condemned persons, for they were not only slavemasters but also were still entangled in the [international slave trade](#). For instance, at this point the Wanton family that would produce [Stephen Wanton Gould](#) was still engaging in this trade. Friend [John Woolman](#) wrote that he and his companions “in bowedness of spirit went to the [Yearly Meeting](#) at Newport, where I understood that a large number of slaves were imported from Africa and then on sale by a member of our Society.... At this time I had a feeling of the condition of Habakkuk as thus expressed: ‘When I heard, my belly trembled, my lips quivered, my appetite failed, and I grew outwardly weak. I trembled in myself that I might rest in the day of trouble.’ I had many cogitations and was sorely distressed.” Habakkuk 3:16 is of course a graphic description of the wrath of God; the verse concluding with “I sigh for the day of distress to dawn over my assailants.”

Friend John engaged in a successful effort to read in [Yearly Meeting](#) session a petition to the [Rhode Island](#) legislature to discourage the importation of [slaves](#). Apparently he got through this with his customary delicate, compassionate, and forceful persuasion. Having been able to read the petition aloud in the hearing of Friends, he “felt easy to leave the essay amongst Friends, for them to proceed on it as they believed best.”

Then, however, the [Yearly Meeting](#) took up the question of lotteries, and Friend John evidently was not able to maintain his temperance. He reports that “The matter was zealously handled by some on both sides.... And in the heat of zeal, I once made reply to what an ancient Friend said, which when I sat down I saw that my words were not enough seasoned with charity, and after this I spake no more on the subject. ...Some time after ... I, remaining uneasy with the manner of my speaking ... could not see my way clear to conceal my uneasiness, but was concerned that I might say nothing to weaken the cause in which I had laboured. And then after some close exercise and hearty repentance for that I had not attended closely to the safe guide, I stood up and ... acquainted Friends that though I dare not go from what I had said as to the matter, yet I was uneasy with the manner of my speaking, as believing milder language would have been better. As this was uttered in some degree of creaturely abasement, it appeared to have a good savor amongst us, after a warm debate.” Woolman had managed to rein in his anger and distress during his careful and skillful management of his antislavery petition, using the emotional energy to power his compassion, discernment, and charity toward the [slaveholders](#) themselves, but then during the discussion of lotteries his anger had slipped out. Following the general Meeting, however Woolman was able to meet with a number of slaveholding ministers, elders, overseers, and others, and was able to report that “My exercise was heavy and I was deeply bowed in spirit before the Lord, who was pleased to favour with the seasoning virtue of Truth, which wrought a tenderness amongst us, and the subject was mutually handled in a calm and peaceable spirit.”

Visit, in Company with Samuel Eastburn, to Long Island, Rhode Island, Boston, etc. — Remarks on the Slave-Trade at Newport; also on Lotteries — Some Observations on the Island of Nantucket.

FOURTH Month, 1760. — Having for some time past felt a sympathy in my mind with Friends eastward, I opened my concern in our Monthly Meeting, and, obtaining a certificate, set forward on the 17th of this month, in company with my beloved friend Samuel Eastburn. We had meetings at Woodbridge, Rahway, and Plainfield, and were at their Monthly Meeting of ministers and elders in Rahway. We laboured under some discouragement, but through the invisible power of truth our visit was made reviving to the lowly-minded, with whom I felt a near unity of spirit, being much reduced in my mind. We passed on and visited most of the meetings on Long Island. It was my concern from day to day, to say neither more nor less than what the Spirit of truth opened in me, being jealous over myself lest I should say anything to make my testimony look agreeable to that mind in people which is not in pure obedience to the cross of Christ.

The spring of the ministry was often low, and through the subjecting power of truth we were kept low with it; from place to place they whose hearts were truly concerned for the cause of Christ appeared to be comforted in our labours, and though it was in general a time of abasement of the creature, yet, through His goodness who is a helper of the poor, we had some truly edifying seasons both in meetings and in families where we tarried. Sometimes we found strength to labour earnestly with the unfaithful, especially with those whose station in families or in the Society was such that their example had a powerful tendency to open the way for others to go aside from the purity and soundness of the blessed truth.

At Jericho, on Long Island, I wrote home as follows: —

DEARLY BELOVED WIFE, – We are favoured with health; have been at sundry meetings in East Jersey and on this island. My mind hath been much in an inward, watchful frame since I left thee, greatly desiring that our proceedings may be singly in the will of our Heavenly Father.

As the present appearance of things is not joyous, I have been much shut up from outward cheerfulness, remembering that promise, "Then shalt thou delight thyself in the Lord"; as this from day to day has been revived in my memory, I have considered that His internal presence in our minds is a delight of all others the most pure, and that the honest-hearted not only delight in this, but in the effect of it upon them. He regards the helpless and distressed, and reveals His love to His children under affliction, who delight in beholding His benevolence, and in feeling divine charity moving in them. Of this I may speak a little, for, though since I left you I have often an engaging love and affection towards thee and my daughter and friends about home, and going out at this time, when sickness is so great amongst you, is a trial upon me; yet I often remember there are many widows and fatherless, many who have poor tutors, many who have evil examples before them, and many whose minds are in captivity; for whose sake my heart is at times moved with compassion, so that I feel my mind resigned to leave you for a season, to exercise that gift which the Lord hath bestowed on me, which though small compared with some, yet in this I rejoice that I feel love unfeigned towards my fellow-creatures. I recommend you to the Almighty, who, I trust, cares for you, and under a sense of His heavenly love remain,
Thy loving husband, J. W.

We crossed from the east end of Long Island to New London, about thirty miles, in a large open boat; while we were out, the wind rising high, the waves several times beat over us, so that to me it appeared dangerous, but my mind was at that time turned to Him who made and governs the deep, and my life was resigned to Him; as He was mercifully pleased to preserve us, I had fresh occasion to consider every day as a day lent to me, and felt a renewed engagement to devote my time, and all I had, to Him who gave it.

We had five meetings in Narraganset, and went thence to Newport on Rhode Island. Our gracious Father preserved us in an humble dependence on Him through deep exercises that were mortifying to the creaturely will. In several families in the country where we lodged, I felt an engagement on my mind to have a conference with them in private, concerning their slaves; and through divine aid I was favoured to give up thereto. Though in this concern I differ from many whose service in travelling is, I believe, greater than mine, yet I do not think hardly of them

STEPHEN WANTON GOULD

FRIEND STEPHEN WANTON GOULD

for omitting it; I do not repine at having so unpleasant a task assigned me, but look with awfulness to Him who appoints to His servants their respective employments, and is good to all who serve Him sincerely.

We got to Newport in the evening, and on the next day visited two sick persons, with whom we had comfortable sittings, and in the afternoon attended the burial of a Friend. The next day we were at meetings at Newport, in the forenoon and afternoon; the spring of the ministry was opened, and strength was given to declare the Word of Life to the people.

The day following we went on our journey, but the great number of slaves in these parts, and the continuance of that trade from thence to Guinea, made a deep impression on me, and my cries were often put up to my Heavenly Father in secret, that He would enable me to discharge my duty faithfully in such way as He might be pleased to point out to me.

We took Swansea, Freetown, and Taunton in our way to Boston, where also we had a meeting; our exercise was deep, and the love of truth prevailed, for which I bless the Lord. We went eastward about eighty miles beyond Boston, taking meetings, and were in a good degree preserved in an humble dependence on that arm which drew us out; and though we had some hard labour with the disobedient, by laying things home and close to such as were stout against the truth, yet through the goodness of God we had at times to partake of heavenly comfort with those who were meek, and were often favoured to part with Friends in the nearness of true gospel fellowship. We returned to Boston and had another comfortable opportunity with Friends there, and thence rode back a day's journey eastward of Boston. Our guide being a heavy man, and the weather hot, my companion and I expressed our freedom to go on without him, to which he consented, and we respectfully took our leave of him; this we did as believing the journey would have been hard to him and his horse.

In visiting the meetings in those parts we were measurably baptized into a feeling of the state of the Society, and in bowedness of spirit went to the Yearly Meeting at Newport, where we met with John Storer from England, Elizabeth Shipley, Ann Gaunt, Hannah Foster, and Mercy Redman, from our parts, all ministers of the gospel, of whose company I was glad. Understanding that a large number of slaves had been imported from Africa into that town, and were then on sale by a member of our Society, my appetite failed, and I grew outwardly weak, and had a feeling of the condition of Habakkuk, as thus expressed: "When I heard, my belly trembled, my lips quivered, I trembled in myself, that I might rest in the day of trouble." I had many cogitations, and was sorely distressed. I was desirous that Friends might petition the Legislature to use their endeavours to discourage the future importation of slaves, for I saw that this trade was a great evil, and tended to multiply troubles, and to bring distresses on the people for whose welfare my heart was deeply concerned. But I perceived several difficulties in regard to petitioning, and such was the

FRIEND STEPHEN WANTON GOULD

STEPHEN WANTON GOULD

GO TO MASTER HISTORY OF QUAKERISM

exercise of my mind that I thought of endeavouring to get an opportunity to speak a few words in the House of Assembly then sitting in town.

This exercise came upon me in the afternoon on the second day of the Yearly Meeting, and on going to bed I got no sleep till my mind was wholly resigned thereto. In the morning I inquired of a Friend how long the Assembly was likely to continue sitting, who told me it was expected to be prorogued that day or the next. As I was desirous to attend the business of the meeting, and perceived the Assembly was likely to separate before the business was over, after considerable exercise, humbly seeking to the Lord for instruction, my mind settled to attend on the business of the meeting; on the last day of which I had prepared a short essay of a petition to be presented to the Legislature, if way opened. And being informed that there were some appointed by that Yearly Meeting to speak with those in authority on cases relating to the Society, I opened my mind to several of them, and showed them the essay I had made, and afterwards I opened the case in the meeting for business, in substance as follows: —

I have been under a concern for some time on account of the great number of slaves which are imported into this colony. I am aware that it is a tender point to speak to, but apprehend I am not clear in the sight of Heaven without doing so. I have prepared an essay of a petition to be presented to the Legislature, if way open; and what I have to propose to this meeting is that some Friends may be named to withdraw and look over it, and report whether they believe it suitable to be read in the meeting. If they should think well of reading it, it will remain for the meeting to consider whether to take any further notice of it, as a meeting, or not.

After a short conference some Friends went out, and, looking over it, expressed their willingness to have it read, which being done, many expressed their unity with the proposal, and some signified that to have the subjects of the petition enlarged upon, and signed out of meeting by such as were free, would be more suitable than to do it there. Though I expected at first that if it was done it would be in that way, yet such was the exercise of my mind that to move it in the hearing of Friends when assembled appeared to me as a duty, for my heart yearned towards the inhabitants of these parts, believing that by this trade there had been an increase of inquietude amongst them, and way had been made for the spreading of a spirit opposite to that meekness and humility which is a sure resting-place for the soul; and that the continuance of this trade would not only render their healing more difficult, but would increase their malady.

Having proceeded thus far, I felt easy to leave the essay amongst Friends, for them to proceed in it as they believed best. And now an exercise revived in my mind in relation to lotteries, which were common in those parts. I had mentioned the subject in a former sitting of this meeting, when arguments were used

STEPHEN WANTON GOULD

FRIEND STEPHEN WANTON GOULD

GO TO MASTER HISTORY OF QUAKERISM

in favour of Friends being held excused who were only concerned in such lotteries as were agreeable to law. And now, on moving it again, it was opposed as before; but the hearts of some solid Friends appeared to be united to discourage the practice amongst their members, and the matter was zealously handled by some on both sides. In this debate it appeared very clear to me that the spirit of lotteries was a spirit of selfishness, which tended to confuse and darken the understanding, and that pleading for it in our meetings, which were set apart for the Lord's work, was not right. In the heat of zeal, I made reply to what an ancient Friend said, and when I sat down I saw that my words were not enough seasoned with charity. After this I spoke no more on the subject. At length a minute was made, a copy of which was to be sent to their several Quarterly Meetings, inciting Friends to labour to discourage the practice amongst all professing with us.

Some time after this minute was made I remained uneasy with the manner of my speaking to the ancient Friend, and could not see my way clear to conceal my uneasiness, though I was concerned that I might say nothing to weaken the cause in which I had laboured. After some close exercise and hearty repentance for not having attended closely to the safe guide, I stood up, and, reciting the passage, acquainted Friends that though I durst not go from what I had said as to the matter, yet I was uneasy with the manner of my speaking, believing milder language would have been better. As this was uttered in some degree of creaturely abasement after a warm debate, it appeared to have a good savour amongst us.

The Yearly Meeting being now over, there yet remained on my mind a secret though heavy exercise, in regard to some leading active members about Newport, who were in the practice of keeping slaves. This I mentioned to two ancient Friends who came out of the country, and proposed to them, if way opened, to have some conversation with those members. One of them and I, having consulted one of the most noted elders who had slaves, he, in a respectful manner, encouraged me to proceed to clear myself of what lay upon me. Near the beginning of the Yearly Meeting, I had had a private conference with this said elder and his wife concerning their slaves, so that the way seemed clear to me to advise with him about the manner of proceeding.

I told him I was free to have a conference with them all together in a private house; or, if he thought they would take it unkind to be asked to come together, and to be spoken with in the hearing of one another, I was free to spend some time amongst them, and to visit them all in their own houses. He expressed his liking to the first proposal, not doubting their willingness to come together; and, as I proposed a visit to only ministers, elders, and overseers, he named some others whom he desired might also be present. A careful messenger being wanted to acquaint them in a proper manner, he offered to go to all their houses, to open the matter to them, – and did so. About the eighth hour the next morning we met in the meeting-house

FRIEND STEPHEN WANTON GOULD

chamber, the last-mentioned country Friend, my companion, and John Storer being with us. After a short time of retirement, I acquainted them with the steps I had taken in procuring that meeting, and opened the concern I was under, and we then proceeded to a free conference upon the subject. My exercise was heavy, and I was deeply bowed in spirit before the Lord, who was pleased to favour with the seasoning virtue of truth, which wrought a tenderness amongst us; and the subject was mutually handled in a calm and peaceable spirit. At length, feeling my mind released from the burden which I had been under, I took my leave of them in a good degree of satisfaction; and by the tenderness they manifested in regard to the practice, and the concern several of them expressed in relation to the manner of disposing of their negroes after their decease, I believed that a good exercise was spreading amongst them: and I am humbly thankful to God, who supported my mind and preserved me in a good degree of resignation through these trials.

Thou who sometimes travellest in the work of the ministry, and art made very welcome by thy friends, seest many tokens of their satisfaction in having thee for their guest. It is good for thee to dwell deep, that thou mayest feel and understand the spirits of people. If we believe truth points towards a conference on some subjects in a private way, it is needful for us to take heed that their kindness, their freedom and affability, do not hinder us from the Lord's work. I have experienced that, in the midst of kindness and smooth conduct, to speak close and home to them who entertain us, on points that relate to outward interest, is hard labour. Sometimes, when I have felt truth lead towards it, I have found myself disqualified by a superficial friendship; and as the sense thereof hath abased me and my cries have been to the Lord, so I have been humbled and made content to appear weak, or as a fool for His sake; and thus a door hath been opened to enter upon it. To attempt to do the Lord's work in our own way, and to speak of that which is the burden of the Word in a way easy to the natural part, doth not reach the bottom of the disorder. To see the failings of our friends, and think hard of them, without opening that which we ought to open, and still carry a face of friendship, tends to undermine the foundation of true unity. The office of a minister of Christ is weighty, and they who now go forth as watchmen have need to be steadily on their guard against the snares of prosperity and an outside friendship.

After the Yearly Meeting we were at meetings at Newtown, Cushnet, Long Plain, Rochester, and Dartmouth. From thence we sailed for Nantucket, in company with Ann Gaunt, Mercy Redman, and several other Friends. The wind being slack we only reached Tarpawling Cove the first day; where, going on shore, we found room in a public-house, and beds for a few of us, — the rest slept on the floor. We went on board again about break of day, and though the wind was small, we were favoured to come within about four miles of Nantucket; and then about ten of us got into our boat and rowed to the harbour before dark; a large boat went

FRIEND STEPHEN WANTON GOULD

off and brought in the rest of the passengers about midnight. The next day but one was their Yearly Meeting, which held four days, the last of which was their Monthly Meeting for business. We had a labourious time amongst them; our minds were closely exercised, and I believe it was a time of great searching of heart. The longer I was on the island the more I became sensible that there was a considerable number of valuable Friends there, though an evil spirit, tending to strife, had been at work amongst them. I was cautious of making any visits except as my mind was particularly drawn to them; and in that way we had some sittings in Friends' houses, where the heavenly wing was at times spread over us, to our mutual comfort. My beloved companion had very acceptable service on this island.

When meeting was over, we all agreed to sail the next day if the weather was suitable and we were well; and being called up the latter part of the night, about fifty of us went on board a vessel; but, the wind changing, the seamen thought best to stay in the harbour till it altered, so we returned on shore. Feeling clear as to any further visits, I spent my time in my chamber, chiefly alone; and after some hours, my heart being filled with the spirit of supplication, my prayers and tears were poured out before my Heavenly Father for His help and instruction in the manifold difficulties which attended me in life. While I was waiting upon the Lord, there came a messenger from the women Friends who lodged at another house, desiring to confer with us about appointing a meeting, which to me appeared weighty, as we had been at so many before; but after a short conference, and advising with some elderly Friends, a meeting was appointed, in which the Friend who first moved it, and who had been much shut up before, was largely opened in the love of the gospel. The next morning about break of day going again on board the vessel, we reached Falmouth on the Main before night, where our horses being brought, we proceeded towards Sandwich Quarterly Meeting. Being two days in going to Nantucket, and having been there once before, I observed many shoals in their bay, which make sailing more dangerous, especially in stormy nights; also, that a great shoal which encloses their harbour prevents the entrance of sloops except when the tide is up. Waiting without for the rising of the tide is sometimes hazardous in storms, and by waiting within they sometimes miss a fair wind. I took notice that there was on that small island a great number of inhabitants, and the soil not very fertile, the timber being so gone that for vessels, fences, and firewood, they depend chiefly on buying from the Main, for the cost whereof, with most of their other expenses, they depend principally upon the whale fishery.¹⁰

I also encouraged the young women to continue their neat, decent way of attending themselves on the affairs of the house; showing, as the way opened, that where people were truly humble, used themselves to business, and were content with a plain way of life, they had ever had more true peace and calmness of mind than they who, aspiring to greatness and outward show, have grasped hard for an income to support themselves therein. And

FRIEND STEPHEN WANTON GOULD

STEPHEN WANTON GOULD

GO TO MASTER HISTORY OF QUAKERISM

as I observed they had so few or no slaves, I had to encourage them to be content without them, making mention of the numerous troubles and vexations which frequently attended the minds of the people who depend on slaves to do their labour.

We attended the Quarterly Meeting at Sandwich, in company with Ann Gaunt and Mercy Redman, which was preceded by a Monthly Meeting, and in the whole held three days. We were in various ways exercised amongst them, in gospel love, according to the several gifts bestowed on us, and were at times overshadowed with the virtue of truth, to the comfort of the sincere and stirring up of the negligent. Here we parted with Ann and Mercy, and went to Rhode Island, taking one meeting in our way, which was a satisfactory time. Reaching Newport the evening before their Quarterly Meeting, we attended it, and after that had a meeting with our young people, separated from those of other societies. We went through much labour in this town; and now, in taking leave of it, though I felt close inward exercise to the last, I found inward peace, and was in some degree comforted in a belief that a good number remain in that place who retain a sense of truth, and that there are some young people attentive to the voice of the Heavenly Shepherd. The last meeting, in which Friends from the several parts of the quarter came together, was a select meeting, and through the renewed manifestation of the Father's love the hearts of the sincere were united together.¹¹ From Newport we went to Greenwich, Shanticut, and Warwick, and were helped to labour amongst Friends in the love of our gracious Redeemer. Afterwards, accompanied by our friend John Casey from Newport, we rode through Connecticut to Oblong, visited the meetings in those parts, and thence proceeded to the Quarterly Meeting at Ryewoods. Through the gracious extendings of divine help, we had some seasoning opportunities in those places. We also visited Friends at New York and Flushing, and thence to Rahway. Here our roads parting, I took leave of my beloved companion and true yokemate Samuel Eastburn, and reached home the 10th of Eighth Month, where I found my family well. For the favours and protection of the Lord, both inward and outward, extended to me in this journey, my heart is humbled in grateful acknowledgments, and I find renewed desires to dwell and walk

10. I considered that as towns grew larger, and lands near navigable waters were more cleared, it would require more labour to get timber and wood. I understood that the whales, being much hunted and sometimes wounded and not killed, grow more shy and difficult to come at. I considered that the formation of the earth, the seas, the islands, bays, and rivers, the motions of the winds and great waters, which cause bars and shoals in particular places, were all the works of Him who is perfect wisdom and goodness; and as people attend to His heavenly instruction, and put their trust in Him, He provides for them in all parts where he gives them a being; and as in this visit to these people I felt a strong desire for their firm establishment on the sure foundation, besides what was said more publicly, I was concerned to speak with the women Friends in their Monthly Meeting of business, many being present, and in the fresh spring of pure love to open before them the advantage, both inwardly and outwardly, of attending singly to the pure guidance of the Holy Spirit, and therein to educate their children in true humility and the disuse of all superfluities. I reminded them of the difficulties their husbands and sons were frequently exposed to at sea, and that the more plain and simple their way of living was the less need there would be of running great hazards to support them.

11. The poverty of spirit and inward weakness, with which I was much tried the fore part of this journey, has of late appeared to me a dispensation of kindness. Appointing meetings never appeared more weighty to me, and I was led into a deep search whether in all things my mind was resigned to the will of God; often querying with myself what should be the cause of such inward poverty, and greatly desiring that no secret reserve in my heart might hinder my access to the divine fountain. In these humbling times I was made watchful, and excited to attend to the secret movings of the heavenly principle in my mind, which prepared the way to some duties, that, in more easy and prosperous times as to the outward, I believe I should have been in danger of omitting.

30 1 day of 12 M 1781 (December 30, Sunday, 1781): [Stephen Wanton Gould](#) was born as a birthright Friend, the 1st son of Friend James Gould and Friend Hannah Wanton Gould. He would write on his 25th birthday:

*30 3 day of 12 M 1806 / With the day compleats the 25 year of
my Age¹²*

James, his father, seems to have followed the tailor's trade in part due to being quite lame. His shop was near the Parade, which is the present-day Washington Square of [Newport](#). Hannah, his mother, was a daughter of Stephen Wanton and had grown up in one of the grand families of Rhode Island, a family that had obtained at least part of its fortune by investment in the [international slave trade](#). He would grow up in the [Quaker](#) community near the Point on [Aquidneck Island](#), and get married with Friend Hannah Rodman, daughter of Friend Clark Rodman and Friend Abigail Rodman, in 1808, and this couple would produce two offspring, Caleb who would die in infancy and John Stanton Gould who would get married with Mary Ashby and settle in Hudson, New York.

12. Friend Stephen crafted the books he used for his journals, himself, by taking plain paper and stitching it together down the middle, and then folding the papers over on the stitch line. All entries from his journal in the Kouroo Contexture were prepared by Rosalind Cobb Wiggins. "Posie," as she was called, earned an MA in Black Studies in Education following a 25-year career as a portrait and ecclesiastical sculptor. After teaching at Washtenaw Community College in Ypsilanti, Michigan, and at [Moses Brown](#) School in Providence, Rhode Island, she retired to work as the curator of the New England Yearly Meeting Archives, archives which are now kept at the Rhode Island Historical Society on Hope Street in Providence, Rhode Island. Since then she published works about Friends and African Americans in 18th- and 19th-Century New England. Her article "Paul and Stephen, Unlikely Friends" appeared in [Quaker History](#), Volume 90 Number 1, for Spring 2001.

I stayed the whole time which was from the 15th of the 8th M 1795 to the 30th of the 12 M 1802.

We don't know the nature of this more-than-seven-year apprenticeship (except that he saw Old Bet the elephant during her exhibition tour) — but we do know how he spent many of his evenings:

I spent most of the evenings of the three last years of my apprenticeship at my dearst Aunt Martha Gould either in copying good peaces of writing, or reading George Foxe's Journal which I read through & trust my mind was much benefited thereby. In this the chief of my evenings were passed & I am now thankful for it, as it is probable I might have spent them much worse had I have given way to a light airy mind & run unto such company. The company of my endeared Aunt I dearly love & have occasion to, for her Motherly care & religious concern over me in my infantile years. When a child I lived with her & have good reason to believe that her concern even travel of Spirit for my prosperity (under the divine Blessing) was one of the main things which preserved me from the facenating things of the world. I now remember how dearly I used to love her Company & the company of good friends who came to visit her, of which there was not a few, as she is a Woman much esteemed by all her acquaintances & particularly set by in society as a weighty & useful Member, in whose service she hath spent much of her time. & tho' a poor woman & nothing to depend upon but her daily labor for support which she hath obtained credibly & honorably in the forepart of her life by Tayloring & now in her latter days keeps a school & Chiefly maintains herself & two sisters. 18 of 10 mo 1803 I have been much instructed this morning from reading several Chapters in the Book of Judges — We find that Gideon was called to deliver Israel out of the hands of their enemies tho he was poor & the least of his fathers house, yet the Lord was with him, that he had found favor in his sight. Whereupon he was strengthened to gather an Army & go forth against their Enemies & altho their number was small, yet by blowing the Trumpets, & crying in these words "The Sword of the Lord & that of Gideon" their enemies were discomfited & fled before them, & even became their own enemies, by beating themselves.

Here is encouragement to press forward thro every difficulty, & altho' the chosen band may be but small as our faith is firmly fix't on Israels God there is no cause to fear defeat, for in him is everlasting streangth — Well I think I feel a little streangthened to go on & endeavor to plan my sole dependance where it ought to be placed. & if faith is sometimes permitted to be weak & tried, yet as we suffer the Sword of the Lord to fight for us, in Conjunction with our own Sword, hard things will be made easy, even the Mountains & hills of opposition will be made to flee before us.

I allude not to our Carnal wepons when I speak of our own sword & fighting in conjunction with the Lord, but mean that our own edeavors must be raised to subdue the enemy when the Lord bids us fight, then his blessing added to it there is no question but the enemy will be put to flight & we come of as victors under the Holy Captain 20 of 10th Mo 1803 fifth day Much unwell with a bad cold, but may thankfully say I was able to attend our Meeting where I was favored to center my mind on that which was refreshing to it

First day 23rd of 10th Mo 1803 / My meeting this morning was a poor time. But in the Afternoon had a favored good time for which I was in some measure thankful. I had closely to examine my own standing, which I apprehended to be in much weakness, & more in empty profession than I could wish, which feelings are the result of unfaithfulness. But oh may all that is yet in me which stands opposed to the precious life be subdued & brought low. I desire & pray that I may do nothing whereby I may miss of Heaven, the blessed Haven of peace & rest hereafter, which ought to be while here the main bent of our lives to Obtain. And not grovel in the earth after riches of the World beyond what the Body requireth & thereby miss of immortal treasure. Near the close of Meeting E Coggershall kneeled in Solemn Supplication, imploring the Almighty to be with the distressed in foureign Lands, whose lots are cast among the calamities of war & tumult & that he would be pleased to hasten the time when Nation should lift up sword against Nation no more, that he would be pleased to say to the destroying Angell who hath visited our land with pestilence, "It is enough", humbly imploring the remembrance & succor the babes in Jesus, that the Almighty would be pleased to reach forth his holy Septure to them that they may be encouraged to touch & live, ___ beging that the Youth who are persuing lying vanity may be touched in the heart with the fire from the Holy Alter, & become lights in the Church – All of which seemed to me to assend in sweet inscence before the throne of God

In the evening called to see several friends, but the savor of meetings was so fresh upon me that I felt little inclination to join with them in conversation

Thoughts

Charity hath many excellent qualifications. It suffereth & endureth revilings patiently, is good to the poor but above all it loveth every body

*Many misconstrue the meaning of Charity they think it consists mearly in benevolence to the poor, in vailing the faults of others & concluding there is but little for them to do with their neighbors — but let us remember the Apostolic meaning of Charity which is Love & if we cultivate it properly we shall find it will often lead us, not only to vail or cover the faults of others, but to go to them & reprove them as occasion may require either in public or private [**]*

I believe there is no use in Argument, especially with deists unless our words are delivered in best wisdom tempered with Love, for the more we depend upon human reason, the more we be perplexed & confounded.

Even if we raise our endeavors ever so much, & make use of the soundest words, if we fall short of a right qualification they will be no more to them than the sounding brass or the tinkling symbol — as it is the bent of their minds to support what they call, reason & philosophy, & to stifle every degree of conviction with the utmost avidity — there is [no more rubbed out?] probability of our gaining any assendency over them by setting up our Opinion against theirs, for generally the more we oppose, the more we shall be opposed, as one extream begits another, & every thing its own likeness. In my opinion nothing will convince them of the Excellency & sublimity of the divine truths, immediately revealed & as couched in Scriptue — until they are brought to it by an high hand, untill they are met with in the way as Baalam was by the Angel of the Lord with a flaming sword, in which way there is no turning, it is only when we may feel our minds imbued with a measure of the same spirit & Authority, with which the Angel was, that it will be likely what may be said will be effectual but then let us in the ability received faithfully Advertise them of those things which are conducive of peace here & eternal happiness hereafter, then tho' our words may be but few, yet being seasoned with that quickening power which raiseth the dead & casteth out unclean spirits, it may in time if not immediately prove as bread cast upon the Waters which after process of time when the powerful workings of the Lord's Spirit hath wrought upon the individual it will return after many days

I can add with gladness that it seems as if my mind had been favored to feel a renewed engagement & to seek after the living sustance & a willingness in some measure wrought (at least at times) to be wholly resigned to divine disposal, & oh may all that is in me which stands opposed to the divine will, be brought low & laid in the dust, for I am confirmed that it is not for religion to flourish in a mind where the stubborn will of the creature is permitted to have its full swing, but must first be [under line between brackets: reduced down to nothing & a daily watch kept to keep it so]

13 of 12 M 1803 / I don't seem to have much to write, nor have not for some time, but can say that I apprehend it to be a time of favor with me, tho' there are many trials within & without insomuch that I am sometimes ready to say "Who is so tried as I am" but for all this, I acknowledge it to be a favord time, having felt divine goodness to be around my mind in an unusual degree, Oh may I ever be humble & thankful forr every favor, both inwardly & outwardly

My mind hath been brought too feel its own smallness to a great degree attended with a belief that humility is a proffitable place to dwell in. Instructions have risen from reflections on several passages of Scripture

It was said to Saul wast thou not made head of the tribes of Israel when thou wert small in thine own eyes tho' for his disobedience his Kingly auhority was rent from him & given to another — David tho small in statue & young in years distinguished himsmelf & gained the love of his Nation, by his corage and faithfulness to them thro' perils & dangers. And it is my desire often to remember the Querie of Sam'l to Saul "Wast thou not made head when Small" Really believing that it is by keeping little in our own Eyes & by faithfulness to the Lords requiring that we ever experience any advancement in religious groth, But we are not to dwell too long upon the meanness of our statur when we are called forth by the Lord to slay Goliath of Sin, but remember that it is by his power that we are inabled to fight our fight, & not our own Streangth, remembering in all things carefully to hearken to what the divine voice shall utter, for no doubt that David felt it speak to him when Saul was about to put on him, his helmet of Brass & coat of MAil, & told him his streangth did not consist in those things, but in the Lord's power which had previously done wonderfull things for him, even delivered him from the paw of the Lion & the Bear, now this power he had proved well, but Sauls helmet he knew naught about therefore going out divested from all human dependency he was enabled to gain a great victory & thro' the whole corse of his life we may find his hope & trust was fixed in the Almighty,

we find him no where that I recollect ascribing his victories to himself or taking any praise from him to whome it was alone due. So we see that Saul tho he begun well yet for his pride & unfaithfulness was rejected from the throne—— And David tho' suffered to pass thro' many trials & probations, yet being generally faithful & attentive to the inspeaking word of truth in his heart was preserved to the end of his days, & that power will keep & preserve all who are desirous to be kept by it. David testifies in many places of his writing, that he never knew it to fail him, nor ever will it, those who wholly divest themselves of all human dependencies, but by resting their all in the Lord Jehovah in whom is everlasting streangth they may be made instrumental in performing things that will Astonish Mans Wisdom The above reflections have chiefly originated from being appointed to some important Society Service about which I have been exceeding exercised & have felt renewed distress for the wellfare of Lion,— I have clearly seen that it was high time for me to stand continually on the Watch,& prepare to fight as one of the Young Men of the princes of the provinces of Israel, under the command of the King of Kings. May I be ever careful & exemplary in my conduct, that it bring no reproach upon this Blessed truth I am fully aware that my standing is very weak, infirm & inisotule [sic], & need care on every side that my feet be drawn away by the unweired [unwearied] Adversary, from that which my soul at times craves to be established in beyond all other things — Yet my present faith is "Thy faith & grace assisting, I am willing to do anything, that thou shalt be pleased to require of me.

May the Year continue in progressive improvement, as I trust it hath begun — is on my part greatly to be craved, & even if I should not live to see the close of 1804 I pray it may not be as with those who are spending their time in unwarrantable persuits, laboring after that which perisheth with the using, to their souls wounding. My mind has been brought to reflect on the uncertainty of time & how short our stay here is even the longest Some are taken in Old Age others cut down in Youthful prime & summoned to the Silent Awful Grave whether prepared or unprepared. Death Makes no stay, but when the pale Messenger is sent to assail our dwelling, we must quit this earthly tabernacle to appear before the Awful Judge & Governor of the Universe to render our accounts of the Deeds done in the Body, there to receive a reward Accordingly. How Awful must this change be to them who have had their tallents committed for their improvement, & from neglect feel a conciousness, of not having done their part toward the improvement of them. *22 of 3rd M 1804 fifth day preparative Meeting
Our Meeting was silent, in which my mind was favored with quietude, but it is a low time, & perhaps rendered the more so, as I see no way to prosper on my outward business, so little that it seems as if I am ready to conclude I must throw it up & work at journey work — And notwithstanding I have been favored to get along so far beyond what I had a right to expect yet there is now allmost a total stagnation, & it dont seem as if I feel any liberty to extend my persuits as the Traffic of the World has become so extreamly iniquitous, that a person who is concerned to dwell within the holy enclosure of Truth can hardly be concerned in it with any degree of purity, or at least without becoming contaminated therewith —The African Slave Trade is something with which my mind has become burdened of late, & if I knew where to draw the line I think that I would wholly renounce the use of any produce raised by the poor Black people for their cruel task Masters who which they sell to us to increase their purses & support themselves in rioting &*

drunkenness, fullness of bread & abundance of Idleness while the poor afflicted Slaves are suffering for the want of the absolute necessities of life. But it is a matter so very extensive that almost every imported Article that we eat or drink is raised by the labor of Slaves & the generality of friends so very easy about the use and traffic of those things that I see little encouragement from any quarter to take up the cross in that respect. And what is still more of a block in the way is I am so situated in life as to make it extremely inconvenient. So believe I must wait and & see what my feelings will be upon the occasion

I fully believe that had I have been faithful to my feelings about ten years ago, I should have been thus tried now, for I remember in the Yearly Meeting about that time the matter concerning the use of Shugar was spoken to in Such a manner by our friend Henry Hull from Nine Partners as did greatly affect my mind, & the same conviction followed me at times ever since, & tho' I was but young about twelve years of age, yet I believe a sacrifice of that kind would have been acceptable to the Lord, & perhaps have been the means of my growth & furtherance in the truth, & and the means of my being stronger and more fervant in spirit than I have been.

My mind was very early touched with feelings which sometimes wrought powerfully, & even did bring me to many tears while alone by my self, which I knew then, & have since more sensibly felt was the Lords power & goodness at work in me, which would have purified from all the defilements of flesh and spirit & preserved me out of much light irreverent & unprofitable company, which I have sometimes been in the way of & and too much partook of their spirit. Everything begets its own likeness & as lightness begets lightness, so seriousness does seriousness. I have found that when I have been in company with sober feeling friends my mind has been brought into sympathy with them, & also when I have been in the company of my young associates, brethren & citizens of Society, it has often been my place to set silent most of the time for an example to them & for profit to myself, which I really have the comfort to believe has been of use to myself & those around me; as such behaviour will tend to keep down lightness in others more than at first we may be sensible of.

Oh how doth all that is alive within me at this time, crave that my future walks in life may be in the pure spirit & wisdom of Truth. A life thus led is of more value & will yeald more peace than one filled up with all the pleasing things of time & sense, which will last but for a moment, nor even for a moment as they often carry with them more of a sting than pleasure Whereas a life humbly dedicated to the Masters will, altho he may see meet to lead us thro many tribulations in this life & mingle with our draught the Wormwood & Gaul, yet in the end he will crown us with life immortal, peace & Glory in the Mansions on High.

I have written thus much as it has occurred to me sentence by sentence having but little prospect when I begun, further then

to insert my feelings at Meeting.

Much could I write of the feelings experience of my youth were they to open with a sufficient degree of life to render them useful in a future day to myself — particularly of my apprenticeship which was made up with many —? [&] inward trials of flesh & spirit which I desire to remember, as I believe they were all permitted for my refinement & improvement but as one can ever fully know but myself thro the corse of it from outward appearances one would think that I met with nothing to try my patience, but many tears have I Shed when alone by myself when no eye but that of heaven hath seen me imploring the divine Succor in times of very deep and proving trials, when it hath seemed as if my poor heart was almost broken from a complication of besetments, hardly knowing whether to turn to the right hand or to the left, seeing no way to get along with peace in my mind but to press gently forward thro' the narrow passage that I stood in, with a considerable degree of faith & patience was favored to reach the Age of 21 Years honorable. And served my master faithfully tho perhaps if I had been more faithful in some points of conduct I might have bettered it. I stayed the whole time which was from the 15th of the 8th M 1795 to the 30th of the 12 M 1802. Most of the time I had but few associates, & often walked alone both inwardly & outwardly, the refining had [hand] of God was often upon me & I loved solitude I spent most of the evenings of the three last years of my apprenticeship at my dearest Aunt Martha Gould either in copying good peaces of writing, or reading George Foxe's Journal which I read through & trust my mind was much benefited therby. In this the chief of my evenings were passed & I am now thankful for it, as it is probable I might have spent them much worse had I have given way to a light airy mind & run unto such company. The company of my endeared Aunt I dearly love & have occasion to, for her Motherly care & religious concern over me in my infantile years. When a child I lived with her & have good reason to believe that her concern even travel of Spirit for my prosperity (under the divine Blessing) was one of the main things which preserved me from the facenating things of the world. I now remember how dearly I used to love her Company & the company of good friends who came to visit her, of which there was not a few, as she is a Woman much esteemed by all her acquaintances & particularly set by in society as a weighty & useful Member, in whose service she hath spent much of her time. & tho' a poor woman & nothing to depend upon but her daily labor for support which she hath obtained credibly & honorably in the forepart of her life by Tayloring & now in her latter days keeps a school & Chiefly maintains herself & two sisters. Yet thus poor she hath spent almost twenty Years of her life in weighty appointment [to] office of an Overseer in Society, in which she was very useful, being careful that her conduct brought no reproach upon her standing.

Now to return & add a little further to my own particular I may say that from a child I was singularly fond of the company of elderly friends & took much life in sitting with them hearing

them converse in matter [in] which they were experienced & often gained much information & solid instruction therefrom. I now feel renewed [cup?] of thankfulness for my many favors in this way, believing that they have kept me from much unprofitable company, into which youth are drawn thro' inattention to that divine inward principal which is made manifest to us even in very young years. May this which has been mercifully vouchsafed in my childhood be extended thro' the succeeding days of my pilgrimage. My spirit often bows in reverent humility before the Almighty God for the discovery of his will, thus far & also have abourdant [?] cause to humble myself with my mouth in the dust at my frequent rejections of his holy calls. May my spirit be more & more engaged in faithfully performing what he will please to have me do.

There was another relation of mine who hath gone in peace to her grave some years ago, with whom I was very fond of being with, & from whom I have reaped solid instruction She was a woman indowed with a good understanding, & large share of [? pale??] which rendered her very engaging to me; as she could speak experimentally in things of an inward & outward nature. Some of her advice & observations I still instructingly remember, nor do I wish those seasons to be forgot. The above mentioned relation name was Mary Marsh.

These things have all very unexpectedly occured in my mind having no prospect of inserting anything but the pressent state of my mind when I first begun, & I have expected to stop at every page, but [?] one thing after another has occured [?] have written on till now & dont know why I should give this small account of my pilgrimage & that of my dear Aunts as I never expect any one will ever be benefited by my Diary but myself, the chief end that I have had in it was to keep in remembrance what I have once felt & experienced that if I should ever swerve & loose my first love for the truth by recurring to my book experience I might be quickened to the necessity of keeping to

Altho' my outward appearance is pretty plain & my conduct in a good degree conformable to the principals of Friends, yet, there are some little Foxes that rush in among the tender vines of life in my mind, & sometimes nip them in early bud. this for a long time has been the case, nor do I see much prospect of the Wall's being built sufficiently strong & high to keep them from creeping or leaping in. Much have I suffered from those subtil creatures & much shall I suffer, untill there is a faithful daily labor to remove the rubbish rom the door of my House that the water's of life may flow purely unobstructed —————

I spent the evening at a friends house which concluded rather unprofitably, & I hope to improve from the things that I suffer as I felt before I went that I had better not go.——

Life Among the Lowly.

NUMBER I.

MADISON HEMINGS.

I never knew of but one white man who bore the name of Hemings; he was an Englishman and my greatgrandfather. He was captain of an English trading vessel which sailed between England and Williamsburg, Va., then quite a port. My grandmother was a full-blooded African, and possibly a native of that country. She was the property of John Wales, a Welchman. Capt. Hemings happened to be in the port of Williamsburg at the time my grandmother was born, and acknowledging her fatherhood he tried to purchase her of Mr. Wales, who would not part with the child, though he was offered an extraordinarily large price for her. She was named Elizabeth Hemings. Being thwarted in the purchase, and determining to own his flesh and blood he resolved to take the child by force or stealth, but the knowledge of his intention coming to John Wales' ears, through leaky fellow servants of the mother, she and the child were taken into the "great house" under their master's immediate care. I have been informed that it was not the extra value of that child over other slave children that induced Mr. Wales to refuse to sell it, for slave masters then, as in later days, had no compunctions of conscience which restrained them from parting mother and child of however tender age, but he was restrained by the fact that just about that time amalgamation began, and the child was so great a curiosity that its owner desired to raise it himself that he might see its outcome. Capt. Hemings soon afterwards sailed from Williamsburg, never to return. Such is the story that comes down to me.

Elizabeth Hemings grew to womanhood in the family of John Wales, whose wife dying she (Elizabeth) was taken by the widower Wales as his concubine, by whom she had six children—three sons and three daughters, viz: Robert, James, Peter, Critty, Sally and Thena. These children went by the name of Hemings.

Williamsburg was the capital of Virginia, and of course it was an aristocratic place, where the "bloods" of the Colony and the new State most did congregate. Thomas Jefferson, the author of the Declaration of Independence, was educated at William and Mary College, which had its seat at Williamsburg. He afterwards studied law with Geo. Wythe, and practiced law at the bar of the general court of the Colony. He was afterwards elected a member of the provincial legislature from Albemarle county. Thos. Jefferson was a visitor at the "great house" of John Wales, who had children about his own age. He formed the acquaintance of his daughter Martha (I believe that was her name, though I am not positively sure,) and an intimacy sprang up between them which ripened into love, and they were married. They afterwards went to live at his country seat, Monticello, and in course of time had born to them a daughter whom they named Martha. About the time she was born my mother, the second daughter of John Wales and Elizabeth Hemings was born. On the death of John Wales, my grandmother, his concubine, and her children by him fell to Martha, Thomas Jefferson's wife, and consequently became the property of Thomas Jefferson, who in the course of time became famous, and was appointed minister to France during our revolutionary troubles, or soon after independence was gained. About the time of the appointment and before he was ready to leave the country his wife died, and as soon after her interment as he could at-

It was large, & favored with the overflowings of divine love, shed-abroad among the Inhabitants of this highly favored town who have long been resisting the many lines & precepts which they have received from faithful Gospel Ministers, & the Great Ministers of the Sanctuary, who hath not been wanting to replenish our hearts with the everlasting day-spring from his Throne on High: but I may tell thee that at this meeting unusual impressions were observed in the countenances of many. & there is some reason to hope that they may prove lasting to some Minds -The testimonies in the Morning were as follows A few words by Sarah House, a living prayer by Amos Davis, a short but lively testimony by E. [Elisha?] Thornton, & a very extensive & powerful one by Nathan Hunt - In the Afternoon Eliz Coggeshall & Ann Alexander very livingly, then Nathan Hunt, then a prayer by a woman in the little Meeting house, which I could not hear so as to distinguish the words, nor do I know who she was, then John Winslow thought it best for him to set his seal to what had been said, so the Meeting concluded with a few words by N Hunt - These meetings were remarkably still, except one man in the afternoon was taken in a fit in the Upper Gallery, and a woman fainted away. Getting the man from so inconvenient place made more stir than could be wished, but upon the whole it was a very favored time, the people were very civil, & much satisfied with Nathan & Ann, but E. 12 of the M & third of the week My time was so much taken up yesterday that I could not give thee an account of the proceedings of the day but as meeting adjourned till three this afternoon I have an opportunity this Morning – The morning meeting was a solid precious time, it opened with but little preaching. Jonathon Wright from Virginia in a few words saluted the dear Youth & James Simpson observed that words fitly spoken were like Apples of Gold in pictures of Silver, or says he that say it should [be] translated, "Baskets of Silver", He then added dear Youth, now put these goodly that may be dropt in the corse of this Yearly Meeting into your little baskets, & there keep them, & they will do you some substantial Good - D Buffum then in a few words spoke of the necessity of beginning well & briefly pointed out they way for it –

It was an encoraging Meeting among the Ministers a belief that Truth would Yet rise higher, & was even about to rise in New England –

In the corse of this sitting Thos Arnold weightily proposed the appointment of a committee to enter into a general investigation of the State of the Society, which appeared to be congenial with the prospects of many present, was accordingly done & they left at liberty to consider & improve such parts of our discipline as to them appeard necessary - A further propposition was spread by George Churchman to enter into correspondence with the Yearly Meetgs of Baltimore Virginia & North Carolina, which was committed to the corresponding committee –

As I observed it was an ever encoraging season in the Morning but in the afternoon when the State of Society was enter'd upon as represented by the Queries, some afflicting sensations were felt among us. The many deficiencies that appear'd in them were very sorrowful - upon which many feeling remarks were made & N Hunt was drawn into very close home preaching to many among friends in these parts – the lyar the talebearers & backbiters were openly accused & reproved in a very solemn alarming manner - those who are at work secretly to hurt the services of concerned friends, & those who stand in the formost rank in society, were warned by him to desist therefrom, or they would be carried our of the Church as dead Men who make such a stink in the house that the living cannot remain in it - in the corse of the afternoon Ann Alexander came among us & in Solemn manner spread before our Meeting what was on her mind respecting our Queries & proposed some amendmets - shall conclude this days with an account of the report of the committee appointed last Year to visit Quarterly Meetings to the eastward respecting removal of the Yearly Meeting to Lynn or Salem-

13th of the Mth 4th of the Week The Meeting this morning met at 9 OClock & opened by short testimonies from J Wright & D Buffum - the corresponding committee produced Epistles for all the Yearly Meetings in the World. - Those for Baltimore, Virginia & N Carolina with whom we have not been in the practice of corresponding, appear'd to be well adopted, & the matter lively -Indeed I believe those who drafted them were divinely assisted, & it was thought by many present & particularly by those who were here from other Yearly Meetings that they would be well accepted -The committee to consider the State of Society proposed some amendment of the query- the Meeting might have finished their business at this sitting, but it being late, having set upwards of 3 hours & a half, Ann Alexander, having a desire that the partition should be set open between male and females, that she might have a parting oportunity with us together as it was not likely that she will ever be with us again, it was though best to adjourn as late as four OClock At the time we met & a solemn one it was After the Minutes were read & the partition opened, Jon Wright was considerable large in a lively testimony. - then A. Alexader spoke largely & very sweetly, endeavoring to impress our minds that Religion did not consist mearly in an external show of plainness, but in internal plainness & Simplicity of heart. - much more the substance or rather savor I retain, but am unable to convey it by ink & pen - then James Simpson went on & drew several instructing allegories much to our edification - then N HUnt kneeled in solemn Supplication to the Throne of Grace & prayed in a very living & powerfully manner for the prosperity of all branches of the family

Indeed my dear friend it was - a time in which many of our hearts were deeply and powerfully affected with the operation of truth, & I much desire for all present & particularly for myself, that we may be preserved in a profitable remembrance of it - from thy friend Stephen Gould

I have written much on what has happened, at the time of this our Annual & truly solemn Sacrifice, which I hope has been received by him to whom it belongs & to whom the Sacrifice of all Mortals is due.

But of my own particular state of mind I have noted but little nor has there been much for me to say, for I must acknowledge that has not been so barren & destitute for some Years as it has this, not-withstanding I have been surrounded with agreeable friends & we been favor'd with many showers of Celestial rain which have come plentifully upon us, & have heard many living testimonies, which have been borne by living & faithful Friends. Yet my mind hath been but little benefited or touched thereby; greatly owing to the want of a right preparation, which has been greatly hindered by my being appointed to have the Oversight of the Boarding houses, it took up so much of my leisure time that I was hardly able to think of any thing but the attention of friends. This is all necessary to be done that things be kept in order. And I believe that I was in my place & shall have my reward, tho' the enjoyment of that precious & highly desirable quietude was denied while other friends were in possession of it. Then more of the primitive Locals [By "primitive Locals" might he be speaking of the local citizens of color who evidently had come to an open meeting in [Newport, Rhode Island](#) two days earlier? This Friend George Churchman from the westward was presumably the New York surveyor who was born December 29, 1764 and would die on March 14, 1837.] would be manifest among us & our meetings would not be covered with that death which they now are - he said he believed it was time for us to be more diligent in the search of ourselves, & expressed a prospect that truth would again revive among us as a people, equal to the time of our predecessors - Hannah Dennis spoke a few words of Scripture -At the close of the Meeting George expressed a desire that when the Meetings had separated & finished their business, we might again unite, as he was concerned to set with the members of the preparative Meeting. - which was done, & solid opportunity it was.*

After some time of Silence he arose & observed that he wished not to go into many words, knowing that they would not do the works, but since he had took his seat the last time, several things had took place in his mind. The first he mentioned was that this place (R. Island) was where the Ark of the testimony was deposited (meaning where the Y Meeting was held) & that it was necessary for us to keep ourselves clean from the pollutions of the World, that it might be a blessing to us. Obadiah Davis was then concerned to address the Youth in a sweet & moving Manner - directing us to the Wonderful counselor the everlasting father & prince of peace, in all our movements in life. He observed that by properly adverting to him we should be able to make strait steps & not be liable to err. With much more good & wholsom advice which I humbly hope may prove lasting with me

Friend [Stephen Wanton Gould](#) wrote in his journal:

4 of 8 m 1804 My mind has been deeply exercised at times for a long time, about some matters, which are very trying to me. Things of the world should be duly attended to such as providing a subsistence for ourselves & families, for the Scripture saith he that will not provide for his family is worse than an Infidel. But an over reaching disposition for worldly gain will most assuredly root out the purity of religion. My Spirit has often been bowed down within me, at prserving [perceiving] some of my beloved acquaintance, whom I have loved almost as the Apple of my Eye, & whom I am well assured have been well affected & known the humbling efficacy of the power of Truth - chaining themselves down to things which are but little good here & none hereafter, but grasping them, forgetting the Almighty God who provideth for his humble depending children a suffucient wealth here, to carry up thro' time to our comfort & his Honor. But also giveth them abilities to lay up treasure in Heaven when the Moth nor rust of this World can never corrupt, which is a treasure worth spending our time streangth to obtain -But a mind forgetting God & burying (burying) their talents as in the earth; is not only in danger of intailing grievous perplexity & trouble on himself in this world, but also in the World to come. Oh saith all that is alive & quick within me, at this time, may be careful to labor dilligently with my hands, to acquire a competency for myself & something to impart to the poor, & for every favor be thankful. Tho the stream of wealth is but small at present, Yet I have faith givin me to believe, at this time, that He who provides for the Sparrows & clothes the lilleys, will not leave me to beg my bread, if my whole dependance be (united with Utmost industry) is placed on him alone, whose just due is a portion of our time set apart from the worlds concerns, for the worship & praise of his NAME.

require at my hand.—

Being unwell, went this afternoon to take a walk round the Neck in company with my intimate friend Thos Horsbay. & have just returned. -

During most of the time while we were out my mind was so depressed that I could very hardly join in in conversation, & I was affraid of being thought reserve. I very feelingly had to remember while I was sitting under a Rock a very striking passage in the Journal of our friend Job Scott, where he mentions a walk which he took in Ireland, which he says was pleasant & he might have enjoyed it, But had to remember the Wormwood & the Gaul, a considerable of which is my lot from a variety of circumstances. I felt so depressed as to be absent in mind from much of what my companion said.

As we were returning a fresh affliction was presented of which my words are wholly incometent to describe. It was the sudden removal out of Time of our dearly beloved & faithful Pillar in our Society John Hadiven I saw him but little before I left home, & when I heard of his decease I was so affected that it seem'd as if I should fall down in the street

He departed out of time in a solemn Awful Manner - as he was going to his garden (which he did every day) he was taken ill & sit down on the Seventh day Baptist Meeting house Steps, where he was soon discovered. while the person went to call assistance, he fell from the Steps but was soon taken to an House, where he remained some time, & seemed to recover a little at first, but was again taken ill & said to the woman friend that was with him "The scene is closed" which were his last words. Then in a short time stretched himself out and died immediately -

When we reflect upon the very exemplary life & conversation of this unexceptionable Man, whose spirit has doubtless just taken its flight to the realms of eternal day, it may tend to excite in us the warmest desires so to imitate his virtues & examples, that we may die in the like peaceful frame of Mind which he did.

September 25, Tuesday: Near what is now Pierre, South Dakota the Teton Sioux (the Lakota) demanded that the Meriwether Lewis and William Clark expedition surrender to them of their boats, as a toll for moving farther upriver. This almost brought a fight, until headman Black Buffalo interceded.

Yellow fever broke out in Livorno.

The 12th Amendment established a new and more appropriate procedure for voting by electors for president and vice-president. Each elector had been casting two ballots for president, with the candidate obtaining the highest number of votes (assuming that candidate received a simple majority of more than half of the total votes) becoming president, and with the second highest vote-getter becoming vice-president. In case of ties, as had happened in 1800, an election decision had to be made in the House of Representatives. When [Thomas Jefferson](#) and Aaron Burr, running as a ticket for the republicans, tied in electoral votes, the lame duck congress had to cast 36 ballots before it determined to award the presidential office to Jefferson, and the decision reached was owing mostly to the rules about voting by state in the House of Representatives. Because the fear among republicans was that the federalists were going to appoint the senate president pro tem while calling for a new election, or award the presidential office to Burr, when the republicans took over the Congress they passed the 12th Amendment to require electors to vote for a president and a vice president simultaneously and separately, in order to prevent a repeat of one of the last acts of the “reign of witches” — as Jefferson termed the Adams administration.

of my endeared acquaintances.

When I first went in, I apprehended it would be my place to set very still and say but little, which I did & waited for the arisings of life, with my mind turned inward, & felt it graciously Vouchsafed - after some time I found the way opened to engage in conversation accompanied with a care not to be too much in expression.

I do really believe, there is much to the right improvement to be gained by young people's assembling together & turning their Minds to that Teacher which will teach us the right way, & by associating together we are brought near to each other in that love which will cement our hearts in an Indissoluble Union, which is necessary for us all to feel before we can become rightly qualified to be helpful in the Church - Thus by being together in the right way our minds assimilates & begets a nearness which is profitable & will make us one family even that family of Love - Oh that this was more the case among us as a Society then should we be a different people even fair as the Moon clear as the Sun & terrible to the enemies of Truth as an Army with Banners.

I forcibly feel the necessity of those observations as I write them having seen the great loss which Divers have sustained on this highly favored Spot of R Island for the want of family correspondence I believe so the Youth would not Marry out of Society as does, were parents timely & properly to introduce them into such company as would be profitable, - but for the want of this they go abroad & seek associates of their own chusing & thus slide down the current of Vanity and dissipation - How often does reflections of this kind pass my mind & how often is my mind brought to sympathize with my beloved young friends of this description.

Buffum was conceren'd to speak extensively on the subject of happiness, setting forth the difference between the false & true, & said he felt a degree of Gospel Love to flow toward the gathering which warranted him thus to address us, tho he felt himself to be but a feeble instrument.

Then A Robinson rose, took up the subject & intersperced it with very instructing counsel to several states which she apprehended were present. -At her conclusion David rose again & was concerned to speak in a very remarkable manner on the Doctrine of accountability, which made my very inmost parts rejoice, knowing there were some who had imbibed those miserable tenates of Universal Salvation to their great hurt, if not total blindness. -the knowledge of which has of late greatly afflicted my heart, so much so that several times I have left my shop in much distress, to visit the individual; & have endeavored to make use of all the powers which I am endued with to alter this judgement, in this Soul destroying Doctrine. -

2 day 5 of 11 M 1804 / Last seventh day towards evening I found an inclination to go to [Portsmouth](#), intending to be at their meeting on first day -

After I had filled [crossed out] myself began to walk on, & when I had walked about half a mile, began to feel fatigued & discouraged about the undertaking, & looked back & saw two market Carts. & had thoughts of applying to one of them to help me on my journey, but when they came up I felt sensible that they would not be willing. - & was ready to turn back, but on observing two chaises behind me, concluded to keep on untill they came up. finding the first was full, I thought within myself, "I'll trust with a gegree [degree?] of faith & perhaps I shall get along, so when the other came up found it had but one person, who readily took me up & carried me within a Mile & an half of where I wished to go" -

This I mention that I may see ways are sometimes cast up for us when no way appears, & when prospects are dull & gloomy we are provided for to our admiration. - & there is no doubt, if we are careful to dwell on holy Ground the kind hand of the Almighty will be with us both in spiritual & temporal concerns. - may dependance be ever placed on this Spot -

The next day I went to Meeting in which my mind was much afflict'd on taking a view of the people present, to see & feel the dull stupor which prevailed almost over the whole of us. - the State of Society was quite moving to my mind, to see so few Standard bearers, & so few who are likely to come forward to succeed or join with the present had an effect which moved all that was alive in me, with desires that thro' faithfulness I might contribute a little to the present drooping state of society. - After meeting my feelings were much more [?arached] as I found the [smudge] stopt to treat with a Young man who had paid his Militia fine.

Dined at Cousin Chases where my mind was so feeling impressed with the above mentioned subjects with others that I felt conversation to be a burden to my mind. -took tea at Cousin Alice Goulds & saw her poor son Wm who was much affected at seeing me he is a moving Object, & may the sight of him serve as a Monument of human frailty- then came home & spent the evening at C Rodmans to some edification.

5 day 8 of 11 M 1804 / Attended Meeting which we passed in Silence, & some degree of solemnity cover'd my mind. Altho my meeting was some what comparable to a confused dream yet I trust some part of it was acceptable. — What I mean by confused dream, is, — my mind would sometimes be in one place, & sometimes in another & hard to be kept to the center & sorce of life. — Confusion of this kind is often my experience, the Adversary is very buisy [?] to insinuate worldly concerns when we attempt to turn our thought inward, & it is astonishing to see how subtly, & at what unsuspected quarters he will bring in his vain thoughts, to divert our attention from silent, & acceptable Worship of God, even when, I have the most desirious to overcome him, he has tried the harder, but thankfully may I say the sometimes I have been favored to overcome & lay waste his designs. —

My mind has bee seriously concerned for some days, on account of the Inhabitance of our Town, especially those who are in low circumstances. a cold & prehaps [sic] hard Winter is now approaching, & there is but very little Wood to be sold, & what there is, is so very dear, as to render it impossible for them to procure a sufficiency to keep them comfortable, & what is greatly to be fear'd is that it is not likely to be any better. perhaps what has led me into this sympathy, is that I am something in their condition, & there is nothing can bring us to realise things like experience

I view it as a very great calamity & no doubt is designed to to bring us nearer to the true & living faith. Indeed it has been a remarkable time, this Year throughout the whole continent, what of pestilence, Severe Storms, Drough &c, all of which the kind hand of the Almighty has evidently been in. — I am ready to conclude that it is time for us to be up & doing for ourselves. —

In my shop this evening one of the most remarkable opportunities that perhaps ever has taken place in the whole corse of my experience, was between a dearly beloved young friend of mine & myself – As we were talking on many things, I was led to express myself in a degree of Zeal to a considerable length. – When the conversation ended we were both evidently under good impressions, & took our seats & centered down into an awful stillness of mind in which I felt desirous that all which I might do for the promotion of the cause of truth may be to the Honor & Glory of God alone, & that I might not vaunt anything of my own when I have been favored to speak to the convincement of any mind. – The power of the Lord God Almighty had wrought so powerfully between us that he kneeled in supplication to the Almighty in much brokenness of spirit, craving our preservation, & that we might be strengthened to run the row that is set before us with acceptance. – It was such a time that I desire may never

November 23, Friday: [Nathaniel Hawthorne](#) would allege, in his campaign bio supporting Brigadier General [Franklin Pierce](#)'s campaign for President of the United States of America in 1852, that Pierce had been born on this date at Hillsborough in the State of New Hampshire:

FRANKLIN PIERCE was born at Hillsborough, in the State of New Hampshire, on the 23d of November, 1804. His native county, at the period of his birth, covered a much more extensive territory than at present, and might reckon among its children many memorable men, and some illustrious ones. General Stark, the hero of Bennington, Daniel Webster, Levi Woodbury, Jeremiah Smith, the eminent jurist, and governor of the state, General James Miller, General McNeil, Senator Atherton, were natives of old Hillsborough county. General Benjamin Pierce, the father of Franklin, was one of the earliest settlers in the town of Hillsborough, and contributed as much as any other man to the growth and prosperity of the county.... At Franklin Pierce's birth, and for many years subsequent, his father was the most active and public-spirited man within his sphere; a most decided democrat, and supporter of Jefferson and Madison; a practical farmer, moreover, not rich, but independent, exercising a liberal hospitality, and noted for the kindness and generosity of his character; a man of the people, but whose natural qualities inevitably made him a leader among them. From infancy upward, the boy had before his eyes, as the model on which he might instinctively form himself, one of the best specimens of sterling New England character, developed in a life of simple habits, yet of elevated action. Patriotism, such as it had been in revolutionary days, was taught him by his father, as early as his mother taught him religion. He became early imbued, too, with the military spirit which the old soldier had retained from his long service, and which was kept active by the constant alarms and warlike preparations of the first twelve years of the present century. If any man is bound, by birth and youthful training, to show himself a brave, faithful, and able citizen of his native country, it is the son of such a father.

Presumably we should accept this as accurate at least insofar as date and place of birth, and names of parents, despite the fact that had Pierce been born outside the USA, he would not have been eligible under the Constitution to run for President, as these are data elements attested to by independent, objective, and ordinarily truthful sources as well as by this creative bio done up for him by a college buddy. As to whether Franklin actually inherited from his father anything more than a love of strong drink, as to whether Franklin ever exhibited what we would term patriotism rather than what we would term opportunism, the record this politician left for our consideration is considerably more problematic.

The old people of his neighborhood give a very delightful picture of Franklin at this early age. They describe him as a beautiful boy, with blue eyes, light curling hair, and a sweet

STEPHEN WANTON GOULD

FRIEND STEPHEN WANTON GOULD

expression of face. The traits presented of him indicate moral symmetry, kindness, and a delicate texture of sentiment, rather than marked prominences of character. His instructors testify to his propriety of conduct, his fellow-pupils to his sweetness of disposition and cordial sympathy. One of the latter, being older than most of his companions, and less advanced in his studies, found it difficult to keep up with his class; and he remembers how perseveringly, while the other boys were at play, Franklin spent the noon recess, for many weeks together, in aiding him in his lessons. These attributes, proper to a generous and affectionate nature, have remained with him through life. Lending their color to his deportment, and softening his manners, they are, perhaps, even now, the characteristics by which most of those who casually meet him would be inclined to identify the man. But there are other qualities, not then developed, but which have subsequently attained a firm and manly growth, and are recognized as his leading traits among those who really know him. Franklin Pierce's development, indeed, has always been the reverse of premature; the boy did not show the germ of all that was in the man, nor, perhaps, did the young man adequately foreshow the mature one.

1 day of 25 of 11 M 1804 / Our meetings were both silent, but to my mind good solid opportunities. Took tea at Sam Thurstons & spent part of the evening in Company with our friends David Buffum

Between meetings My Mother related the following anecdote of my infancy. As we were sitting conversing on several subjects, I observed that my path had been different from some, & said that I wondered at it, to which it was reply'd, it was born with me, for I always had an aversion to a woman with an high cap, or gaetry [gaiety?] in general one day when three valuable friends were at our house, who I have since dearly loved & truly honor'd, whose names were Isaac Lawton, Mary Mitchell & my cousin David Greene, she was sitting with me in her lap when about a Year Old I lay & looked at them again & again, & after a while said, "how do" which were the first words that ever I spoke. The circumstances of my speaking was observed by the friends present, & one of them said I was born a friend, & when my mother told me of it today I reply'd I hope I shall die one - This is inserted for my own benefit, therefore if it should ever be perused by others & considered a weakness, let it be remembered that it was to serve my own turn, as I consider If I should live in some future day when weakness & trials assail me recurring to this may afford [afford] me some little streangth as it has had a similar effect at hearing it related.

6 day 14 of 12 M 1804 / I have felt quite barran for several days, & Alass it was for the want of due watchfulness to the motions of the holy spirit, that I have been thus left. Oh! how often hath my mind fallen into langor by giving way to the little foxes, how often have they destroyed the precious vines that were intended to bear fruit for the service of the great husbandman who is ever by his matchless love wooing & drawing us by his holy cords into his service, which is not hard, but as we give way to it, & enlist with chearfulness, we shall find in the end, peace & happiness. My soul is humbly desirous at this season to become more & more faithful, & prepared to surrender my all at the footstool of him who a right to require it if he pleases. -

To know self to be subdued is of the utmost importance, & a work possible to be done, tho' from the Cross which lays in the way many are ready to doubt it. yet from the very small advancement which I have been enabled to make, am at present entirely satisfied, that before we can florish in religious life it must be attained too. -

Last evening a young man, not a member of our Society was at my shop who of his own accord enter'd on religious subjects. he appeared to be in a very seeking state of mind, & said he had sometimes thought of joining the [Baptist](#) society, but now believed he had been favored to see beyond the form into the substance. he observed that people flocked among them & would speedily join in fellowship thro' persuasion of the ministers, but said he had seen that would not do, it must be an inward heart work for it was evident they were not sufficiently purged beforehand as even after they were dipt in Water, they would grow careless & sometimes immoral.- -

He said he had followed the friends meeting for some time, & when he first began, his mind would become very uneasy, think the time long, & want meeting broke up, but now, tho' they were silent yet they sometimes seemed short. — I have been led into reflection on the subject & believe that there are many tender seeking minds who have an eye upon friends, & would come forward faster than they do were it not the case that the conduct of some of our professing members are as stumbling blocks to them. - how necessary it is for us to be careful that no reproach be brought on the Truth by our means. But were we careful to let our lives comport with our profession, I have no doubt but there would be many more added to the Church & her pillars greatly strengthened.

4 day 9 of 1 M 1805 / It seems as if the longer I live the more sensible I see & feel the very great falcy there is in all human things; however promising our prospects may be, they are continually liable to various modes of defeat, & sometimes when we are raised, even to the Summit of our wishes, we are cut short, either by death, sickness or various other ways, all designed, for our lasting benefit, by the kind hand that inflicts the wound, which when viewed in its proper light is not a wound, but an healing stroke of his admirable Love & will if rightly taken & improved by ourselves, prove the very sorce of our permanent advancement towards that celestial happiness, which far transcends the glitter, pomp & vanity of this World. & altho the renuncuation of these things may be attended with pain & mortification to our natural bodies, yet by carefully watching each eminating ray of divine light & by that true & living faith which worketh experience & by love we shall feel our spirits raised even while on this Earth to that glorious & everblessed ground where we shall be enabled to sing for joy that our lot has been cast as it has & when the last trump of Time shall be sounded in our dwellings here we shall reap far more Exceeding & eternal weight of Glory in the Mansions of eternal rest hereafter. I feel while thus I write, an expansion of desires that my mind may be weaned from all sublunary things & they be suffered to occupy no more of my time than is really necessary to provide a subsistance for this body & the residue to be wholly devoted to the Service of him who has created us for the purpose of his own Glory.

But Oh! of what short duration are these desires with me -it sometimes seems as if Satan had desired to have me, & had nearly accomplished his end, for when I am the most desirous to be in possion [possession] of better things, then is the time that he besets me the most, for it seems as if he pours torrents of his vain suggestions into my mind to divert it from thoughts on its God he stands ready to swallow up the least spark of celestial fire that kindles in my heart, but he is sometimes frustrated in his designs.

The Life of the mind is what he aims his blows at the first, once he can kill that, he will the more easily lead us on his own way even if we follow the form of religion, if it is but the dead lifeless form it suits him just as well as any way & the reason why he is So at enmity with the seeds of life is because

He said he had been thinking of the prophecy of John which he saw in a holy vision - "The old heavens & the old Earth done away, & the new heavens & the new earth appear, & said that as we abode under this sanctifying operation our old things would be purged away & our heart become New, we should have restored to us Counselors as at the first & Lawgivers as at the beginning" The Young men would be made Instrumental & the Daughters polished after the similitude of a pallace - I spent most of the evening agreeably with Jon Greene & wife. They shewed me some writings of their brother David which afforded instruction.*

4 day 23 of 1 M 1804 [sic] / I was thinking this morning while laying in bed, what I should compare my mind too, & it seem'd to me that it was an entire blank as to religious sensations - & so it continues to feel, tho' many times I have endeavor'd to turn to the Life but could not raise it - I now feel desires to spring in my long barren heart, for an increase of dedication, & faithfulness to search after that which is food to the mind & will satisfy as nothing will, which we can be in persuit of here, even satisfy us with the consoling hope of peace & happiness here & hereafter -

Having felt my mind thro' the corse of the day much depressed under divers weights both from within & without I feel as I am sitting alone in my shop this evening a freedom to commit to writing some things which seem not only to concern me alone, but the community at large. - It is now the 23 of the 1 M & now is, & has been for a long time extream cold & uncommonly stormy. - our Town is entirely destitute of Wood. not a stick to be bought, except from distill houses, bake houses or private Sellars. Pine wood is sold at the shocking price of 8 Dollar P Cord, & Oak for 10, & if the weather does not moderate it must be more. Many poor persons are entirely destitute of any fuel or means to purchase it, & of consequence are extream suffers. -these are circumstances which are deeply affecting to my mind, while I trust I feel a degree of humble thankfulness to the Author of all Good, for the benefit, which myself & fathers family at this time enjoys, of being comfortably provided for, with food & wood in this trying proving season - I feel for those who have not those comforts, & sincerely believe that was it in my power, my heart would expand at relieving their necessities. - But Alas its not so, I am but just able with great care to keep along &

sometimes get so much discouraged as almost to dispare of ever closing my outward affairs, to my own peace & the honor of the cause which I profess. Altho they are not extensive yet from the Multiplicity of incumberances & discouragements which I labor under in my business, fear & trembling is often the painful companion of my mind - - Will add to this the state of my mind, as respects religious engagements is equally distressing - here I have been visited & revisited with the dayspring from on high, from my childhood up to the present day, & have yealded to many of its heavenly dictates, & often felt its holy enlivening flame to to kindle in my spirit, which has comforted & raised humble thankfulness in my heart, to find that I was so far graciously made sensible of its sanctifying operations - But Alass Alass the Years of Manhood have now arrived & those of Old Age may soon hasten, & that advancement, that holy lively Zeale which is necessary to make us acceptable to the Holy Heads is wanting, all for the want of a more full Surrender, & humble dependance in my early time. - now I see the very great advantage there is for Young people in the Morning of their days when they feel the first calls of Sacred love to their souls, to make an immediate surrender (even if it be in Childhood) in every thing, however Cross it may be, to our carnal inclinations, as by this means we may avoid that dwarfishness, leanness & Barraness of spirit which so often awaits those who are dallying with divine Mercy. How might I have been built up as a Young man, & even by this time become a strong man in the Lord, had I have been faithful in every thing which was made manifest, clear as the Sun at noon day while I was yet a child

But thanks & everlasting praises be Ascribed to the Lord forevermore, he hath not left me destitute but is still with me, & I trust hath at times engaged my soul to pray for & labor acceptably with some who are neglecting their chief concern & persuing Lying vanities to their souls hurt if not total destruction. which labor I desire not to arrogate to myself but render it to him to whom it all belongs & crave my own furtherance & lasting preservation, as it is he alone that is able to keep us from the wiles and stratigems of the enemy to which we are ever exposed & ever liable to be caught in, unless immediately assisted by his power. -

Since writing the above my mind is relieved & refreshed with a degree of divine love, & feel a concern to be increasinngly Watchful, that my mind may be fully dedicated to the Lord - often to retire & wait for the arisings of life whereby all true usefulness is derived.

5 day 31 of 1805 / It has for several days been a time wherein but little engagement for the promotion of the cause of truth has been felt, either for my self or others But felt before I went to meeting, a dread upon my mind, believing, that in the last (which was M Meeting) that it might be required of me to put forth my hand to help the Ark. In the first meeting it was a pretty close time with me, being led to reflect upon my unfaithfulness & short comings in the line of duty, as respects faults which are hid from the outward eye only known to the Almighty ... While I was in the midst of those reflections, our beloved friend D. Buffum rose & delivered an excellent testimony founded on these words "Without faith it is impossible to please God" ... Hannah Dennis & Abigail Robinson were also sweetly concerned in testimony.... But to return to the Meeting for business - there was a very distressing case among us, with which my mind was seriously exercised, & I apprehended it to be my place to speak of it, but by setting too long the Matter was concluded upon & returned to the women directly opposite to what I apprehended to be right, & for my unfaithfulness after it passed from the Meeting my mind fell into a very distressing weakness which continued the remaining part of the Meeting ... I now have to believe, if I had have given up to submit my prospects to friends, it would have been concluded more to the honor of truth & society then it now is, as it hath appeared from conversation with several friends after meeting, that their prospects were exactly similar to mine.

March 3, Sunday: Samuel Lee died at the age of 56, at Shediac, on his return from Halifax to Ristigouche.

Samuel Lee [of [Concord](#)], brother of the Rev. Joseph Lee, was born March 28, 1756, and graduated [at [Harvard College](#)] in 1776. During the revolution he was a merchant at Castine, and after the peace at Tracadache in Canada and Ristigouche in New Brunswick on Bay Chaleur. He held various offices, civil and military, under the government of that province, and died March 3, 1805, aged 56, at Shediac, on his return from Halifax to Ristigouche.¹⁹

The federal congress declared Buffalo, New York to be an official port of entry to the United States of America.

When Louis Spohr gave his first concert in Berlin, he asked the young virtuoso Jacob Beer (Meyerbeer) to take part and this caused the audience to swell with interested Jews.

The federal House of Representatives took under consideration the proposition originating with the government of the state of Massachusetts, that the national Constitution be amended to provide the federal government with instructions as to its proper response to the import portion of the [international slave trade](#). The proposal was immediately tabled, that is to say, killed.

Mr. Varnum of Massachusetts presented the resolution of the Legislature of Massachusetts, "instructing the Senators, and requesting the Representatives in Congress, from the said State, to take all legal and necessary steps, to use their utmost exertions, as soon as the same is practicable, to obtain an amendment to the Federal Constitution, so as to authorize and empower the Congress of the United States to pass a law, whenever they may deem it expedient, to prevent the further importation of slaves from any of the West India Islands, from the coast of Africa, or elsewhere, into the United States, or any part thereof." A motion was made that Congress have power to prevent further importation; it was read and ordered to lie on the table. *5 day 18 of 4 M 1805 / Through the corse of the Morning I have felt an exercise on account of the low state of society with this Querie "By whom shall Jacob arise for he is small" & was led to view the many stumbling blocks there are among us which greatly arise from the inordinate persuit of Wealth – I have thought that many of the inconveniences & perplexities which await us thro' time might be avoided by attention to the inward principal in our first advancement, for if we begin wrong we are liable to intail evil consequences on our selves of long duration: an example of the children of Isriel has been brought very instructingly to the view of my mind, as I have been musing at my labor in my shop this morning before Meeting, as well as at many other times, which was the crafty conduct of the Gibeonites [Gideonites] towards them, we find them representing themselves as Strangers from a far country with their old clothes & mouldy bread, & for the want of a timely attention to the Urim Thumin [small precious stone in the center of the breastplate (hoshen) of the high priest, being the source of light and truth. Urim thummin = Lights and perfections. Alluded to as lost following the Captivity.] they were so blinded as to close in with their proposals, whereby mischief was intailed on them & their posterity, for altho they were to serve but as hewers of wood & drawers of water yet when Israel had still further neglected their God, they fell to marrying wives of strangers, & into other habits of intimacy offensive in his sight
Thus young friends when they are about to enter on the stage of tribulated actions become darkened, & perplexed in their propects, & instead of reverting to the holy Urim Thumin, they press forward with egar [eager] pace after the pearl which perisheth with the using, & intail on themselves, & even their posterity, grevious afflictions, & dishonor to their God tho at first they may intend to do well being as yet innocent in their intentions, flattering themselves that their money shall be but a servant to them & not they to that, & perhaps carving out some great good they will do with it when they have it in possession, yet by going on step by step, they get rooted in the love of it till finally they loose sight & become callous to the effect of truth in their Mind. – I have been deeply impressed with reflections similar to these at various seasons, & I trust, they*

may be of use to myself [myself], as well as applicable to others, for I have clearly seen the necessity of closely adhering to the voice of the Lord, in the beginning of our time, & continuance in obedience to his holy calls thro' the whole of our lives— for many have I seen, who have run on from one step to another untill they have almost lost sight & sense of that which their souls craved in the beginning of their carrier. Being willing to adopt the language in sincerity, "I am the clay thou art the Potter make of me what thou wilt" This was assuredly the case with me & oh the hard afflicting struggles my poor mind has had, to keep in view the main chance, & have many times nearly lost sight of it. Tho' I have no prospect of such an union at present I know not that ever it will take place with me, but married or single, my strong desires are at seasons that I may fix on the Lord for my portion, & the God of Jacob for the lot of mine inheritance & serve him faithfully all my life long

Therefore there is great encoragement to trust in the Lord who in his unsearchable wisdom, brings to pass many things for us, that we could not expect, if we are but faithful to the calls of his spirit within. —

1 day of 5 M (4 day) 1805 / General Election is this held in town - my very spirit has been burdened within me to see the vanity & wickedness that has appeared among the people - Drunkenness & fighting has been the order of the Day I have been led to consider the very great inconsistency there is in friends dressing up their Children & sending them where they can behold the wickedness that prevails at such times - some weeks ago as I was sitting in my shop in a serious frame of mind -anticipating the confusion that would probably take place on this day, I wrote the following address -tho' not with a view to make it publick - The object of the writer is to arrest the Attention of youth generally, & particularly those of the Society of friends, & those who generally attend our Meetings, to examine the inconsistency of publick appearance at times of general Mirth, & particularly at times of general Election at which time, there are generally great numbers of giddy youth who are involved in various scenes of vice, such as drunkenness, Swearing, Gaming &c - Whether the appearance of those acts of Abomination ought not to raise seriousness of mind rather than to promote an inclination in us to appear in the streets or at our windows with countenances which bespeak an assimilation of mind with those who indeed have concord with Belial.-

How much better would it be for us to retire into the closets of our minds, & with humble contrite minds, bow before the God of Heaven, & breath forth our supplication for His help -who of a truth takes no delight in seeing his creature man, walk with outstretched neck, & wanton eyes, but deplores their miserable condition, & is wooing us by gentle visits of his love, to become true followers of a Meek & crucified Saviour. Therefore let us rather than join in such offensive scenes, retire from them, sincerely craving, that holy knowledge of pleasure which is only known to the heavenly minded, it will last beyond the grave, when these bodies shall put on immortality, which the sensual pleasure at such time will not do but in the Awful hour of Death will prove a sting & condemnation -

How often have I seen the poor miserable & forlorn objects carried home dead drunk bearing upon serious wounds which they have received from their falls, others half killed from the brutal degrading practice of fighting and kudzeling -none of which I feel my mind authorised to say are pleasing to the Almighty, but are highly offensive in his sight & what his controversy is deeply against

Now let us ponder these things, feel & see, how much more of the balm of heavenly peace would be witnessed from inward retirement, than to deck our bodies with the finest apparel & exhibit them at windows, or in the streets among the Multitudes

7 day Morning 1 of 6 M 1805 / My mind has felt an ingagement on behalf of an individual of my acquaintance, who is not in membership with us at present, but who I trust may be 'ere long if the Cross can be sufficiently borne. I believe she is called to a life of holiness & is designed for a conspicuous station in the Church — Mental prayer has been breathed forth to the Almighty on her behalf, that she may rise superior to those giddy circles in which she sometimes moves — but happy for her, she has expressed to me that they are often a burden to her tender mind. — My spirit craves on her behalf that her whole soul may center in an entire dependence on our God, for in him is safety. & none that put their trust in him was ever made affraid, but feel their mind hedged about by the immutable fortress of Christ our Saviour. Here I am brought to view the glorious result of living at all times & on all occasions faithfully in our profession & principals

For was this generally the case, there would be many, by our example brought to the holyness of Truth, & be made willing in

They would see the comly order of us as a Society, & tho they may as yet be far from seeing as we do, yet in time, they would be wrought upon & many would flock to us as doves to the Ark – and truth would flourish even now as in Ancient times. – But Alas for the want of this how poor & dwarfish have we become – many of the pillars instead of standing as correct way marks, have become stumbling blocks to honest enquirers of the way Lion-ward
But for all this I believe there is great encoragement for the honest laborer to take fresh corage & be up & adoining, & many, in this day both within & without society appear to be seeking the true & living substance –*

Our national birthday, the 4th of July, Thursday:²³ The toasts at a Republican 4th of July banquet in Washington DC described their politician [Thomas Jefferson](#) as “the penman of the declaration of Independence” and noted that it was their candidate’s “hand that drew the declaration of Independence.” The [National Intelligencer](#)’s lowercasing of this word “declaration” (on July 6th and then again on July 16th) suggests that the task of inscribing the words on the face of the document itself was being regarded as separate from the creation of the revolutionary idea of national autonomy, was being regarded as a clerical honor rather than as a full authorship.

Meanwhile, however, in Boston, Ebenezer French, at a gathering of “Young Democratic Republicans,” was praising President Jefferson as “the immortal author of the DECLARATION OF AMERICAN INDEPENDENCE.” French was granting to this politician far more than scribal status and also was reifying the [Declaration of Independence](#) document Jefferson allegedly had authored by conflating it with the achievement of American autonomy. He was coming perilously close to averring that his politician had by a stroke of a pen won for us our Revolutionary War.²⁴

David observed that we must not fear the people but slay all that is offensive & appointed for destruction – In the afternoon we sat in silence but Alas for me my mind was poor & barran tho' favord to witness the precious life to arise for a season, then taken away again, and I left in the old condition. I took tea at D. Williams in company with E Huntington, & spent the forepart of the evening there agreeably. Then went to J Earls & joined a sweet little company of my young acquaintance – we all centered in silence & had a precious opportunity & Dear Obadiah Williams was concerned in a few words by way of testimony upon the necessity of gathering our minds unto Shilo for by it we are prepared for every good work of service.

It ended to my entire satisfaction & was comforted and thankful for the opportunity – I am led to see the precious use there is in young people's rightly gathering, & soberly conversing together – & if we do not exceed the right bound of conversation I believe we may often witness the life & savor of truth to arise among us which will unite us in the best sense & quallify us for service in the Church.

I often deplore the manner in which young people generally spend their time together, they think if they cannot enjoy mirth the happiness of one anothers company is frustrated But Alas they are mistaken for I verily believe there is more true solid & lasting happiness in one hours conversation or even silence than in ten of light airy talk.

I sometimes fear that I shall run too fast in religious concerns, & be more active in our Monthly Meeting than is required of me, & thereby wound the very cause I desire to promote. 1 day 21 of 7 M 1805, after meeting in the morning] Our meeting has been large, & to me a very favord opportunity. D. Buffum was largely in testimony to my instruction & particular satisfaction as he touched upon a subject which I believe was necessary to be revived among us, which was "That if friends did not live up to their profession & principals they were as stumbling to the sincere inquirers after truth, & that if we had but have remained faithful from the time of our first coming forth as a people, the nations of the earth would have flocked to us as the dove to the window, not finding elsewhere, rest to the sole of her foot &c." he exorted us in a lively manner to seek the one thing needful, & said what proffiteth it a man if he gain the whole world & loose his own soul..

Since dinner I have called to see an ancient friend of mine Meribeth Hall who is near the close of time in a consupraption [?] – My very spirit was touched within me while sitting silently with her, with strong desires to be ready to meet the solemn time when the flesh shall be Amaciated, & the blood flow slowly thro' the veins, & the powers of the mind reduced with age & infirmity –how solemn is the prospect be fore my mind at this time, it begets living desire that my account may be prepaid my light burning & my lamp trimmed that when I am called to meet the bridegroom I may go with readiness & not have to answer as the foolish Virgins did "Our lamps have gone out" I dont recollect ever to have been more sweetly & feelingly touched in a sick room– May it be lastingly teaching, & not as the early dew vanish with the Sun, but like the tender plant, florish & grow more strong when its genial rays are afforded. –

Went with Clark Rodman to Sam’l Thurstons & took tea where we spent the evening very agreeably – D Buffum was with us part of the time. I do sincerely love the company of such friends, & esteem it a very great favor to be conversant with them. it is a privilege which ought to be prized & profited by – I have considered how much better it would be for young friends frequently to join in the company of experienced friends, than to follow & assimilate with the giddy circles.

4 day evening 7 of 8 M 1805 / I walked to [Portsmouth](#), & lodged at Zachery Chases where I found a large company of friends who were there for the same purpose that I was – to attend the Quarterly Meeting to be held the next day. I spent the evening & next Morning very agreeably with them, & I trust to a degree of improvement. Sylvester Wikes & wife, Joseph Harris & wife, Wm Anthony & Joseph Congdon (whose father was killed by lightning at the same house at the last Yearly Meeting time) [rest of line blacked out] & several of my young acquaintances were [there]

Before meeting I walked up to Holder Almy's & spent a little time there then to meeting where we had a very favor'd time, yea truly favor'd time, tho' our friend Wm Crotch in his testimony was lead to express himself very closely to divers states, & particularly those who are at ease in Zion, & had to mourn for the church which he said was in the Wilderness, yet spoke very comfortably to many present whom he apprehended as they walked into meeting had the seal in their foreheads that they had been with Jesus. to those he administered comfort & encouragement to continue in the way of well doing, he was also concerned to address some who were not under our name that he apprehended were in the way to the kingdom, & if faithful would come forth as bright lights to the world – The youth of society he was deeply concerned for & spoke to their states reaching & humbling many of our hearts – may his Ministry be as a lasting seal on my mind is what I crave, fully believing his testimony was delivered in the dread, power & authority of truth. it resembled the Idea which I have of the testimonies of our valient & powerful friends in former days sharpe & sharper than a two edged sword

At the close of the meeting he addressed the Young people on the subject of going out of meetings & requested them not to do it without a particular, necessity, which had a good effect as I never remember to have observed less of it in a Quarterly Meeting.

In the last meeting business went on very pleasantly & solidly Obadiah Williams was appointed Clerk & Jonathon Dennis assistant

After meeting took dinner at Cousin L [Z?] Chases then came on to Middlton & visited my cousin Alice Gould & family, where I trust my visit was in some measure useful – then came homeward & met with some of my beloved acquaintances & spent the evening at D Williams.

Altho' from weakness & a degree of insensibility I have not felt the force & weight of the Meeting as at some other times, yet I can thankfully add that I have been greatly favor'd with quietness of mind, & at times thro' the corse of the day, have been reached to the very heart, all that was alive in me was quickened with desires for my lasting preservations, & my spirit has been bowed, on behalf of some of my acquaintance who is under religious exercise, & is ready to adopt the language "My soul is athurst after Thee O God" I do believe there are some who are desirous to become sanctified & purified from every defilement, & if They are but faithful to abide the refinement by fire will come forth as bright & shining ornaments in this part of the Lord's Vineyard, & may their streangth incese thro'

faithfulness, which will build them up as strong & skillfull workman – My mind been peculiarly exercised for a precious female youth of my acquaintance who does not stand within the pale of the outward Church but of latter time hath steadily attended our, first, & weekday meetings, with solid concerned countenance, & hath this day taken the pains to go from [Newport](#) to [Portsmouth](#) to attend the meeting there. May the everlasting hand & Arm of the Almighty be with her, & support her thro' every conflict is at times the Ardent breathings, & anxciuous solicitude of my spirit. Often when sitting in company with her, observing her pensive disposition my soul has been reached with unutterable sensations on her behalf, my prayer hath been Secretly & Solemnly poured fourth, that by the operation of the holy spirit in & upon her, she might come forth fair as the moon clear as the Sun, & terrible as an army with Banners Oh Gracious father be with the youth, that we may be encoraged to come up in the way of holiness & fight willingly & nobly under thy banners, enlarge us & deepen us in thy mysteries of Thy kingdom, Oh Lord prosper thy work make us useful in the world, that Zion may florish in her ancient splendor.

1 day 10 of 8 M 1805 / Wm Crotch is here & was at our meetings this day. In the Morning he expressed that it was often his lot to be discouraged in getting along, having to see & feel the low state of society in different places where [he] has been, which he had peculiarly felt in this place & was ready to adopt the language "Oh that mine eyes were a fountain of tears, that I might weep day & night for poor Zion["] he said there were a number among us who did weep for her desolation, & wished they might be strengthened, but he had been so low in his mind that he did not feel it to be his place to say much among us at this time so with a few more words expressed in divine Authority & sweetness, he sat down. In the afternoon we sat in silence, & were much discomposed by an hard thunderstorm which lasted nearly all the meeting tho' nearly all of us kept our seats many were much aggitated the more owing to the house being struck several times by lightning one young woman nearly fainted away and had to go out.

In the evening after a small walk, I went to J Earls, & staid about an hour in which time we drew into silence & Dear Obadiah spoke a few words in testimony which were truly comfortable & instructing to me. He said that just before we center'd into stillness he felt a language gently to run thro' his mind, little thinking that we should so soon be favor'd with solid quiet she the words were "Zacheus come down for this day I must be at thine house" no doubt but he received it with alacrity of mind it being an important opening to him he then intimated that it was thro' faithfulness to come down when required of us, that we are favor'd to enjoy the presence of the Master.

22 of 8 M 1805 5 day of the week/ It has been an excessive hot day, the Thermometer has stood this afternoon at 83 degrees At Meeting we had the company of Willet Hicks & wife from N York Willet was concerned in testimony. He said the divine Masters querie to his immediate followers "Children have ye any meet" had been so impressed on his mind that he was made willing to stand on his feet & express it, with the miracle of the draught of fishes. he wished us to lanch [launch] out into the deep, & let down the net on the right side of the ship, & then we should have meet & to spare, and recommended that we do not dwell in shallow waters & toil all night & take nothing as they did. his testimony was acceptable & I hope may be useful among us ... It was a good quiet meeting, & may it be remembered, by the youth who he particularly addressed...

I spent the evening at J Earls in company with about twenty persons chiefly young friends, where we center'd into stillness, & dear Willet was concerned in testimony I trust to our edification -he sweetly addressed the youth & encoraged us to persevere in the way of truth intimating that it is a day wherein we are singularly visited -during the time of silence my mind was brought to a sense of its weakness & desires were raised to be more firmly established in the living substance - but it was a time of favor to me witnessing the power of truth in my heart, which made me tremble as I sat in the chair.

A living fresh concern is now weightily on my spirit, that the holy ever blessed cause of Truth and righteousness may be exalted in the minds of the people, that they may know the Lords power to do away in them all that is unholy. It surely is a time of great trial in this Land both from within and without. It is a time of inward trial, because the harvest is great & laborers are few, & because of gainsayers of whom this land abounds; Oh for the sincere hearted burden bearers, may I be found among them, & may their hands be strengthened to do with diligence whatever they may find to do, tho' they may have to travel as in the night when fear cometh. It is a time of outward trial because of the contagion which is spreading in our Towns & Cities, especially in N York & Philadelphia & whatever may be attributed to natural causes, I do believe the Lords hand is in this, & that his judgements are sent abroad that The Inhabitation may learn righteousness. Even this town this healthful situation is not wholly exempt tho' the people have boasted of the salubrity of the air, & that contagions could not originate nor live among us, yet there are two people who have lately died of very putrid complaints called by some The Yellow Fever – & several others have been suddenly taken & are alarmingly sick...

This as well as at our other opportunities together, were seasons of very great instruction, & even enlargement to my mind. & I think young people like myself should esteem it a great favor to have the privilege of being with experienced friends at such times, as I believe if a right use is made of them, furtherance & advancement in expereince will be the result.

In the Afternoon I rode to [Portsmouth](#) with L [? I was centered in humble waiting before the Lord, & earnest breathings of Spirit was raised for my own preservation, & even the preservation of the little band there assembled. how did I humbly crave that they might be strengthened, & more faithful pillars raised up to support & do honor in the Church. It seemed as if I was ready to call on my young bretheeren & sisters to join heart & hand, & come up to the house of the Lord, the mountain of his holiness that his great & excellent name may be exalted in the Earth. 18 of 10 M 1805 / 6 day I can acknowledge that my mind is affected with a concern for my own wellfare, & a longing is witnessed for that exaltation of truth & righteousness, that men & women may no longer follow fables of mans device, but cleave to the inward teacher which teacheth in secret as never man taught in public. I have been persuaded this day that there was hardly ever a time when Preast craft more generally & hurtfully prevailed, or more of the Babylonish form of religion among men, for they will come forth under some impressions of religion, & the Ministers of the day will hear that such & such are under conviction as they call it, & will run to persuade them to adopt their doctrine, drownd. confuse & affright them with terror. & after a time they lead the poor things into the Water, so after they are baptized they think, they are members of Churches, & the workd is compleat. & thus by being in haste to get relief from their first excess[?] which is but the beginning of the furnace they fall short of that holy refinement which they might have attained too by patiently in during the cross for a season. But alas alas my Soul has this day mourned over those poor concerned creatures, & if they would but patiently wait as it were at Jerusalem until endued with power from on high they would come forth with renewed lusture, & even exceed their teachers for money & be brought to see that their preaching is an offence & a perversion of the ways of the Almighty, & their prayers instead of assending in sweet incence before the throne of Grace, is a stink in his nostrils, & their doctined tho' cloaked & painted like religion, yet they blaspheme the Great & holy name of the Lord.

While I was drinking tea this afternoon all that is alive within me was moved at hearing that My brother James was taken by the press gang when in Liverpool & kept by them all night, he was taken by his collar & dragged from the house in a very trying manner & what took particular hold of my feelings was that when they were carrying him away the woman with whom he boarded very affectionately told him that she would send him some breakfast in the morning, & as he was going thro' the streets, a young woman acquaintance of his landladys daughter with who he had become some acquainted, ran out as he passd by where she lived. & in a very affecting manner & seeing him in distress said to him, "James May God keep thee & preserve thee James." December 23, Monday, 6PM: [Joseph Smith, Jr.](#) was born in Sharon, Vermont, 5th child of Lucy Mack and Joseph Smith, Sr. He would grow up to be a religious influence, like another newborn baby of that year, [Frederic Henry Hedge](#) of Cambridge, Massachusetts, but unlike Hedge would not be a seer on the model of Maimonides. He would be six feet tall and would work in the mode of Elijah or Moses, or perhaps Geller, and would marry at least 49 women.

Harold Bloom, in his 1992 treatise on the American Religion and on the emergence of the US as a post-Christian nation *THE AMERICAN RELIGION: THE EMERGENCE OF THE POST-CHRISTIAN NATION* (NY: Simon & Schuster), refers to [Waldo Emerson](#)'s sharing with Joseph in the creation of our unholy, fatuous faith in our American selves:

Ralph Waldo Emerson, visiting Mormon country in Salt Lake City in 1871, dismissed the Latter-day Saints as "an after-clap of Puritanism." Born just two years before the Mormon prophet Joseph Smith, Emerson survived his fellow New Englander by some thirty-eight years. As contemporaries, they possessed nothing in common, and scarcely could have been further apart in moral character, personality, social class, education, intellectual sophistication, indeed in intellect itself. Their largest difference is an immemorial one: between sage and prophet. Emerson, sage of Concord, remains our national oracle of cultural wisdom. Smith, prophet of Kirtland and Nauvoo, remains the religion-making founder of what began as a scandalous heresy and now is an eminently respectable established church, wealthy, vaguely Christian, and mostly right-wing Republican.

Had they met in their lifetimes, the Transcendental sage and the Mormon prophet could not have talked to one another. Smith's visions and prophecies were remarkably literal; the subtle Emerson, master of figurative language, knew that all visions are metaphors, and that all prophecies are rhetorical. And yet Emerson and Joseph Smith alike pioneered in creating the American Religion, the faith of and in the American self.

The [Mormon](#) prophet was just as influential as Emerson in the shaping of our new American Religion of self-

STEPHEN WANTON GOULD

FRIEND STEPHEN WANTON GOULD

worship — although, Bloom suggests, in an entirely different manner.²⁷

The largest paradox concerning the American Religion is that it is truly a biblical religion, whereas Judaism and Christianity never were that, despite all their passionate protestations.... If there is already in place any authentic version of the American Religion then, as Tolstoy surmised, it must be Mormonism, whose future as yet may prove decisive for the nation, and for more than this nation alone.

I am often concerned that the precious youth of my acquaintance may not follow after cunningly devised fables, by going to hear the false teachers of the present Age; many of whom it is often sealed on my spirit are up & down in this country who are raising sparks of their own kindling, and warming others by them which will do them no good, but rather tend to blend them to that pure inward principal which of its self well work for them, all that is necessary; without the help of Man.

Oh may I bear those seasons of favor in remembrance, & not give over the pursuit, even when things appear so dark & discouraging that no way may appear to be cast up for our escape from the enemy, on how or from where help may be derived. for many times has a way been made when none has appeared, & the fountain unsealed when to all human appearances none could unseal it, & the waters thereof have refreshed my mind when weary & ready to faint for which I desire to be humbly thankful & render praise where it is alone due This Afternoon my dear friend Clarke Rodman called to see me, we had a very precious time together his counsel & excellent

All that was alive within me often of late has been moved & drawn into mental & even vocal earnest prayer that they may yet come to know a being cleansed from all uncleanness, come forth with brightness, & as ornaments to the Church, but Oh how few there are that there are is much to be expected from. was favor'd to discharge my duty as far as I can feel (as yet pretty much to my own release & satisfaction) It was a memorable season which I hope not to forget, the individual was much tendered, even to tears by what I found to say, I desire not to attribute any thing to my own works, but what ever is done thro' me may be ascribed unto him who fits & quallifies for every work & service.

This afternoon went to Narragansett, & on passing both ferrys there was not a man on board (except myself) but was the worse for liquor; it occasioned a search in my mind, & I was ready to thank God that I was not like them... In crossing the Narragansett ferry there was a young woman on board whose innocent countenance took my attention tho' I did not speak to her while in the boat – when we got over it was quite dark & late in the evening & the poor thing told me she had to walk some distance before she could get to her lodgings which gave me some concern for her – She went on a little distance & returned to the ferry house affrighted which put me upon noticing her a little further, as he looked reputable & dressed something like a friend, there being many lodgers previously engaged at the ferry house she could not stay there, & a man on horse back offer'd to take her along but he appearing to be intoxicated she prudently declined, so I seeing her in a great streight, offer'd to go with her to the next house, about half a miles distance. & as we walked our conversation turned on religious subjects – she appear' to be one who was desirous to walk in the right way, & had, as she expressed been almost bewitched by the Newlites in Narragansett but had lately lived with a friend & had contracted a love for them & their ways, tho never fully conform'd to any of them, but was convinced of their ways of worship. Her mentioning the effect the Newlites had upon her mind led me into some expression – I answer'd to her that the effect they had upon her was the workings of her passions & that true religion was found in the silence of all flesh, therfor She must not depend on them for much of their preaching & praying was but a mear form of words with out the true life & power, & then appealed to her judgement if she had not often been burdened with it & found them as empty vessels, to which she very feelingly reply'd "O yes I have found them so" She appear'd to be very tender & I was glad it fell in my way to converse with her, often having to feel much on the account of those who are in a seeking state & feel the power of truth to strive in them but have not arrived to a state, clearly to know what it is that thus affects them. My mind was humbled & brought into desires for her advancement & establishment

After finishing my business at Narragansett came home the next day, & it was remarkable that in both going & coming there was some on board the ferry boats that were the worse for liquor. it is really cause of mourning to see what destruction there is among mankind, by spirituous liquor.

A total [eclipse](#) of the sun was visible from San Diego, California to New-York. In the Indiana Territory, the Shawnee prophet Tenskwatawa accurately predicted this eclipse. As a result of observing this eclipse from Kinderhook, New York, José Joaquin de Ferrer came up with the name “corona” to designate the faint outer glowing atmosphere of the sun visible only during such a total occultation. On Boston Neck the grazing cattle began their evening walk home at noon as the eclipse blackened the cloudless sky. Observing this phenomenon, [William Cranch Bond](#) determined to become an astronomer. In the garden behind his home on Chestnut Street³⁰ in Salem sat Nathaniel Bowditch with a [telescope](#), and a lantern by which to consult his watch.

SKY EVENT

HARVARD OBSERVATORY

Many years later, a description of this event belatedly recollected by [James Fenimore Cooper](#) in about the year 1831 would belatedly appear in 1869 in [Putnam’s Monthly Magazine](#) (Volume 21, pages 352-359):

THE ECLIPSE. FROM AN UNPUBLISHED MS. OF JAMES FENIMORE COOPER.

Note by the Editor.— During Mr. Cooper’s residence at Paris, he wrote, at the request of an English friend, his recollections of the great eclipse of 1806. This article, which is undated, must have been written about the year 1831, or twenty-five years after the eclipse. His memory was at that period of his life very clear and tenacious, where events of importance were concerned. From some accidental cause, this article was never sent to England, but lay, apparently forgotten, among Mr. Cooper’s papers, where it was found after his death. At the date of the eclipse, the writer was a young sailor of seventeen, just returned from a cruise. At the time of writing these recollections, he had been absent from his old home in Otsego County some fifteen years, and his affectionate remembrance of the ground may be traced in many little touches, which would very possibly have been omitted under other circumstances. S.F.C.

THE eclipse of the sun, which you have requested me to describe, occurred in the summer of 1806, on Monday, the 16th of June. Its greatest depth of shadow fell upon the American continent, somewhere about the latitude of 42 deg. I was then on a visit to my parents, at the home of my family, among the Highlands of Otsego, in that part of the country where the eclipse was most impressive. My recollections of the great event, and the incidents of the day, are as vivid as if they had occurred but yesterday. Lake Otsego, the headwaters of the Susquehanna, lies

as nearly as possible in latitude 42 deg. The village, which is the home of my family, is beautifully situated at the foot of the lake, in a valley lying between two nearly parallel ranges of heights, quite mountainous in character. The Susquehanna, a clear and rapid stream, flowing from the southeastern shore of the lake, is crossed by a high wooden bridge, which divides the main street of the little town from the lawns and meadows on the eastern bank of the river. Here were all the materials that could be desired, lake, river, mountain, wood, and the dwellings of man, to give full effect to the varied movement of light and shadow through that impressive day. Throughout the belt of country to be darkened by the eclipse, the whole population were in a state of almost anxious expectation for weeks before the event. On the eve of the 16th of June, our family circle could think or talk of little else. I had then a father and four brothers living, and as we paced the broad hall of the house, or sat about the family board, our conversation turned almost entirely upon the movements of planets and comets, occultations and eclipses. We were all exulting in the feeling that a grand and extraordinary spectacle awaited us – a spectacle which millions then living could never behold. There may have been a tinge of selfishness in the feeling that we were thus favored beyond others, and yet, I think, the emotion was too intellectual in its character to have been altogether unworthy. Many were the prophecies regarding the weather, the hopes and fears expressed by different individuals, on this important point, as evening drew near. A passing cloud might veil the grand vision from our sight; rain or mist would sadly impair the sublimity of the hour. I was not myself among the desponding. The great barometer in the hall – one of the very few then found in the State, west of Albany – was carefully consulted. It was propitious. It gave promise of dry weather. Our last looks that night, before sleep fell on us, were turned toward the starlit heavens. And the first movement in the morning was to the open window – again to examine the sky. When I rose from my bed, in the early morning, I found the heavens serene, and cloudless. Day had dawned, but the shadows of night were still lingering over the valley. For a moment, my eye rested on the familiar view – the limpid lake, with its setting of luxuriant woods and farms, its graceful bay and varied points, the hills where every cliff and cave and glen had been trodden a thousand times by my boyish feet – all this was dear to me as the face of a friend. And it appeared as if the landscape, then lovely in summer beauty, were about to assume something of dignity hitherto unknown – were not the shadows of a grand eclipse to fall upon every wave and branch within a few hours! There was one object in the landscape which a stranger would probably have overlooked, or might perhaps have called unsightly, but it was familiar to every eye in the village, and endowed by our people with the honors of an ancient landmark – the tall gray trunk of a dead and branchless pine, which had been standing on the crest of the eastern hill, at the time of the foundation of the

village, and which was still erect, though rocked since then by a thousand storms. To my childish fancy, it had seemed an imaginary flag-staff, or, in rustic parlance, the "liberty pole" of some former generation; but now, as I traced the familiar line of the tall trunk, in its peculiar shade of silvery gray, it became to the eye of the young sailor the mast of some phantom ship. I remember greeting it with a smile, as this was the first glance of recognition given to the old ruin of the forest since my return. But an object of far higher interest suddenly attracted my eye. I discovered a star – a solitary star – twinkling dimly in a sky which had now changed its hue to a pale grayish twilight, while vivid touches of coloring were beginning to flush the eastern sky. There was absolutely no other object visible in the heavens – cloud there was none, not even the lightest vapor. That lonely star excited a vivid interest in my mind. I continued at the window gazing, and losing myself in a sort of day-dream. That star was a heavenly body, it was known to be a planet, and my mind was filling itself with images of planets and suns. My brain was confusing itself with vague ideas of magnitude and distance, and of the time required by light to pierce the apparently illimitable void that lay between us – of the beings who might inhabit an orb like that, with life, feeling, spirit, and aspirations like my own. Soon the sun himself rose into view. I caught a glimpse of fiery light glowing among the branches of the forest, on the eastern mountain. I watched, as I had done a hundred times before, the flushing of the skies, the gradual illuminations of the different hills, crowned with an undulating and ragged outline of pines, nearly two hundred feet in height, the golden light gliding silently down the breast of the western mountains, and opening clearer views of grove and field, until lake, valley, and village lay smiling in one cheerful glow of warm sunshine. Our family party assembled early. We were soon joined by friends and connections, all eager and excited, and each provided with a colored glass for the occasion. By nine o'clock the cool air, which is peculiar to the summer nights in the Highlands, had left us, and the heat of midsummer filled the valley. The heavens were still absolutely cloudless, and a more brilliant day never shone in our own bright climate. There was not a breath of air, and we could see the rays of heat quivering here and there on the smooth surface of the lake. There was every appearance of a hot and sultry noontide. We left the house, and passed beyond the grounds into the broad and grassy street which lay between the gates and the lake. Here there were no overhanging branches to obstruct the view; the heavens, the wooded mountains, and the limpid sheet of water before us, were all distinctly seen. As the hour for the eclipse drew near, our eagerness and excitement increased to an almost boyish impatience. The elders of the party were discussing the details of some previous eclipse: leaving them to revive their recollections, I strolled away, glass in hand, through the principal streets of the village. Scarce a dwelling, or a face, in the little town, that was not

familiar to me, and it gave additional zest to the pleasure of a holiday at home, to meet one's townsfolk under the excitement of an approaching eclipse. As yet there was no great agitation, although things wore a rather unusual aspect for the busy hours of a summer's day. Many were busy with their usual tasks, women and children were coming and going with pails of water, the broom and the needle were not yet laid aside, the blacksmith's hammer and the carpenter's plane were heard in passing their shops. Loaded teams, and travellers in waggons, were moving through the streets; the usual quiet traffic at the village counters had not yet ceased. A farm-waggon, heavily laden with hay, was just crossing the bridge, coming in from the fields, the driver looking drowsy with sleep, wholly unconscious of the movement in the heavens. The good people in general, however, were on the alert; at every house some one seemed to be watching, and many groups were passed, whose eager up-turned faces and excited conversation spoke the liveliest interest. It was said, that there were not wanting one or two philosophers of the skeptical school, among our people, who did not choose to commit themselves to the belief in a total eclipse of the sun – simply because they had never seen one. Seeing is believing, we are told, though the axiom admits of dispute. But what these worthy neighbors of ours had not seen, no powers of reasoning, or fulness of evidence, could induce them to credit. Here was the dignity of human reason! Here was private judgment taking a high stand! Anxious to witness the conversion of one of these worthies, with boyish love of fun I went in quest of him. He had left the village, however, on business. But, true to his principles, before mounting his horse that morning, he had declared to his wife that "he was not running away from that eclipse;" nay, more, with noble candor, he averred that if the eclipse did overtake him, in the course of his day's journey, "he would not be above acknowledging it!" This was highly encouraging. I had scarcely returned to the family party, left on the watch, when one of my brothers, more vigilant, or with clearer sight than his companions, exclaimed that he clearly saw a dark line, drawn on the western margin of the sun's disc! All faces were instantly turned upwards, and through the glasses we could indeed now see a dusky, but distinct object, darkening the sun's light. An exclamation of delight, almost triumphant, burst involuntarily from the lips of all. We were not to be disappointed, no cloud was there to veil the grand spectacle; the vision, almost unearthly in its sublime dignity, was about to be revealed to us. In an incredibly short time, the oval formation of the moon was discerned. Another joyous burst of delight followed, as one after another declared that he beheld with distinctness the dark oval outline, drawn against the flood of golden light. Gradually, and at first quite imperceptibly to our sight, that dark and mysterious sphere gained upon the light, while a feeling of watchful stillness, verging upon reverence, fell upon our excited spirits. As yet there was no change perceptible in the sunlight falling upon lake and

mountain; the familiar scene wore its usual smiling aspect, bright and glowing as on other days of June. The people, however, were now crowding into the streets – their usual labors were abandoned – forgotten for the moment – and all faces were turned upward. So little, however, was the change in the power of the light, that to a careless observer it seemed more the gaze of faith, than positive perception, which turned the faces of all upward. Gradually a fifth, and even a fourth, of the sun's disc became obscured, and still the unguarded eye could not endure the flood of light – it was only with the colored glass that we could note the progress of the phenomenon. The noon-day heat, however, began to lessen, and something of the coolness of early morning returned to the valley. I was looking upward, intently watching for the first moment where the dark outline of the moon should be visible to the naked eye, when an acquaintance passed. "Come with me!" he said quietly, at the same moment drawing his arm within my own, and leading me away. He was a man of few words, and there was an expression in his face which induced me to accompany him without hesitation. He led me to the Court House, and from thence into an adjoining building, and into a room then occupied by two persons. At a window, looking upward at the heavens, stood a figure which instantly riveted my attention. It was a man with haggard face, and fettered arms, a prisoner under sentence of death. By his side was the jailor. A painful tragedy had been recently enacted in our little town. The schoolmaster of a small hamlet in the county had beaten a child under his charge very severely – and for a very trifling error. The sufferer was a little girl, his own niece, and it was said that natural infirmity had prevented the child from clearly pronouncing certain words which her teacher required her to utter distinctly. To conquer what he considered the obstinacy of the child, this man continued to beat her so severely that she never recovered from the effects of the blows, and died some days after. The wretched man was arrested, tried for murder, condemned, and sentenced to the gallows. This was the first capital offence in Otsego County. It produced a very deep impression. The general character of the schoolmaster had been, until that evil hour, very good, in every way. He was deeply, and beyond all doubt unfeignedly, penitent for the crime into which he had been led, more, apparently, from false ideas of duty, than from natural severity of temper. He had been entirely unaware of the great physical injury he was doing the child. So great was his contrition, that public sympathy had been awakened in his behalf, and powerful petitions had been sent to the Governor of the State, in order to obtain a respite, if not a pardon. But the day named by the judge arrived without a return of the courier. The Governor was at his country-house, at least eighty miles beyond Albany. The petition had been kept to the last moment, for additional signatures, and the eighty miles to be travelled by the courier, after reaching Albany, had not been included in the calculation. No despatch was received, and there was every appearance that there would be no reprieve. The day

arrived — throngs of people from Chenango, and Unadilla, and from the valley of the Mohawk, poured into the village, to witness the painful, and as yet unknown, spectacle of a public execution. In looking down, from an elevated position, upon the principal street of the village that day, it had seemed to me paved with human faces. The hour struck, the prisoner was taken from the jail, and, seated, as is usual, on his coffin, was carried to the place of execution, placed between two ministers of the gospel. His look of utter misery was beyond description. I have seen other offenders expiate for their crimes with life, but never have I beheld such agony, such a clinging to life, such mental horror at the nearness of death, as was betrayed by this miserable man. When he approached the gallows, he rose from his seat, and wringing his fettered hands, turned his back upon the fearful object, as if the view were too frightful for endurance. The ministers of the gospel succeeded at length in restoring him to a decent degree of composure. The last prayer was offered, and his own fervent "Amen!" was still sounding, hoarse, beseeching, and almost despairing, in the ears of the crowd, when the respite made its tardy appearance. A short reprieve was granted, and the prisoner was carried back to the miserable cell from which he had been drawn in the morning. Such was the wretched man who had been brought from his dungeon that morning, to behold the grand phenomenon of the eclipse. During the twelve-month previous, he had seen the sun but once. The prisons of those days were literally dungeons, cut off from the light of day. That striking figure, the very picture of utter misery, his emotion, his wretchedness, I can never forget. I can see him now, standing at the window, pallid and emaciated by a year's confinement, stricken with grief, his cheeks furrowed with constant weeping, his whole frame attesting the deep and ravaging influences of conscious guilt and remorse. Here was a man drawn from the depths of human misery, to be immediately confronted with the grandest natural exhibition in which the Creator deigns to reveal his Omnipotence to our race. The wretched criminal, a murderer in fact, though not in intention, seemed to gaze upward at the awful spectacle, with an intentness and a distinctness of mental vision far beyond our own, and purchased by an agony scarcely less bitter than death. It seemed as if, for him, the curtain which veils the world beyond the grave, had been lifted. He stood immovable as a statue, with uplifted and manacled arms and clasped hands, the very image of impotent misery and wretchedness. Perhaps human invention could not have conceived of a more powerful moral accessory, to heighten the effect of the sublime movement of the heavenly bodies, than this spectacle of penitent human guilt afforded. It was an incident to stamp on the memory for life. It was a lesson not lost on me. When I left the Court House, a sombre, yellowish, unnatural coloring was shed over the country. A great change had taken place. The trees on the distant heights had lost their verdure and their airy character; they were taking the outline of dark pictures graven upon an unfamiliar sky. The

lake wore a lurid aspect, very unusual. All living creatures seemed thrown into a state of agitation. The birds were fluttering to and fro, in great excitement; they seemed to mistrust that this was not the gradual approach of evening, and were undecided in their movements. Even the dogs – honest creatures – became uneasy, and drew closer to their masters. The eager, joyous look of interest and curiosity, which earlier in the morning had appeared in almost every countenance, was now changed to an expression of wonder or anxiety or thoughtfulness, according to the individual character. Every house now gave up its tenants. As the light failed more and more with every passing second, the children came flocking about their mothers in terror. The women themselves were looking about uneasily for their husbands. The American wife is more apt than any other to turn with affectionate confidence to the stronger arm for support. The men were very generally silent and grave. Many a laborer left his employment to be near his wife and children, as the dimness and darkness increased. I once more took my position beside my father and my brothers, before the gates of our own grounds. The sun lay a little obliquely to the south and east, in the most favorable position possible for observation. I remember to have examined, in vain, the whole dusky canopy in search of a single cloud. It was one of those entirely unclouded days, less rare in America than in Europe. The steadily waning light, the gradual approach of darkness, became the more impressive as we observed this absolutely transparent state of the heavens. The birds, which a quarter of an hour earlier had been fluttering about in great agitation, seemed now convinced that night was at hand. Swallows were dimly seen dropping into the chimneys, the martins returned to their little boxes, the pigeons flew home to their dove-cots, and through the open door of a small barn we saw the fowls going to roost. The usual flood of sunlight had now become so much weakened, that we could look upward long, and steadily, without the least pain. The sun appeared like a young moon of three or four days old, though of course with a larger and more brilliant crescent. Looking westward a moment, a spark appeared to glitter before my eye. For a second I believed it to be an optical illusion, but in another instant I saw it plainly to be a star. One after another they came into view, more rapidly than in the evening twilight, until perhaps fifty stars appeared to us, in a broad, dark zone of the heavens, crowning the pines on the western mountain. This wonderful vision of the stars, during the noontide hours of day, filled the spirit with singular sensations. Suddenly one of my brothers shouted aloud, "The moon!" Quicker than thought, my eye turned eastward again, and there floated the moon, distinctly apparent, to a degree that was almost fearful. The spherical form, the character, the dignity, the substance of the planet, were clearly revealed as I have never beheld them before, or since. It looked grand, dark, majestic, and mighty, as it thus proved its power to rob us entirely of the sun's rays. We are all but larger children. In daily life we judge of objects by

their outward aspect. We are accustomed to think of the sun, and also of the moon, as sources of light, as etherial, almost spiritual, in their essence. But the positive material nature of the moon was now revealed to our senses, with a force of conviction, a clearness of perception, that changed all our usual ideas in connection with the planet. This was no interposition of vapor, no deceptive play of shadow; but a vast mass of obvious matter had interposed between the sun above us and the earth on which we stood. The passage of two ships at sea, sailing on opposite courses, is scarcely more obvious than this movement of one world before another. Darkness like that of early night now fell upon the village. My thoughts turned to the sea. A sailor at heart, already familiar with the face of the ocean, I seemed, in mental vision, to behold the grandeur of that vast pall of supernatural shadow falling suddenly upon the sea, during the brightest hour of the day. The play of light and shade upon the billows, always full of interest, must at that hour have been indeed sublime. And my fancy was busy with pictures of white-sailed schooners, and brigs, and ships, gliding like winged spirits over the darkened waves. I was recalled by a familiar and insignificant incident, the dull tramp of hoofs on the village bridge. A few cows, believing that night had overtaken them, were coming homeward from the wild open pastures about the village. And no wonder the kindly creatures were deceived, the darkness was now much deeper than the twilight which usually turns their faces homeward; the dew was falling perceptibly, as much so as at any hour of the previous night, and the coolness was so great that the thermometer must have fallen many degrees from the great heat of the morning. The lake, the hills, and the buildings of the little town were swallowed up in the darkness. The absence of the usual lights in the dwellings rendered the obscurity still more impressive. All labor had ceased, and the hushed voices of the people only broke the absolute stillness by subdued whispering tones. "Hist! The whippoorwill!" whispered a friend near me; and at the same moment, as we listened in profound silence, we distinctly heard from the eastern bank of the river the wild, plaintive note of that solitary bird of night, slowly repeated at intervals. The song of the summer birds, so full in June, had entirely ceased for the last half hour. A bat came flitting about our heads. Many stars were now visible, though not in sufficient number to lessen the darkness. At one point only in the far distant northern horizon, something of the brightness of dawn appeared to linger. At twelve minutes past eleven, the moon stood revealed in its greatest distinctness — a vast black orb, so nearly obscuring the sun that the face of the great luminary was entirely and absolutely darkened, though a corona of rays of light appeared beyond. The gloom of night was upon us. A breathless intensity of interest was felt by all. There would appear to be something instinctive in the feeling with which man gazes at all phenomena in the heavens. The peaceful rainbow, the heavy clouds of a great storm, the vivid

flash of electricity, the falling meteor, the beautiful lights of the aurora borealis, fickle as the play of fancy, – these never fail to fix the attention with something of a peculiar feeling, different in character from that with which we observe any spectacle on the earth. Connected with all grand movements in the skies there seems an instinctive sense of inquiry, of anxious expectation; akin to awe, which may possibly be traced to the echoes of grand Christian prophecies, whispering to our spirits, and endowing the physical sight with some mysterious mental prescience. In looking back to that impressive hour, such now seem to me the feelings of the youth making one of that family group, all apparently impressed with a sensation of the deepest awe – I speak with certainty – a clearer view than I had ever yet had of the majesty of the Almighty, accompanied with a humiliating, and, I trust, a profitable sense of my own utter insignificance. That movement of the moon, that sublime voyage of the worlds, often recurs to my imagination, and even at this distant day, as distinctly, as majestically, and nearly as fearfully, as it was then beheld. A group of silent, dusky forms stood near me; one emotion appeared to govern all. My father stood immovable, some fifteen feet from me, but I could not discern his features. Three minutes of darkness, all but absolute, elapsed. They appeared strangely lengthened by the intensity of feeling and the flood of overpowering thought which filled the mind. Thus far the sensation created by this majestic spectacle had been one of humiliation and awe. It seemed as if the great Father of the Universe had visibly, and almost palpably, veiled his face in wrath. But, appalling as the withdrawal of light had been, most glorious, most sublime, was its restoration! The corona of light above the moon became suddenly brighter, the heavens beyond were illuminated, the stars retired, and light began to play along the ridges of the distant mountains. And then a flood of grateful, cheering, consoling brightness fell into the valley, with a sweetness and a power inconceivable to the mind, unless the eye has actually beheld it. I can liken this sudden, joyous return of light, after the eclipse, to nothing of the kind that is familiarly known. It was certainly nearest to the change produced by the swift passage of the shadow of a very dark cloud, but it was the effect of this instantaneous transition, multiplied more than a thousand fold. It seemed to speak directly to our spirits, with full assurance of protection, of gracious mercy, and of that Divine love which has produced all the glorious combinations of matter for our enjoyment. It was not in the least like the gradual dawning of day, or the actual rising of the sun. There was no gradation in the change. It was sudden, amazing, like what the imagination would teach us to expect of the advent of a heavenly vision. I know that philosophically I am wrong; but, to me, it seemed that the rays might actually be seen flowing through the darkness in torrents, till they had again illuminated the forest, the mountains, the valley, and the lake with their glowing, genial touch. There was another grand

FRIEND STEPHEN WANTON GOULD

STEPHEN WANTON GOULD

GO TO MASTER HISTORY OF QUAKERISM

movement, as the crescent of the sun reappeared, and the moon was actually seen steering her course through the void. Venus was still shining brilliantly. This second passage of the moon lasted but a moment, to the naked eye. As it ceased, my eye fell again on the scene around me. The street, now as distinctly seen as ever, was filled with the population of the village. Along the line of road stretching for a mile from the valley, against the side of the mountain, were twenty waggons bearing travellers, or teams from among the hills. All had stopped on their course, impelled, apparently, by unconscious reverence, as much as by curiosity, while every face was turned toward heaven, and every eye drank in the majesty of the sight. Women stood in the open street, near me, with streaming eyes and clasped hands, and sobs were audible in different directions. Even the educated and reflecting men at my side continued silent in thought. Several minutes passed, before the profound impressions of the spectacle allowed of speech. At such a moment the spirit of man bows in humility before his Maker. The changes of the unwonted light, through whose gradations the full brilliancy of the day was restored, must have been very similar to those by which it had been lost, but they were little noted. I remember, however, marking the instant when I could first distinguish the blades of grass at my feet – and later again watching the shadows of the leaves on the gravel walk. The white lilies in my mother's flower-garden were observed by others among the first objects of the vegetation which could be distinguished from the windows of the house. Every living creature was soon rejoicing again in the blessed restoration of light after that frightful moment of a night at noon-day. Men who witness any extraordinary spectacle together, are apt, in after-times, to find a pleasure in conversing on its impressions. But I do not remember to have ever heard a single being freely communicative on the subject of his individual feelings at the most solemn moment of the eclipse. It would seem as if sensations were aroused too closely connected with the constitution of the spirit to be irreverently and familiarly discussed. I shall only say that I have passed a varied and eventful life, that it has been my fortune to see earth, heavens, ocean, and man in most of their aspects; but never have I beheld any spectacle which so plainly manifested the majesty of the Creator, or so forcibly taught the lesson of humility to man as a total eclipse of the sun.

When quite young, there was a total eclipse of the sun in June. That event made a deep impression on me. I heard much about it for weeks beforehand. I knew not what it was to be like, except that it was to be dark about mid-day. I was hoeing Indian corn, with two older brothers. They sent me off on an errand, and as I passed to the place, I could see the woods becoming dingy. I started to return, and by this time, birds and beasts began to be in extraordinary excitement, rushing to the roost and the lair. The woods became dark and gloomy. I was in the midst, and night seemed to drop down upon the scene in the midst of daylight. The forest had the same gloomy appearance which it had at night. The sun had an appearance I never saw before; it seemed to be in a process of going out, till, for a moment, it was all gone. I knew where I was, and the way out of the wood, and what was the matter, and had no fear. I stood still in the woods, and contemplated the scene with wonder. It soon passed, and I went on my way; but an awe was on my spirit long afterwards, whenever I saw the heavens by day or night.

The Reverend had accumulated a very numerous and curious library, with an immense mass of manuscript collections for the augmentation of his work on folklore. The 1st part, consisting 8,611 articles or lots of printed books exclusive of 243 lots of manuscripts, would be sold by a bookseller, Mr. Stewart, during May 1807. The 2d part, containing 4,054 articles of duplicates and pamphlets, would be sold during February 1808. Much of this material would wind up in the hands of Mr. (afterwards Sir) Henry Ellis, who would incorporate them into a new edition entitled OBSERVATIONS ON POPULAR ANTIQUITIES: CHIEFLY ILLUSTRATING THE ORIGIN OF OUR VULGAR CUSTOMS, CEREMONIES, AND SUPERSTITIONS and published at London in two volumes in 1813. 3 day evening 14 of 10 M / For sometime past my mind has been in such a situation that I have hardly known how to describe it. Sometimes in a very dry barren state not a capacity to think a good thought, nor authority to speak a good word, which I am sensible is the result of sin. & when favor'd to draw nearer the fountain of divine help & feel the precious light & life to arise in my mind, then my unworthiness stares me in the face & I am ready to blush that I have not attained to a greater degree of knowledge in divine truth, for I see that I have missed of much good which was intended for me by neglecting or not submitting to bear the cross in younger years but to my great consolation there are seasons when I am favor'd to feel that infinite mercy & goodness is yet extended & that on the grounds of obedience I may yet be advanced to a greater degree of religious experience. I felt this morning entirely destitute of every good qualification not even power to raise a sigh – but the latter part of the Afternoon & evening I can hardly vent them fast enough. My spirit is led to pray for mercy & forgiveness, ability to do good & strength to retain my ground for I clearly see that there is no true help but that which cometh from the Lord who giveth all that is necessary for us – Oh that I may be preserved in humble thankfulness to to him the Author of every good for the many favors which he is pleased to bestow on me a poor unworthy worm.

Authority & clear prophetic discernment of the state of the people should be left miserably to end his own existence, but it is as clear a proof of the weakness of human nature, & that without our continued watchful care we are ever in danger of falling victim to the wicked deceiver of men, the higher we rise the lower we have to fall (if we do fall)

Notwithstanding there are many distressing occurrences which have recently happened concerning this poor man which may induce some to question whether he was ever anything more than an imposter, yet it is quite different with me, for I have too often seen & felt the Baptizing effect of his Ministry in myself & others to admit a doubt of this, but am rather persuaded that we may be highly favor'd & at the same time have many weaknesses which are not overcome which suppose to be his case

I am at this time firm in the faith that the Truth is great & Powerful & that there is no deception in it, & as its power is abode under it will clearly discover to the understanding what we should do & what we should leave undone...— Oh that all that is within me bow & surrender to its holy guidance.

March 3, Tuesday: A British fleet again forced the Dardanelles, hoping to intimidate Turkey into the war. The Turks, their defenses newly strengthened, sank two British ships killing 600 seamen.

Article I of [the Constitution](#) had granted the new federal government a power to “suppress insurrections.” A federal legislative act of May 2, 1792 had implemented this by authorizing the President to use the militia to suppress insurrections upon notification by a federal associate justice or district judge that the execution of the laws was impeded by combinations too powerful to be suppressed by the ordinary course of judicial proceedings. Then an act of February 28, 1795 had enlarged this by authorizing the President, on application of the legislature of a state, or of that state’s Governor if the legislature could not be convened, to call forth the militia of other states to suppress an insurrection against the government of that state. On this day the federal legislature finalized the Insurrection Act of 1807, laying down the procedures by which the federal Administrative branch might federalize local law enforcement in order to suppress an insurrection: first the President was to order the “insurgents to disperse” — then if this did not happen, whatever force the armed agents of the federal power needed to apply would be legitimated. The federal military could considered itself

March 25, Wednesday: Although in 1805 the British House of Commons had passed a bill that made it unlawful for a British subject to capture and transport [slaves](#), that measure had been blocked by the House of Lords. In February 1806, Lord Grenville had formed a Whig administration. He and Charles Fox, his Foreign Secretary, were opponents of the [slave-trade](#). Fox and [William Wilberforce](#) led the campaign in the House of Commons for a new Abolition of the Slave Trade bill, while Grenville was leading that campaign in the House of Lords. Grenville criticized his fellow Lords for "not having abolished the trade long ago," offered that it was a practice "contrary to the principles of justice, humanity and sound policy." The vote in the House of Lords carried by 41 votes over 20. The vote in the House of Commons carried by 114 votes over 15, and the international trade in slaves was outlawed as of March 1, 1808 by "An Act for the Abolition of the Slave Trade" (STATUTE 47 GEORGE III., 1st session, Chapter 36). British captains caught continuing the trade would

[HDT](#)[WHAT?](#)[INDEX](#)**STEPHEN WANTON GOULD****FRIEND STEPHEN WANTON GOULD****GO TO MASTER HISTORY OF QUAKERISM**

be fined £100 for each slave found on board.

The Slave Trade Act outlawing the slave trade in the British Empire immediately received royal assent. However, it would not stop the British slave trade. If slavers were in danger of being captured by the British navy, captains might reduce the fines they had to pay by having the slaves thrown off the far, hidden side of the vessel to be pulled down by the weight of their chains. Some people involved in the anti-slave trade campaign, such as Thomas Clarkson and Thomas Fowell Buxton, would begin to argue that the only way effectively to end the suffering was to make slavery itself illegal. One month later, Parliament would pass the Slavery Abolition Act that gave all slaves in the British Empire their freedom. (Note that this was occurring 16 years after the Danes had abolished their trade. Note that the US had abolished its participation in the international slave trade on March 2d. Note also that British colonial slavery would continue until 1833, and US slavery would continue until toward the close of our Civil War.)

W.E. Burghardt Du Bois: At the beginning of the nineteenth century England held 800,000 slaves in her colonies; France, 250,000; Denmark, 27,000; Spain and Portugal, 600,000; Holland, 50,000; Sweden, 600; there were also about 2,000,000 slaves in Brazil, and about 900,000 in the United States.³⁴ This was the powerful basis of the demand for the slave-trade; and against the economic forces which these four and a half millions of enforced laborers represented, the battle for freedom had to be fought.

Denmark first responded to the denunciatory cries of the eighteenth century against slavery and the slave-trade. In 1792, by royal order, this traffic was prohibited in the Danish possessions after 1802. The principles of the French Revolution logically called for the extinction of the slave system by France. This was, however, accomplished more precipitately than the Convention anticipated; and in a whirl of enthusiasm engendered by the appearance of the Dominican deputies, slavery and the slave-trade were abolished in all French colonies

February 4, 1794.³⁵ This abolition was short-lived; for at the command of the First Consul slavery and the slave-trade was restored in An X (1799).³⁶ The trade was finally abolished by Napoleon during the Hundred Days by a decree, March 29, 1815, which briefly declared: "À dater de la publication du présent Décret, la Traite des Noirs est abolie."³⁷ The Treaty of Paris eventually confirmed this law.³⁸

In England, the united efforts of Sharpe, Clarkson, and Wilberforce early began to arouse public opinion by means of agitation and pamphlet literature. May 21, 1788, Sir William Dolben moved a bill regulating the trade, which passed in July and was the last English measure countenancing the traffic.³⁹ The report of the Privy Council on the subject in 1789⁴⁰ precipitated the long struggle. On motion of Pitt, in 1788, the House had resolved to take up at the next session the question of the abolition of the trade.⁴¹ It was, accordingly, called up by Wilberforce, and a remarkable parliamentary battle ensued, which lasted continuously until 1805. The Grenville-Fox ministry now espoused the cause. This ministry first prohibited the trade with such colonies as England had acquired by conquest during the Napoleonic wars; then, in 1806, they prohibited the foreign slave-trade; and finally, March 25, 1807, enacted the total abolition of the traffic.⁴²

A bill to prohibit the foreign slave-trade was lost in 1793, passed the next session, and was lost in the House of Lords. In 1795, 1796, 1798, and 1799 repeated attempts to abolish the trade were defeated. The matter then rested until 1804, when the battle was renewed with more success.

No day without exceptions in my conduct, but thro' mercy was favor'd in meetings with the precious influence of the good spirit which rose to an unusual height, for which I trust I was very thankful, & desired to be more & more faithful to the pointings of truth, so as to merit a continuance of heavenly favor. In the first meeting O Williams was concern'd to bear a short testimony among, & in the last several times spoke feelingly & pertinently to buisness. Tho' my mind was favor'd yet I apprehended life to be low & the Seed under Sufferings among us. Oh! the uncertainty of time & the inevitable certainty of death. How desirable is the object, to be prepared & enabled to meet with calm resignation Such an Awful Scene as is now before me, when the boody reduced by racking pain & parching fever is brought nigh unto death, then to take a retrospect of our past life & find it has not been so fully dedicated to the service, cause & honor of our God as he has required, but have rejected his tender calls to holiness from season to season, lovingly & mercifully vouchsafed in our hearts, having lived even to grey hairs in a dead & flat profession, without a lively profession of religion, & now tremblingly to stand as at the threshold of eternity deploring our past omissions in life. How dread, how Awful, how awakening to the heart. Awake Awake Oh! my soul & be thou on thy Strictest Search & Watch, "catching each ray" & obeying the smallest monition [cognition] of divine truth, that when called to resign thy clay tenement, & to appear at the tribunal of Justice & Mercy thou may feel the sweet consoling reward of peace for thy faithfulness here & an Assurance of happiness in the regions of celestial Abodes

43. The Honorable and Reverend William Herbert, as the head of the Diocese of the Manchester Cathedral of Manchester, England, has set his name down in the history books by having in 1837 given a flower a name. He designated a flower of the *Amaryllidaceae* as "*Hippeastrum*" or "Horseman's Star" — and since he was a specialist in medieval weapons this has been claimed to have been in reference to a mace-like weapon swung by horsemen during the 14th Century known as the "Morning Star" or "Holy Water Sprinkler." Here is an image of the knightly weapon in question, and of the bloom in question:

It would be my opinion that if the Reverend Herbert did actually name this bloom after this device, he must have named it thus not because of any resemblance between the flower and the weapon, but because of the resemblance between the flower and a **wound** that might result from the use of that weapon.

solemnity, Holder was concerned to make a few remarks on the excellency of a pious life, & the wretched disconsolate State of such who have lived to old age without having conform'd to the dictates of truth, being favor'd from time to time with the visitations of Gods love in their hearts, & now when on the graves edge to look back on their past omissions & commissions thro' time not to feel the enlivning hope of peace & rest in the life to come, observing "The child shall die an hundred years old, but the Sinner, being an hundred years old shall perish" he concluded by observing "that tho' our trials might be Severe & our disappointments hard to bear, yet by faithful obedience we may experience a way to be made where no way may appear & hard things rendered easy & bitter things sweet." The above remarks appear'd to reach the heart of poor old G.W who was present with us, so that after Holder left us he appeared quite contrite even unto weeping.

This afternoon a young man whose initials are J.S called in with whom I had a little conversation, & tho' it did not turn naturally on religious Subjects yet it was very pleasant. I believe him to be a young man who has retained a good degree of innocence, thro' a considerable exposure to the vices of the world We Sometimes meet with Some who, tho' they are not in membership with us, yet feel pleasant, & our hearts become drawn into nearness with each other As I believe was reciprocally the case between us. I could but contrast the difference between him & some of my other old School fellows, who in their Younger days were in a pretty good state of innocence, but since they have come to man's estate have run into the various wickednesses of the present day. My mind was not a little affected not long since at meeting a young man with whom I formerly went to School, & then was an innocent lad. he had just come on shore from a Slave Voige to the Coast of Africa, his countenance bespoke a mind exactly suited for the purpose he had been about, he looked so hardened that I could scarcely endure to look at him, & so affected my feelings that I have frequently reflected on his situation with painful sensations many times since

Dear Lydia Weeks spoke powerfully to a State present among the Youth who had Seen the way minutly Pointed out in which they should walk, & encoraged them to comply with the terms, & they would then be made to rejoice in Judah in Jerusalem - then Rowland Green encoraged us to Strive to be willing, Sincerely to say "Thy Kingdom come thy will be done" & said he apprehended however amible the disposition if we followed on to know the Lord we should be led much in the way of the Cross, & Said he had felt much for the Youth Present & concluded with encoragement to press forward & to hold ou our way - pretty soon after the conclusion of the Sitting we retired to bed, but for a Season sleep was gone & my mind was engaged in earnest desires for an increase in the root of life. I know not when I have more forcibly felt desires of this kind - took breakfast at HC & was occupied Most of the time before meeting in obtaining Subscriptions

At Meeting we had a precious current of testimonies in rotation as follows Peter Hoxie Rowland Green D Buffum J Casey. then L Weeks in supplication. Daniel Howland & John Baley. Tho' there were many public appearances Yet they all seemed to be well timed & an uncommon degree of Power attending the whole of them. in

the meeting for discipline, many pertinent & feeling remarks were made on the answers to the queries, & other business by [Moses Brown](#), J Casey, Rowland Green, Peter Hoxie, D Buffum & O Williams It is Rarely the case that the life continues so sweetly to run along with the buiness in meeting as at this – at the close of the meeting I stoped to receive Subscriptions for the friend affore mentioned, & was enabled to pay him D112.75c which in the corse of today & yesterday was given me for his releaf - after dining at N Greens, took tea at H Cookes - then called at the Widdow Mumfords where I met a precious company of Young friends, we soon drew into Silence & dear L Weeks was again concerned in a precious testimony which I know reached the hearts of Some present - -then Susanna Barker was concerned to address the Widdow in a few encoraging Senteces After which we parted, & I again Lodged at H Cooks, & took breajfast the next morning, then again embarked with our company for home & got here in about two hours & an half

May 28, Thursday: Jean Louis Rodolphe Agassiz ([Louis Agassiz](#)) was born in Motier, a village on the shore of Lake Morat, [Switzerland](#), the son of the Protestant pastor there.⁴⁵

WALDEN: The mice which haunted my house were not the common ones, which are said to have been introduced into the country, but a wild native kind (*Mus leucopus*) not found in the village. I sent one to a distinguished naturalist, and it interested him much. When I was building, one of these had its nest underneath the house, and before I had laid the second floor, and swept out the shavings, would come out regularly at lunch time and pick up the crumbs at my feet. It probably had never seen a man before; and it soon became quite familiar, and would run over my shoes and up my clothes. It could readily ascend the sides of the room by short impulses, like a squirrel, which it resembled in its motions. At length, as I leaned with my elbow on the bench one day, it ran up my clothes, and along my sleeve, and round and round the paper which held my dinner, while kept the latter close, and dodged and played at bo-peep with it; and when at last I held still a piece of cheese between my thumb and finger, it came and nibbled it, sitting in my hand, and afterward cleaned its face and paws, like a fly, and walked away.

PEOPLE OF
WALDEN

LOUIS AGASSIZ

This is the Vaudois region of Switzerland in which many followers of Pierre Waldo, Waldenses, had holed up during the Middle Ages. The Agassiz family could trace its Protestant roots back into the 13th Century in the canton of Vaud adjacent to Fribourg, and Louis's father was the 6th in an unbroken succession of pastors. –In all likelihood Louis had remote ancestors who had attempted to lead a life like that of Jesus!

Also enfor[ced] the necessity of our faithfulness in little things & said they that were faithful in the little should be made ruler over much. & at a Second Standing appeared much engaged to encourage us to the use of the plain language & simplicity in dress

The part for discipline was a season of labor some trying cases were before us, but generally appeared to end pretty well Matthew Barker & Ruth Anthony had their Answer & were at liberty to marry marry. Such a poor tool as I am was appointed with a better to oversee their Marriage Obadiah Williams & Ruth Hadwen published their intentions of the same kind. Oh that I may be favior to dwell deep in the Spirit of my mind, Surely the present low State of things require that,

45. One explanation for the unintelligibility of the popular song "Louie, Louie," in which the only words on which people have been able to agree are "Louie, Louie," is that it was written by little Jean Louis Rodolphe's papa, who spoke only an obscure Swiss dialect, to sing to him in the evenings in his cradle.

Without purchase means what it says, that Ensign John had not purchased this position for cash or received it through court influence as an English gentleman might do in this timeframe but instead was an ordinary bloke who got it awarded to him merely because of demonstrated military abilities. Since the image portrays an officer of the 30th Regiment of Foot during that timeframe, it will do very well as an illustration of our newly minted young Lieutenant of the 40th Foot named John Thoreau. In the forenoon the public laborers were, first Peter Hoxie then James Greene then Sarah Talbot then Richard Mott in an eloquent testimony of one hour & five minutes, which was very pleasing to the people, but according to my sense was not very encoraging to some who are engaged to walk in the Streight & narrow way. In the Afternoon we had but little preaching but considering the largeness of the gathering it was a very quiet time tho according to my sense less favord with the arising of the precious spring of divine life than in the morning. The public laborers were first Sarah Talbot, then Mehitible Jenkins both acceptably. Then a few words by James Greene. Then the meeting was disturbed by the talking by way of preaching by one that was not a member but was Soon Stopped by O Williams who sat near him. The meeting concluded after a lengthy supplication by Richard Jordan the latter part of which was attended with the Baptizing evidence but according to my sense the fore part of it labored & was couched in such manner that I could not comprehend it. 4 day Engaged this morning with a brother committee man in visiting the boarding houses in consequence of some misbehaviour among the young people yeasterday it was reported that some went to the Theatre & others in a Sailing party which occasions much exercise to the minds of well concernd friends -it is a lamentable circumstance that young men & women should come here under pretence of attending the Yearly Meeting & at the same time enter into acts which disgrace our Christian testimony, such had much better keep within their own meetings for instead of being a Strength & comfort to their friends, are sorces of much afflictions - my mind is brought under the precious influence of truth the mind tendrd under aconcern that I may maintain my testimony faithfully & increase & deepen in the root of religion

Our Meeting [Yearly Meeting] yesterday was adjourned to the tenth hour this morning, reading the epistles was the chief buisness our friends R Mott & Matthew Franklin were largely engaged in testimony, & I hope their testimonies were useful - they are both friends of a very easy & agreeable delivery which require their strecit watchfulness lest the creature become exalted - Our friend WmFlanner & R Jordan have had but little to communicate thro' the Settings of the Yearly Meeting We closed under a Solemn sense of the favors mercifully vouchsafed to us at this season & I hope it may [be] to us as bread cast upon the waters to return in due time, for as to my own part I have not been able to feel so much of the sweetening influence of the precious truth in my mind as at seasons of more abstraction, being much in cumbered with cares at the boarding houses as well as cares at home, which obstructs the circulation of that Spirit so desirable to be felt -

Happened in the evening at Anne Carpenters where was a large circle of my acquaintance & friends, among whom was my precious H it was a pleasant opportunity -

The Satisfaction taken in the company of those to whom we feel ourselves united in pure love is truly delectible. I have had a large share of those of this description in the corse of this Yearly Meeting & been favored to entertain them as much to my satisfaction as perhaps at any time in my life - for this with my many unmerited mercies & blessings I desire to be humbly thankful & render unto the Lord the tribute of thanksgiving & praise Oh that all the reprobate nature may be purged away by the power of the Cross, for I am confirmed that there is no other way for us to Deepen in the path [?] plot [?] of truth by coming to the Apostles experience, to "die daily"

I'm sure as far as I know my own heart, at times, it is the primacy of it to become redeemed from all carnal will, which I too frequently feel to present itself in religious concerns, the enemy with or by his subtilty introduces a Spirit of this kind which in appearance much resembles the Spirit of truth, but not in nature & effect, therefore it becomes the needful care of all to have their eyes annointed with a holy eye salve of the Kingdom that we may not only see men as truly[?] walking, but to see them perfectly as they are.

RELIGIOUS SOCIETY OF FRIENDS

August 9, Sunday: Robert Fulton had carefully negotiated a partnership with Chancellor Robert R. Livingston. This man Livingston seemed to be a mere judge of the court of chancery of the State of New York, and yet in fact his deep background political influence was such that he was known among the knowing there as the 2d most powerful person, after the governor, in the State. Livingston arranged that, if he and Fulton could merely drive their steamboat four miles along the Hudson River in one hour, the government would grant them an enormous privilege: a 20-year monopoly of steamboat service. No patent application would be necessary and yet no competition would be permitted. For twenty years they would be allowed to charge whatever they could induce their passengers and customers to pay. So on this day there came about the initial trials of Fulton's unpatented boat, described at the time as "an ungainly craft looking precisely like a backwoods sawmill mounted on a scow and set on fire." It made a successful 1-mile run on Manhattan Island's East River. (Soon it would steam up the river from New York Harbor to Albany in 32 hours, and back down

with the current in 30.) Fulton would christen it, inventively, *Steam Boat*, although later it would be known as the *North River* and we know it now as the *Clermont*. Because of the events of this day, you have probably been led to suppose that Fulton invented the steamboat, as a way to harness heat and force it to produce forward motion. No, what this inventor invented was a government-sponsored monopoly, a way for rich people to get richer by putting their own steamboats on the Hudson River while forestalling anyone else from doing so. Which is to say that, instead of inventing ways to translate steam power into mechanical power, Fulton was into inventing ways to translate the political power of office and lobbying into the economic power of money.

1 day 9 of 8 M 1807 / I'm just going to meeting, not in so humble a frame of mind as at some times, but hope to get right before night -

I can truly say I am agreeably disappointed for when I took my seat in meeting as a precious mantle was spread over my mind, & instead of having to wrestle with my own spirit, the necessity was measurably taken away - the silent part of the meeting continued till nearly the usual time of its breaking - when Elizabeth Coggeshall rose & delivered a testimony as near Gospel as any I have heard for some time, on the subjects of Affliction, love & the necessity of Subduing our own carnal, wills I know not when I have more witnessed the Baptizing effect of any testimony -

Our Afternoon meeting was a very uncommonly favord time -Richard Mott stood full two hours declaring the truth with much life & power - I think his testimony this afternoon of much more use than any he has delivered here in his visit - when he sat down there was a very remarkable Solemnity over the Meeting which continued for some time when E Coggeshall closed in solemn supplication - Took tea at C Rodmans in company with my dear H who came to town this morning & took meetings with us today, & went directly out after tea so that I have had but little oppertunity with her. She was preciously near my heart, & should have been glad to have enjoyed more of her company - In the evening sat a little while with D R & wife with my mind sweetly ruminating & sometimes speaking on the favors of the day - It has been a precious day to me for which I desire to be very thankful

GO TO MASTER HISTORY OF QUAKERISM

September 7, Monday: A Presbyterian missionary sent to [China](#) by the London Missionary Society, the [Reverend Dr. Robert Morrison](#), had declared his intention to be the bringing of “the light of science and revelation” to “peacefully and gradually shed their lustre on the Eastern limit of Asia and the islands of the rising sun,” lands which up to that point had been very much in the dark. He stood fresh off the boat on a Canton dock with the bee in his bonnet to convert all these teeming multitudes of Chinamen to the truth and power of [Christianity](#) and thus earn an entire galaxy of stars for his heavenly crown — and he bore in his hand a letter of introduction from then Secretary of State [James Madison](#). He was wondering who to show this precious letter to first. Let us have a moment of silence, and contemplate the possibilities.

[Moment of Silence]

In result of the [bombardment of Copenhagen](#) that had proceeded from August 16th to September 5th, and in return for an understanding that the British would attempt to leave Copenhagen within six weeks, Denmark signed a capitulation document surrendering all its navy and naval stores.

Under threat from France, King Gustaf IV Adolf ceded Pomerania to the French.

I made a pleasant visit there, & left J & returned to P L, again where I lodged & this / 2 day [Monday] / morning rose at a little past 4 OClock & walked home in about two hours – It has been a day of tumult the Militia has paraded the Streets with the sound of Drums & Fifies which with their appearance allways affect my mind with seriousness & put me to inspecting the ground of my faith in the Christian Religion, & I have thought this day that my objections to appearing as a military man is founded & something more than meer traditional Religion, for I think I have seen that wars & fightings are an offence to the Almighty & that he hath no delight in them, Oh that the pure spirit of Christianity may more & more abound in my heart -- Called at Earls, & Sarah introduced me to a man who lived in the other part of the house that had a Galvance machine I examined it & took several Shocks, it is a wonderful thing & past my finding out that a few peaces of metal Should have such an effect on the human frame, but it is like many other things, that we are but ignorant beings, & to impress on our minds with the Greatness & goodness of God – Spent the remained of the evening at C R: with a precious covering over my mind. Oh that I may be thankful –

I thought notwithstanding our case was bad, there were yet left a few names in our Sardis that had not defiled their garments; or at least were striving to wash them from their defilements. my mind was lead into a close search on my own account accompanied with desires that I might become more & more in earnest to be redeemed from the world, & tho' the little foxes now & then rushed in to nip the tender shoots of life, yet I thought it a favord time & they in good measure prevented from doing hurt. In the corse of the afternoon I have had to view the dangerous situation of a state of ease, & a state that hath been favord in the beginning with many divine openings, but contenting them selves with yesterdays manna, have settle down in the form of sound words & doctrine, but lack the life & Power. She stood rather longer than I ever saw her before, & was very lively in her communication

In the preparative meeting the Queries were answered & the defective manner in which some of them were necessarily expressed, occasioned some close remarks & doubtless exercise to some feeling minds, & sorrowful to mention, the Overseers reported a Young man as a delinquent for attending a Militia

This evening called at J T's shop & met a couple of men whose conversation turnd on the present gloomy prospect of War, & in such a case what Friends would do. They said we must all fight. - My reply was, that I should think it an hanious crime for me to fight & kill an Englishman for they had done me no hurt & I felt no animosity against them. My replys was short but were Such as has afforded me very peacefull feelings, & I thought struck them with some weight - Soon after I fell in with a member of society with whom I had a little conversation on the Same Subject which has given me much pain as I verily believe he is not as Sound in the faith as he ought to be

those under our protection to be killed, to kill the offender, on this doctrine I opposed him & stood my ground, zealously supporting that it would be better to die ourselves, that we should stand a greater chance of mercy from the Lord, than to Kill him whose mind was so far reduced to the brute condition, & the probability would be must be consigned to endless misery, & in my opinion the destroying of such an one would subject our own souls to the same punishment. Whereas was he to live he might by unfeigned repentance obtain pardon from the most high & we be clear of the blood of all men -In this frank acknowledgement of the young man my mind has received an additional confirmation that it is best for us zealously to support our religious principals & if we are sometimes overcome by the eloquence of mans wisdom, or rather if we do not allway find sufficient matter to advance against those who has a little more of gift of speach than ourelves, that is no reason to think our cause is bad, if we can but feel an evidence of what we say to be right & as coming from the right spring, we need not fear, for sometimes a few words spoken in the symplicity will do more good & have a more convincing effect on the mind of an opposer than many words couched in the nicest manner.

from the academy to college.

I was born on the 17th of December, 1807, in the easterly part of Haverhill, Mass., in the house built by my first American ancestor, two hundred years ago. My father was a farmer, in moderate circumstances,—a man of good natural ability, and sound judgment. For a great many years he was one of the Selectmen of the town, and was often called upon to act as arbitrator in matters at issue between neighbors. My mother was Abigail Hussey, of Rollinsford, N.H. A bachelor uncle and a maiden aunt, both of whom I remember with much affection, lived in the family. The farm was not a very profitable one; it was burdened with debt and we had no spare money; but with strict economy we lived comfortably and respectably. Both my parents were members of the Society of Friends. I had a brother and two sisters. Our home was somewhat lonely, half hidden in oak woods, with no house in sight, and we had few companions of our age, and few occasions of recreation. Our school was only for twelve weeks in a year,—in the depth of winter, and half a mile distant. At an early age I was set at work on the farm, and doing errands for my mother, who, in addition to her ordinary house duties, was busy in spinning and weaving the linen and woolen cloth needed in the family. On First-days, father and mother, and sometimes one of the children, rode down to the Friends' Meeting-house in Amesbury, eight miles distant. I think I rather enjoyed staying at home and wandering in the woods, or climbing Job's hill, which rose abruptly from the brook which rippled down at the foot of our garden. From the top of the hill I could see the blue outline of the Deerfield mountains in New Hampshire, and the solitary peak of Agamenticus on the coast of Maine. A curving line of morning mist marked the course of the Merrimac, and Great Pond, or Kenoza, stretched away from the foot of the hill towards the village of Haverhill hidden from sight by intervening hills and woods, but which sent to us the sound of its two church bells. We had only about twenty volumes of books, most of them the journals of pioneer ministers in our society. Our only annual was an almanac. I was early fond of reading, and now and then heard of a book of biography or travel, and walked miles to borrow it. When I was fourteen years old my first school-master, Joshua Coffin, the able, eccentric historian of Newbury, brought with him to our house a volume of Burns' poems, from which he read, greatly to my delight. I begged him to leave the book with me; and set myself at once to the task of mastering the glossary of the Scottish dialect at its close. This was about the first poetry I had ever read, (with the exception of that of the Bible, of which I had been a close student,) and it had a lasting influence upon me I began to make rhymes myself, and to imagine stories and adventures. In fact I lived a sort of dual life, and in a world of fancy, as well as in the world of plain matter-of-fact about me.

52. You will notice the manner in which Section 9 of the US Constitution is persistently misrepresented in our history textbooks. Where Section 9 explicitly prohibits the new federal Congress from restricting the [international slave trade](#) before 1808, saying that “The migration or importation of such persons as any of the states now existing shall think proper to admit, shall not be prohibited by the Congress prior to the year one thousand eight hundred and eight” our popular historians gloss this in our high schools as a victory for human liberty. This was instead a sop that had been thrown to the American enslavers. It categorically prevented the new federal government from interfering with their resupply of slaves prior to 1808 no matter how many votes there came to be, by decent and honorable Representatives, to duly restrict such an insidious traffic. Our popular historians present this concession to slavery, falsely, as if it were a 1787 declaration that as of 1808 the international trade in slaves was constitutionally declared to be outlawed. A built-in protection for slavery has been portrayed falsely in scholarly loose talk as an assault upon it. Yes, the federal congress did indeed in 1807 enact legislation making engaging in the international slave trade be a capital offense. However, we must take into account the fact that 1.) many [slaveholders](#) voted in favor of this new legislative approach, the fundamental economic motivation for this being that this legislation interfered with the international trade by others to the advantage of the national trade by themselves. This increased the value of the new crops of human property which they were themselves raising on their plantations, for sale within the nation. We must also take into account the fact that 2.) although the new legislation defined the offense as [piracy](#), a capital offense calling for [hanging](#), it also created a series of five loopholes through which almost anyone captured in the trade might expect always to escape unscathed. In other words, the hanging part of it was a straightforward sham. In fact between 1807 and 1861 not a single culprit “pirate” would get hanged! In 1862 one such bold “pirate” would be hanged — exactly **one** such criminal in the **entire** history of this legislation — but if you examine this one case, you will see that what he would be hanged for in 1862 was the crime of pride, in that he had neglected to make available to himself any one of these five built-in loopholes.

[HDT](#)[WHAT?](#)[INDEX](#)**FRIEND STEPHEN WANTON GOULD****STEPHEN WANTON GOULD****GO TO MASTER HISTORY OF QUAKERISM**

(Please note: in this assertion, the words “impossible” and “legally” entirely alter each other’s implications.)

Although importation of slaves into the United States was banned by this act which Congress –becoming for the first time enabled to overcome the constitutional restriction– had passed in 1807, making slave import into a capital crime, some 250,000 additional enslaved persons would be illegally imported between this year and 1860. Although nowadays we congratulate ourselves by paying extraordinary attention to the “success stories,” the sad fact is that the combined total of escapes (vanishingly few, mostly of unattached young males of the border states) and [manumissions](#) (vanishingly few) would come nowhere close to making a dent in such a rate of continuing “recruitment.”

– [THESEN ÜBER DEN BEGRIFF DER GESCHICHTE](#) (1940)

Although this [international slave trade](#) had been made a capital crime, nobody would hang for such a crime for a long, long time. There were too many too carefully built-in escape clauses. In fact, only one unfortunate would ever be hanged, and the hood would not be pulled over the head of this slave importer until the Year of Our Lord 1862!

THE MIDDLE PASSAGE

During this year the Reverend Absalom Jones would be proposing, to his African Episcopal congregation in Philadelphia, that all Americans should celebrate an annual holiday of Thanksgiving. This former slave would propose January 1st as the annual date of this Thanksgiving, it being the date on which the further importation of slaves into the US had at least ostensibly been made a federal capital crime. (Execute that turkey!)

I do not believe it is for the interest of religion to invite the civil magistrate to direct its exercises, its discipline, or its doctrines; nor of the religious societies, that the General Government should be invested with the power of effecting any uniformity of time or matter among them. Fasting and prayer are religious exercises; the enjoining them an act of discipline. Every religious society has a right to determine for itself the times for these exercises, and the objects proper for them, according to their own particular tenets; and the right can never be safer than in their hands, where the Constitution has deposited it.

February 23, Tuesday: Count Remusat wrote to the director of the Opéra requesting that the name of Jan Ladislav Dussek be inscribed on the “liste des Entrées” (Dussek would not need to pay at the door).

The Senate of the United States received from the legislature of the state of Pennsylvania a proposal to amend the federal Constitution in such manner as to make it forever impossible for the federal legislature, or for any state legislature, to authorize importation of any more slaves. Although this resolution was read to the body, there would be no further mention of such a proposal.

“Agreeably to instructions from the legislature of the state of Pennsylvania to their Senators in Congress, Mr. Maclay submitted the following resolution, which was read for consideration: –
“Resolved . . . , That the Constitution of the United States be so altered and amended, as to prevent the Congress of the United States, and the legislatures of any state in the Union, from authorizing the importation of slaves.” SENATE JOURNAL (reprint of 1821), 10th Congress, 1st session, IV. 235; ANNALS OF CONGRESS, 10th Congress, 1st session, page 134. INTERNATIONAL SLAVE TRADE

Note that in this timeframe, the white people of the South had not yet become fixated upon the absolute value of their system of human [enslavement](#). They were, in this timeframe, perfectly congenial to speculations that it might be an excellent idea to simply walk away from all this. Attitudes had not yet hardened; situations had not yet stickied.

W.E. Burghardt Du Bois: The attitude of the South toward the slave-trade changed *pari passu* with this development of the cotton trade. From 1808 to 1820 the South half wished to get rid of a troublesome and abnormal institution, and yet saw no way to do so. The fear of insurrection and of the further spread of the disagreeable system led her to consent to the partial prohibition of the trade by severe national enactments. Nevertheless, she had in the matter no settled policy: she refused to support vigorously the execution of the laws she had helped to make, and at the same time she acknowledged the theoretical necessity of these laws. After 1820, however, there came a gradual change. The South found herself supplied with a body of slave laborers, whose number had been augmented by large illicit importations, with an abundance of rich land, and with all other natural facilities for raising a crop which was in large demand and peculiarly adapted to slave labor. The increasing crop caused a new demand for slaves, and an interstate slave-traffic arose between the Border and the Gulf States, which turned the former into slave-breeding districts, and bound them to the slave States by ties of strong economic interest.

As the cotton crop continued to increase, this source of supply became inadequate, especially as the theory of land and slave consumption broke down former ethical and prudential bounds. It was, for example, found cheaper to work a slave to death in a few years, and buy a new one, than to care for him in sickness and old age; so, too, it was easier to despoil rich, new land in a few years of intensive culture, and move on to the

STEPHEN WANTON GOULD

Southwest, than to fertilize and conserve the soil.⁵⁵ Consequently, there early came a demand for land and slaves greater than the country could supply. The demand for land showed itself in the annexation of Texas, the conquest of Mexico, and the movement toward the acquisition of Cuba. The demand for slaves was manifested in the illicit traffic that noticeably increased about 1835, and reached large proportions by 1860. It was also seen in a disposition to attack the government for stigmatizing the trade as criminal,⁵⁶ then in a disinclination to take any measures which would have rendered our repressive laws effective; and finally in such articulate declarations by prominent men as this: "Experience having settled the point, that this Trade *cannot be abolished by the use of force*, and that blockading squadrons serve only to make it more profitable and more cruel, I am surprised that the attempt is persisted in, unless as it serves as a cloak to some other purposes. It would be far better than it now is, for the African, if the trade was free from all restrictions, and left to the mitigation and decay which time and competition would surely bring about."⁵⁷

believe will be of some use, even many of the Guiney traders themselves were affected at it & opposed the measure – It is rare of late that my feelings have been so quickened on any subject but to reflect that this poor little creature should be sold to the highest bidder who perhaps may be a person that would privately convey her to Some Sothern State & there sell her for life to deprive her of liberty & happiness, which is a peace of villany that might easily be practiced upon a poor little unprotected child I say to reflect on this is more than I can bear, hard & obdurate as my heart is in other respects, & that I have been a Small instrument among several to prevent it is matter of most Sincere thankfulness in my heart. April 10, Sunday: Franz Joseph Haydn was awarded the medal of the Philharmonic Society of St. Petersburg.

Friend [Stephen Wanton Gould](#) wrote in his journal:

1st day 10 of 4 M / Our Meetings were quite large & larger on acct of our friend R Jordan who was with us, in the forenoon he preached livingly & powerfully, & took occasion to remind us of the many favors & privileges that we the Inhabitation of America enjoy far beyond what many in Europe can from the wars & tumults that are among them & the religious superstition but we were free from them. Peace & plenty within our border's as yet & a tolleration of all religious sentiments; & such considerations ought to bow our hearts before God Almighty, as it had many times his with humble thankfulness, & prayers raised that we may be in possession of that real religion which will be availing thro' all trials & tribulations tumults & commotions whatsoever - In the afternoon his communications to the people was short, but very close on the dry professors of our own Society & said he believed he had felt as our dear Master felt when his deciples were found Asleep "Sorrowful unto death" that they were not found watching, but asleep. - He concluded the meeting in a very liveing supplication for those that were honeste hearted & those that were Sensible they had no might of their own, but were casting all their confidence on the Lord alone, that these might be helped & Strengthened to run the race that was set before them with Alacrity & acceptance - Also that the time would come speedily when "Nation should lift up Sword against nation NO MORE" & be at peace one with another & the effusions of Gospel love be difused the world over

My mind thro' the day has indeed been wholly desitute of Good but dear R's preaching & praying could not fail to stir up the pure witness which is often slain thro' my own wicked propensity, it is indeed with shame that I acknowledge this, but the condemnations of my feelings would not allow me to insert any thing better. Oh that the time may hasten when the bonds of inequity may be broken, & my poor Soul Set at liberty from its present shackles -

I spent the eveng with my precious H & found her much unwell, her Cough & horsenes continues with violence & today has had a vein open'd to try the effects of that. I greatly fear our intended connection will be broken off by the removal of one or the other of us, as from her own acct of her feelings from the beginning of our company keeping it appears that she has never seen to the end of it but often times has been possessed with fears that it would never terminate in Marriage & that in such a manner that she hath been deeply affected with it. Well if it is never my lot to be united to the dear creature I most fervantly Pray God to give me resolution to endure the disappointment, & with fortitude say from the bottom of my Soul "Oh Lord they holy Will be Done" [written large]

May 16, Monday: A report that can only be characterized as "a UFO sighting" appeared in the Transactions of the Swedish Academy of Sciences. According to this report, it was a warm, cloudless day in Sweden, but at about 4PM the sun strangely dimmed and "there appeared on the western horizon, from where the wind blew, to arise gradually, and in quick succession, a great number of balls, or spherical bodies, to the naked eye of a size of the crown of a hat, and of a dark brown color." As these objects drifted with the breeze in the direction of the sun, their appearance darkened until they appeared "entirely black." Eventually most of them drifted on over the eastern horizon, but "[d]uring this course, some disappeared, others fell down.... The phenomenon lasted uninterruptedly, upwards of two hours, during which time millions of similar bodies continually rose in the west, one after the other irregularly, and continued their career in exactly the same manner. No report, noise, nor any whistling or buzzing in the air was perceived. As these balls slackened their course on passing by the Sun, several were linked together, three, six, or eight of them in a line, joined like a chain-shot by a thin and straight bar; but on continuing again a more rapid course, they separated, and each having a tail after it, apparently of three or four fathoms length, wider at its base where it adhered to the ball, and gradually decreasing, till it terminate in a fine point. During the course, these tails, which had been the same black color as the balls, disappeared by degrees." An official of the Swedish Academy, K.G. Wettermark, reported that some of the balls came to earth in his vicinity, and that as they came down they lost their dark color, were unseen for a brief period, and then when they became visible again they were iridescent "in this particular exactly resembling those air-bubbles which children use to produce from soapsuds by means of a reed. When the spot, where such a ball had fallen, was immediately after examined, nothing was to be seen, but a scarcely perceptible film or pellicle, as thin and fine as a cobweb, which was still changing colors, but soon entirely dried up and vanished." (Such reports were apparently rather familiar in the earlier centuries, and we have the terms "star jelly" and, in Welsh, *pwdre ser* meaning "rot from the stars." References to such a material descending from the sky are to be noticed in a poem by Sir John Suckling from 1541 and in a poem by John Dryden from 1679. In 1712 the Reverend John Morton of Emmanuel College had obtained enough of this strange sky-falling material to burn some of it, and noted that "there was left a film like isinglass, and something like the skins and vessels of animal bodies.").

one Bellows ---\$1.50

one large Shovel - 1.29.5

five watch chain - 1.25

His demands against me was as follows - Fine --- \$2. - Warrant .25

5th day 23d of 6th M 1808 / After I went to bed last night my mind was brought into a solid weighty frame & I trust living desires were begotten afresh in my heart more & more to live a life devoted to Truths cause - And now again this morning the same concern is revived -

At meeting we were silent & to me it was a good instructing opportunity, having to look over things past present & to come as pertaining to my life, & can say in Sincerity that I desire to come up in the discharge of the various & important Duties that may devolve on me the remainder of my life, with faithfulness & fervency of heart to that cause which my soul at seasons prefers to the increase of Gold or Silver, & also in family concerns, & I believe in order to a faithful discharge of the latter, the former must be strictly adhered to, for without a growth in religion, I believe family concerns cannot be rightly fulfilled, neither the choice blessings of heaven attend, but if Religion becomes our primary object, the Scripture promise will be fulfilled Seek first the Kingdom of Heaven & the Righteousness thereof & all things necessary will be added -

In the last (Preparative Meeting) I proceeded on am important concern that hath long been in agitation - to lay my Intentions of Marriage with Hannah Rodman before friends - & tho' I am more accustomed to speaking in meetings than some, I did not speak so free from embarrassment in that case as many that never confronted an audience before, hence I learn that we cannot calculate on former experience, but every exercise brings a new feeling with it, & that we are wholly & soley dependant on the Lord for help -however I Spoke as as to be understood & what may be called tollerably well - [From & tho' I am more to tollerably well is crossed through] Since Meeting my mind feels peaceful & as if I had done right, which from the first commencement of the undertaking has allways afforded Satisfaction & a hope that it would termine for our mutual Benefit -

Seem'd to be met by the public testimonys that were borne by our friends H Almy first succeeded by D Buffum & Anne Greene Holder was on the necessity of Dilligence & Submitting to the Lords calls in the Hearts - David endeavored to shew that the number of real christians were very few in proportion to the prefessors of it & how much more useful we might have been as a Society had we from our first being gathered as a boody kept in the power of truth & the influence thereof, as our predecessor did & of the necessity of having oil in our Lamps &c - Anne took up Ds subject of the oil & made a few very instructing remarks, but what seem'd most to impress her mind was the very low state of Society -- In the last meeting buisness labor'd & one case very trying, nevertheless there seem'd to be a weight over the meeting which I thought form'd a ballance, so that it was not the worst of times, nothing acrimonious being droped My beloved H & myself were favord again to acomplish our buisness with fortitude & I hope yea pray we may not fail in the END. I dined at father Rodmans for the first time in my life - Sarah Fish was also there then returned home & took tea & walked up to the head of Broad Street with cousin Alice Chase, & on my return stoped at D Williams & set a little while with his wife, with whom I felt a precious sweetness to cover my mind - IN the eveng again a little while at father Rodmans, R Taylor & D Austin was also there _____

Then D Buffum rose & said he thought it would be right for him just to inform us his feelings in that meeting which he apprehended has been in some degree excited by the accounts of the decease of a beloved brother which he had this mornng received, he very feelingly exhorted us to do our days work in the day time that when the Awful final change should come we might experience the Sting of death removed, &c there was more preaching & I thought more of the circulation of life in our meeting this morning than had been for some time, but alass but little of it flowed into my Vessel - In the Afternoon we were silent, & to me it was a time of digging, & made out to get a little lower than at some times - Took tea at A Carpenters & passed the eveng with my beloved H*

5th day 11th of 8 M 1808 / This day commences a new & All important Era of my life. I was married to my beloved friend Hannah Rodman Daughter of Clarke & Abigail Rodman of this Town -In the morning under the full weight of the matter I went up to her fathers & weighted on her to meeting, & had not learnt untill I saw him come into meeting that our Valued friend John Casey had taken the pains to come from [Greenwich](#) partly to attend our marriage -but more particularly to relieve his mind of a concern he has felt to pay a visit to the Inhabitant of this his native place, as he Said where he first drew the breath of life naturally & spiritually - - Soon after I took my seat I was favord to feel the precious arising of divine life in my mind & anticipated a favord meeting, feeling a precious Solemnity spread over the gathering, & was not [the next six lines have an X through them] disappointed for the solemnity continued & Dear J Casey was very livingly engaged in public testimony - reciting in a very feeling manner the visitations of his youth & his allmost unpresedented obstinacy, & finally his preservation from the jaws of destruction, & exorted all present to close in with the calls of divine providence, while they were favord with them, & told us had he been faithful from the first of his visitations it might have renderd him much more useful in the church, & have brought up far greater peace in his own mind, avoiding many bitter days & exercising nights which he hath passed thro’ to attain what spiritual strength he has he endeavord to comfort those that had begun the work for Truth & to aarouse those that continued in their sins rejecting those precious visitations - & concluded in a very feeling address to the offspring of Friends in this place that we endeavor to support with dignity the several christian testimonys which we as a Society bear to the world - After the testimony & a Suitable pause ensuing, the overseer (O W) who set next me gave me a whisper to proceed (which is a practice I like better than for one of them to get up & speak to the young couples) We stood up according to order & both spoke handsomely & I believe were heard to the remotest part of the house, we being inhabitants & having a large circle of acquaintances & at present blessed with friends - The meeting was very large, however that was a circumstance which was much less embarrassing than I expected - At dinner we had the following guests, the men Overseers were Obadiah Williams & Rouse Taylor & the women Elizabeth Hosier & Mary Williams - My father & Mother & Aunt Mary Wanton - & brother Isaac - John Casey. of the Afternoon we had much interesting conversation both on Civil & religious subjects, & I know not when I have ever heard the subject of Friends voting in town Meetings more interestingly & usefully discussed Our friends O Williams & R Taylor disoraged the practice & O display'd much eloquence & ingenuity also Solidity on the Subject & I believe has compleatly convinced some that were present of the justness of his remarks -At tea we had the Same company as at dinner with the exception of Brother Isaac & the Addition of David Williams who came after dinner & spent the afternoon - After tea the company retired except Rouse Taylor who spent the eveng - Sarah Earle also came in the evening - Thus ended the day of all the most important that has yet taken place in my life, & I can say it has been a pleasant one both inwardly & outwardly, for in the outward from the rising of the Sun to the setting of the same I could not find a cloud in the Sky & the eveng equally serene & clear except rather more heat than was pleasant - And Oh! Saith my Soul may the day be an emblem of the day of our lives, may calmness & serenity mark our footsteps & may our lives be devoted to the Honors of him who created us for a purpose of his own Glory. I feel (while penning this) my mind humbled within me under a sense of my human frailty & very great incapacity of myself to discharge the dutys that will or have devolved upon me I desire I pray that I may be a good husband to my dear Wife, feeling fully confident that she will be to me a very usefull helpMeet, & desires are no less begotten on her behalf that she may be supported to bear with christian patience & fotitude the trials & besetments that may assail us in passing thro' time to that state where they all cease, & the weary traveller finds a permanent rest - I allso feel thankfulness of heart that we were favord to speak in the several meetings particularly the last with so much propriety & strength & that my dear H was supported under it considering her weak state of health -

7th day 13th of 8th M / Took breakfast at Father R's - We have today a second part of fifth days tune at my fathers, the guests consist of all the brothers and sisters on both sides that are at home & Lewis Clarke. In the afternoon Lewis related a circumstance which for what reason I cannot tell nor why such a story should have such a place in my mind I cannot tell, in the course of conversation which lead to it, he mentioned a circumstance that happened formerly, a man by the name of Hull an honest well concern'd friend who lived near the ferry house on Connanicut had a son that was something inclined to lightness & his care was greatly toward his son that he be preserved from frequenting the ferry house which at that time was a very pernicious place abounding with examples of drunkenness & other vices, at length this son was inclined to make an instrument of Music called the Longspell which gave his honest father still greater concern, which after he had made, manifested uncommon skill at playing & used it mostly in the garret alone which employed most of his lesure time, his father consulted several judicious friends what he had better do, being unwilling to have Music played in the house - which after being maturely deliberated upon was thought best, considering the proximity of the ferry house to indulge the lad in his inclination fearing that if he was crossed therein he would resort among bad people at the ferry house. The lad accordingly was left, but after a while left his music, & became a pillar of in the Church & lived to a good old age, - I have not inserted this believing it is allways safe to leave youth to their own persuits but, the Wisdom of the friend & his Councillors was what particularly struck me believing that such judicious men are much wanting in this day - This day was spent to a good degree of satisfaction, Fatherly, Motherly, Sisterly & Brotherly love seem'd to flow among us (ie) if I was capable of entering into the feeling of the company, at least I can speak for myself & say it did in mine, & peculiarly towards my new brothers & Sisters, insomuch that my heart was moved in mental supplications for our mutual advancement in, & faithfulness too that Pure principal within which will draw the minds of all who will adhere to it into usefulness in the Church, to our Selves, and acceptance to our Maker, I can say that this hath been the renewed concern of my soul this day & Oh! that it may be a season of renewed, & lasting covenant with my God, & my life from this time forward to the day when the "Silver cord shall be loosened" may be marked with renew'd acts of sincere devotion to the precious cause of Truth. - Among other things which hath occupied my feelings this day is that the pure principal may so operate in the minds of some that they may be more faithful in the Support of the testimonys of society - I do love to hear members of our Society use freely & openly the plain language, I when I see it other ways it more or less allways gives me pain, but I say this not with any severity, very far from it, but with the most tender sensations of love -

GO TO MASTER HISTORY OF QUAKERISM

August 17, Wednesday: A well-dressed crowd gathered on the Hudson River side of Lower Manhattan Island on this hot afternoon of August 17, 1808 to view the new steamboat of Robert Fulton, which he had named the *North River* (this was the riverboat that is now referred to as the *Clermont*).

Construction was beginning in this year, of five D-shaped sandstone forts in defense of New-York harbor: Fort Wood on Bedloes Island, Fort Gibson on Ellis Island, three-tiered Castle William on Governors Island replacing or supplementing Fort Columbus, and, at the edge of the city itself, the North Battery and the “South-West Battery.” The north battery would be constructed at the foot of Hubert Street and the south-west battery, which would have 28 ports for its bronze cannon, would be constructed on a small island off the beach at the tip of Manhattan and its garrison would be linked to the shore only by way of a 200-foot causeway equipped with a drawbridge.⁵⁸ These defensive fortifications would be completed in 1811.

The Battle of Rolica, during the Peninsular Campaign: The British forces under Wellington had landed in Portugal and moved south to Obidos, and had observed that the French forces under General Delaborde had taken up defensive positions four miles to the south, in front of the village of Rolica, which lay in the center of a horseshoe of steep hills a mile wide and two miles long. Wellington had spent the night of August 16th in

the small square palace in Obidos. The British had attacked opposite the French positions, simultaneously engaging a pincer mover to the west. The French had withdrawn to avoid the trap. As Wellington repeatedly attacked the French then carefully withdrew behind a strong cavalry screen. Wellington pressed south to Vimiero. When we now visit the beautiful Moorish town of Obidos, we can view from the northern ramparts of the town wall the scene of the skirmish action that preceded this battle. Then from the southern ramparts of this town wall we can view the scene of the French positions before Rolica three miles to the south as Wellington had on this day. We can visit the crest of the ridge along which the French had taken their initial positions, then the crest of the second ridge, south of Rolica, on which the French had taken their subsequent positions. We can visit, on the high ground north of Serranos, a monument that marks the spot where Colonel Lake and four companies of the 1/29th met their deaths. Here is an account by Rifleman Harris:

The Rifles, indeed, fought well this day, and we lost many men. They seemed in high spirits, and delighted at having driven the enemy before them. Joseph Cochan was by my side, loading and firing very industriously, about this period of the day. Thirsting with heat and action, he lifted his canteen to his mouth. 'Here's to you, old boy,' he said as he took a pull of its contents. As he did so a bullet went through the canteen, and perforating his brain killed him in a moment. Another man fell close to him almost immediately, struck by a ball in the thigh. Indeed, we caught it severely just here, and the old iron was also playing its part amongst our poor fellows very merrily. I saw a man named Symmonds struck full in the face by a round shot, and he came to the ground a headless trunk. Meanwhile, many large balls bounded along the ground amongst us so deliberately that we could occasionally evade them without difficulty. I could relate many more of the casualties I witnessed on this day, but the above will suffice. When the roll was called after the battle, the females who missed their husbands came along the front of the line to inquire of the survivors whether they knew anything about them. Amongst other names I heard that of Cochan called, in a female voice, without being replied to. The name struck me, and I observed the poor woman who had called it, as she stood sobbing before us and apparently afraid to make further inquiries about her husband. No man had answered to his name, or had any account to give of his fate. I myself had observed him fall (as related before) whilst drinking from his canteen, but as I looked at the poor sobbing creature before me I felt unable to tell her of his death. At length Captain Leech observed her, and called out to the company, 'Does any man here know what has happened to Cochan? If so, let him speak out at once.' Upon this order I immediately related what I had seen, and told the manner of his death. After a while Mrs Cochan appeared anxious to see the spot where her husband fell, and in the hope of still finding him alive asked me to accompany her over the field. She trusted, notwithstanding what I had told her, to find him yet alive. 'Do you think you could find it?' said Captain Leech, upon being referred to. I told him I was sure I could, as I had remarked several objects whilst looking for cover during the skirmishing. 'Go, then,' said the captain, 'and show the poor woman the spot, as she seems so desirous of finding the body.' I accordingly took my way over

the ground we had fought upon, she following and sobbing after me; and quickly reaching the spot where her husband's body lay, I pointed it out to her. She now soon discovered all her hopes were in vain. She embraced the stiffened corpse, and after rising and contemplating his disfigured face for some minutes, with hands clasped and tears streaming down her cheeks, she took a prayer book from her pocket, and kneeling down repeated the service for the dead over the body. When she had finished she appeared a good deal comforted; and I took the opportunity of beckoning to a pioneer I saw near with some other men, and together we dug a hole and quickly buried the body. Mrs Cochan then returned with me to the company to which her husband had been attached, and laid herself down upon the hearth near us. The company to which Cochan had belonged (bereaved as she was) was now her home; and she marched and took equal fortune with us to Vimiera. She hovered about us during that battle, and then went with us to Lisbon, where she succeeded in procuring a passage to England.

Margaretta Wedderburn's "The Sky, or a Description of a fine Evening: August 17. 1808":

With rapture and delight I oft admire
Jehovah's works that come within my view,
Himself exceeding admiration's ken,
Or ought that I could fancy that is great,
Is good, is glorious, without compare.
The season this, when Autumn richly pours
Prolific bounty o'er this fav'rite isle.
Here universal peace and plenty reigns,
While beasts, and birds, and insects feed around.
And when their thirst is quench'd at limpid stream,
In sportive gambols spend the live-long day.
Till sober eve invites to rural walk,
By humble hedge-row, deck'd with foliage green,
To smell the fragrance of the scented briar.
Now ev'ry scene looks gay, it yields delight,
And fits the mind to wonder and adore.
Among the branches, feather'd choristers
Have sung their ev'ning lay, and are retir'd
To rest their downy wings, till morning dawn.
All but sweet philomel, her notes prolong'd
Swell with the breeze, in charming symphony,
To sooth the lover's woe, that wanders forth,
(When absent from the maid his heart holds dear,)
Alone to vent his plaint. Pensive and sad
He seeks the shade, and shuns each vulgar joy.
Thy song, sweet bird, hath lull'd his griefs to rest,
While pleasing hope restores his fancied bliss.
And now retard my wond'ring eyes this eve,
With divers hues, and beauties manifold.
The sky in azure clad, serene and clear,
By sun's decline, just tinged with florid gold;
And not the most elaborate assay
Of skilful artist, when his pencil's dip'd

In ev'ry varied tint he hath prepar'd,
A form so lovely ever could produce
To gazer's eye, as that I now behold.
But as I upwards look again, how chang'd!
The clouds seem hov'ring round, with moisture fill'd,
From vapours gather'd and laid up for use,
(By sov'reign will of him who all commands,)
And liberal sends on earth their copious show'rs,
The water ev'ry flow'ret, tree, and plant,
That else would languish, wither, and decay,
If long withheld from vegetation's store,
The liquid juice that makes all nature bloom.
But while my thoughts o'er various prospects rove,
Or fix'd intent on some peculiar space,
Behold the day's most splendid visitant,
His pow'rful beams withdrawn to other climes,
And cheering warmth hath left our hemisphere.
But in his absence not without solace,
The moon appears with milder radiance,
Her influence benign and fainter glow,
With each revolving planet as it rolls,
Performs her destin'd circuit through the sky,
Tho' not like sparkling emanation,
Of dazz'ling, grand, majestic god of day,
When he shines forth in full meridian blaze;
Or when his rising beauties streak the east,
And brightness gilds the lofty mountain's brow;
Yet peaceful and serene, she sheds her light
Around the globe, diffusing happiness,
With less obtrusive unoffending lustre.
Also those twinkling stars re-animate,
With their resplendant rays, the dusky night.
Throughout the vast expanse, those gems appear,
(Beneficent that Power that plac'd them there,)
When they withdraw, darkness reigns absolute,
And throws around a joyless total gloom.
One lucid orb, more glitt'ring than the rest,
'Tis called the star of eve, and strikes the eye,
Amidst the num'rous throng, with circled sphere,
Surpassing, and more refulgent brightness.

Annexed to the Sky, a Paraphrase.—August 18, 1808.

But shone superior in degree,
That Morning Star so bright,
Which rising on our darken'd world,
Dispell'd the gloom of night.
Transcendently illustrious,
Appear his rays divine;
The mist of error to disperse,
And make each virtue shine.
Hard sayings to elucidate,
Each myst'ry to unfold,
Which handed down, from age to age,
By prophets were foretold.
Till then the mind of man was held,
In ignorance obscure,
With superstitious rites profan'd,
His intellectual power.
Idolatrous impiety,
Completely envelop'd;
Freed from its baneful influence,
He scarcely could have hop'd.
Until that beauteous Star arose,
The Gentiles to enlight,

All praise in earth and heaven,
But whose exalted name is far.

4th day 17 of 8 M / We are now as the saying is laying upon our Oars, but expect to commence housekeeping next week - How we shall get along is very uncertain, but I trust if our dependence is rightly placed, & our own exertions continued, we shall be enabled to get forward, at least with a comfortable degree of peace, & I can honestly say I ask no more than peace of mind with a comfortable subsistence, & a little for emergencies, believing beyond all doubt that Riches, adding house to House & field to field, is nothing short of a corrosive sublimate to that peace which is pure & springs from within, then how necessary is a double watch - And Oh how is it to be longed for, & prayed for, that the Mind is all things & on all occasions be kept from the hurtful mixtures of the World, & preserved in that which will enable us to perform Jerusalem as the chiefest Joy, then shall we be enabled to meet with christian patience, fortitude & resignation the, the vicissitudes & cross occurrences incident to us in passing thro' this (which may indeed be called) a Vail of tribulation & tears -I dont know that it will be assuming too high language to Say, that my mind while writing, is bowed under a sense of them, & that a prayer is raised, that I may stand firm, & fast in that which will enable us to endure to the END -

August 21, Sunday: The Battle of Vimeiro, during the Peninsular Campaign: the British forces under General Wellington faced the onslaught of the French forces under Marshal Junot from defensive positions along Vimiero Hill and in the village. Junot ordered over six frontal assaults up the ridge and each time his soldiers were repulsed by infantry fire. By the end of the day the French had lost over 1,000, and had lost 14 guns, while the British had suffered only 720 casualties, which meant of course that they could celebrate a great victory as the French withdrew to the south. On August 30th, the Convention of Cintra would be signed in which the French would be allowed to evacuate Portugal.

France annexed the city of Wesel.

British ships managed to take 9,000 of the 14,000 Spanish troops sent to Denmark to help the Emperor Napoléon off the island of Langeland, to transport them to Santander to aid in the Peninsular War.

August 22, Monday: On page 432 of Volume 30 of the Record of Deeds for [Providence, Rhode Island](#) there is a record of the [manumission](#) of a certain negro [enslaved](#) boy Robert on this date — a boy who had been promised three years earlier that, should he faithfully serve and obey his master Jabez Bowen, Jr. for those three years, he would then be entitled to his liberty and to be manumitted and forever thereafter to be made free. Robert having well and faithfully served his Providence slavemaster Bowen for the agreed three years, on this day was indeed fully and entirely manumitted and set free, and entirely released from every future claim of personal service or other whatsoever, and declared free. (In the document, the words “and doth hereby” appear twice in sequence, and are lined out in the first occurrence with a double line as shown below.) Although there is no reference in the document itself to any such person as “N. Brown,” we note that in the directory to this volume of deeds and mortgages the perpetrators of this freeing of “Robert, (Negro Boy)” have been indexed at the time as being indeed not only Jabez Bowen Jr. but also N. Brown! —There’s something of a story here, that maybe isn’t going to get told!

Whereas by an Obligation of the sixteenth of August one thousand and eight hundred and five the subscriber on condition a certain negro Boy Robert the slave of the subscriber should faithfully serve and obey the subscriber for three year [sic] from the said period, he the said Robert should be entitled to his liberty and to be manumitted and forever thereafter to be made free. 3rd day 23rd of 8th M 1808 / We again this mornng find ourselves at home – When I went home to breakfast & while waiting for my dear H to Set it on the table I took a Seat a few moments at the east window to view the pleasant prospect over the Gardens & fields, my mind was feelingly struck with the Scripture declaration [An X from here to end of paragraph] "This is not the place of thy Rest" which renewedly convey'd to my understanding, that however beautiful things in the outward may be around us we are not to gratify that part of the Mind which takes a life in them, beyond what the Truth will allow, & not only at this time but many time thro' the corse of my life have I sensibly felt, that the pleasant pictures must be spoiled & the Cross, yea, the Cross of Christ be daily borne ere we can be renewed in the spirit of our minds & be made partakers of that heavenly zest of love of peace which is the lot & portion of all the faithful followers.

It has been a precious day. this forenoon I have particularly had my life & inward Strength renewe'd – When going to the fountain to draw a glass of water, finding the Stream refused to run, my mind was instructingly lead to draw the analogy between a fountain of outward water & the fountain of living waters; Observation & experience shews that a fountain of Material Water is by long derth at length rendered dry, or at least the water in the fountain low & hard to be drawn out, so we also find it in our experience of the inward fountain, the mind is at times suffer'd to fall into a dry hard state, hence the waters of life are hard to be attained & requires double exercions both of faith patience & strength to get down to the spring from whence ariseth the refreshing streams of life into the Soul of Man & from my experience I am fully in the belief that those low seasons, seasons when the mind experiences a great dearth & all is stiff & hard, are for our benefit, & if patiently abode under, uniting our exercions with the help of Divine Wisdom, we shall be enabled to renew our Strength from the Waters, which flow in such profusions into the hearts of the faithful, & because the toil is long & hard & this painful state long awaits us there is no cause to give out, it is the Hand of the Lord, & his Arm is not Shortened that it cannot in due time afford all necessary & timely help –

August 30, Tuesday: At the Battle of Vimeiro, during the Peninsular Campaign, the British forces had inflicted somewhat more attrition on the French than the French had succeeded in inflicting upon the English. Marshal Junot had ordered more than six frontal assaults up the ridge against withering infantry fire with each time his soldiers being repulsed. "Your commanding officer is trying to kill you." In result, on this day a Convention was signed at Cintra by which leave was obtained to safely evacuate the surviving French out of Portugal.

By the Convention of Sintra the British repatriated 26,000 French troops in return for their evacuation of Portugal. For this unusual leniency, the commanders on the scene will be recalled to Britain to make an accounting of their actions.

Note that Friend Stephen is not saying that this was the first time that a person of color had attended a Quaker meeting, but that it was the first time that a person of color had attended the meeting for business. It was actually a rather common thing, for a servant of color to attend Quaker worship with his or her white master or mistress, and the Negro Gallery of the Friends meetinghouse in Saylesville, Rhode Island can still be inspected today (although nobody ever sits up there anymore and it is likely that no Friend in that meetinghouse today would be aware that when they cast their eyes upward during worship, what they are gazing at originated as a racially segregated seating arrangement).

GEORGE GORDON, LORD BYRON

**Near this Spot
Are deposited the Remains
of one
Who possessed Beauty
Without Vanity,
Strength without Insolence,
Courage without Ferocity,
And all the Virtues of Man
without his Vices.
This Praise, which would be unmeaning flattery
If inscribed over Human Ashes,
Is but a just tribute to the Memory of
“Boatswain,” a Dog
Who was born at Newfoundland,**

GO TO MASTER HISTORY OF QUAKERISM

1809

January 1, Sunday: The brig HMS *Magnet*, an 18-gun Cruizer-class warship of 182 tons built in 1807, was wrecked in heavy weather while acting as a British convoy escort.

In Spain, the British army had been advancing against the French army, but on this day and the three following days, Sir John Moore would be retreating to Corunna with fatigued and demoralized troops, under an onslaught directed by the French general Soult. Here is an account by Robert Blakeney of the action at Benevente, with Moore having successfully withdrawn across the Esla River and destroyed the bridge behind him:

Bembibre exhibited all the appearance of a place lately stormed and pillaged. Every door and window was broken, every lock and fastening forced. Rivers of wine ran through the houses and into the streets, where lay fantastic groups of soldiers (many of them with their firelocks broken), women, children, runaway Spaniards and muleteers, all apparently inanimate, except where here and there a leg or arm was seen to move, while the wine oozing from their lips and nostrils seemed the effect of gunshot wounds. Every floor contained the worshippers of Bacchus in all their different stages of devotion; some lay senseless, others staggered; there were those who prepared the libation by boring holes with their bayonets into the large wine vats, regardless of the quantity which flowed through the cellars and was consequently destroyed. The music was perfectly in character: savage roars announcing present hilarity were mingled with groans issuing from fevered lips disgorging the wine of yesterday; obscenity was a public sport. But these scenes are too disgusting to be dwelled upon. We were employed the greatest part of the day [January 1, 1809] in turning or dragging the drunken stragglers out of the houses into the streets and sending as many forward as could be moved. Our occupation next morning was the same; yet little could be effected with men incapable of standing, much less of marching forward. At length the cavalry reporting the near approach of the enemy, and Sir John Moore dreading lest Napoleon's columns should intersect our line of march by pushing along the Foncevadon road, which joined our road not many miles in front of us, the reserve were ordered forward, preceded by the cavalry, and the stragglers were left to their fate. Here I must say that our division, imbibing a good deal of the bad example and of the wine left behind by the preceding columns, did not march out of Bembibre so strong as when they entered it. We had proceeded but a short distance when the enemy's horsemen nearly approached the place; and then it was that the apparently lifeless stragglers, whom no exertion of ours was sufficient to rouse from their torpor, startled at the immediate approach of danger, found the partial use of their limbs. The road instantly became thronged by them; they reeled, staggered, and screaming threw down their arms. Frantic women

STEPHEN WANTON GOULD

held forth their babies, suing for mercy by the cries of defenseless innocence; but all to no purpose. The dragoons of the polite and civilized nation advanced, and cut right and left, regardless of intoxication, age or sex. Drunkards, women and children were indiscriminately hewn down -- a dastardly revenge for their defeat at Benevente.... During this day's march [January 4, 1809] the misery and suffering attendant on wanton disorders and reckless debauchery among the men were awfully manifested; some were lying dead along the road, and many apparently fast approaching a similar state. Cavalry horses too were continually being shot. One circumstance I shall mention which roused every feeling both of humanity and indignation. About seven or eight miles from Herrerias, seeing a group of soldiers lying in the snow, I immediately went forward to rouse them up and send them on to join their regiments. The group lay close to the roadside. On my coming up, a sad spectacle presented itself. Through exhaustion, depravity, or a mixture of both, three men, a woman and a child all lay dead, forming a kind of circle, their heads inwards. In the centre were still the remains of a pool of rum, made by the breaking of a cask of that spirit. The unfortunate people must have sucked more of the liquor than their constitutions could support. Intoxication was followed by sleep, from which they awoke no more; they were frozen to death.

On this day Robert Fulton applied for his steamboat patent:

Fulton had all along had in view a much wider field of enterprise than the Hudson River. No doubt it was with a view to securing to himself a monopoly over the whole of the United States territory that he now applied for his first patent. Possibly, too, he had some idea that it might be a "second string to his bow" in case his monopoly of the Hudson broke down, the gathering of a storm for that purpose being already apparent, as we shall see later. His application, which is for "Improvements in Steamboats," is dated January 1, 1809, and the patent was granted February 11th the same year. Fulton's patent is not to be found in the archives of the U.S. Patent Office. It must have perished with many other records in the disastrous fire which occurred there in 1831. The author, however, has been fortunate enough to meet with two MS copies of the specification one in the Patent Office Library, and the other in the Boulton and Watt MSS, which is of such interest as to be worthy of reproduction in full on another page. There are thirteen sheets of tables and drawings attached to it which appear to be based on actual practice. A definite reference is made to the *Clermont*, which is selected as an example, and there can be little doubt that we have now actual drawings of the engine arrangements of that boat if not of the *Paragon* and *Car of Neptune* as well. One of the sheets of drawings gives a "table of the resistance of bodies moved through water taken from experiments made in England by a Society for Improving Naval Architecture between the years 1793 and 1798." Incidentally this refutes one charge of plagiarism

FRIEND STEPHEN WANTON GOULD

STEPHEN WANTON GOULD

GO TO MASTER HISTORY OF QUAKERISM

directed against Fulton. The charge need never have been made, for the information was common property, having been published by the Society in 1798. Practically the whole claim in this patent is for the right proportioning of the engine to the boat and for the combination of the parts. Indeed no other valid claim was possible, as none of the parts in themselves were novel. To elucidate these points, we find a great deal of the text taken up by calculations showing how to obtain the proportions of a boat and of the engine suitable for it to go at 1, 2, 3, 4, 5 or 6 miles an hour with a given load. Fulton finds the total resistance of the boat to be the sum of

i. The immersed cross section of the boat in square feet multiplied by the "plus and minus pressure" the co-efficient for which he obtains from a table, based on the aforementioned experiments, for each of the speeds named.

ii. The friction of the sum of the areas of the bow and stern together multiplied by a corresponding coefficient.

iii. The friction of the sides and bottom of the boat similarly calculated.

To this total he adds a like power for the paddle-wheels. As these are always to go at twice the speed of the boat, and as he assumes the piston speed to be constant, he is able to decide the necessary ratio of gearing and a convenient diameter for a cylinder to give the power required. Following upon his calculations for a boat to run at 6 miles per hour he remarks:

"As to 6 miles an hour, were it attempted and to succeed, I should consider it more a work of curiosity than utility, as I do not believe it possible to build a steamboat with any engine which is now known to run 6 miles an hour in still water, and carry either passengers or cargo to pay the expenses."

He retained the same opinion even as late as 1811, for, writing on January 9 to Dr. S. Thornton, superintendent of the American Patent Office, he says: "If you succeed to run 6 miles an hour in still water with one hundred tons of merchandise I will contract to reimburse the cost of the boat and give you one hundred and fifty thousand dollars for your patent, or if you can convince me of the success by drawings or demonstrations I will join you in the expenses and profits." Such an attitude of mind in a man like Fulton seems hardly credible, especially seeing that in 1802 he had anticipated a speed of 16 miles per hour; with the steady advance that he was making, it was not more than a year or two later before one of his own boats was doing what he now considered impossible. On October 2, 1810, Fulton applied for another patent for "constructing boats or vessels which are to be navigated by the power of the steam-engine"; it was granted on February 9, 1811. It is supplementary to the first, and in it he claims, among other things, the coupling boxes, wheel guards, fender strakes, covering over the paddle wheels, placing the steering wheel forward, and hogging

STEPHEN WANTON GOULD

FRIEND STEPHEN WANTON GOULD

frames. Many of these details, while no doubt originating with him, had been public property for some years, so that the patent could hardly have been worth anything, and had the claims been successfully maintained it would have done more to retard than advance the progress of steam navigation. The patent is interesting chiefly for the drawings which illustrate some advance in engine construction. One of the drawings foreshadows very clearly the side lever engine which remained for forty years the accepted type for steam navigation. We have already alluded at some length to the monopoly of the waters of New York State enjoyed by Fulton and Livingston, and it is now necessary to explain why it was that it conferred such enormous powers and privileges, and why such a protracted and bitter legal fight was instituted to compass its overthrow. The basis upon which the monopoly rested was that the State of New York claimed jurisdiction over all the waters of the Bay and of the Hudson River up to low water mark on the mainland or Jersey shore. As it was for the navigation of these waters that the State of New York had granted a monopoly to Livingston and Fulton, and as no steamboat could approach New York and enjoy trade with the City without traversing this stretch of water, we can see how it was that these two monopolists were able to keep out all such men as Colonel John Stevens with his steamer the *Phoenix*. This claim on the part of the State of New York was founded neither on reason nor on common sense. A river or lake suggests itself naturally as a boundary between adjacent territories, and, when it is accepted as such, common law assumes that the boundary is in midchannel or in the deepest part. Now the State of New Jersey had always repudiated the claim of the State of New York; indeed in 1806 New York had consented to the appointment of a joint commission to try and come to an agreement but without result. It seems to us that it would have been an obvious course for New Jersey to have appealed to the United States Supreme Court for a settlement of this dispute, but possibly the temper of the people was too independent for such a course. Now that steam navigation had been introduced and the financial considerations involved were considerable, the question assumed very great importance. Livingston and Fulton's monopoly is so inextricably bound up with it that one can hardly be discussed without the other. The first attack upon their vested interest appears to have been made in 1810 or at the beginning of 1811, when a company was formed at Albany to run in opposition to the Fulton line. Their first boat, the *Hope*,— Captain Bunker, was launched March 19, 1811, and their second, the *Perseverance*, Captain Sherman, somewhat later. Soon after they were placed on the station. The rivalry between them and the Fulton line culminated in a steamboat race the first in history and the forerunner of a kind of sport much indulged in subsequently. Both boats left Albany at 9 o'clock on the morning of July 27, the *Hope* leading. This position was maintained until the boats were within two miles of Hudson, when the *Clermont* by reason of her lighter draught took advantage of the shallows and tried to pass the

FRIEND STEPHEN WANTON GOULD

STEPHEN WANTON GOULD

Hope, which perforce kept to the channel. A collision resulted which, while not injuring either boat, put a stop to the race. Captain Bartholomew of the *Clermont* at once challenged the doughty Bunker to compete for a stake of 2000 dollars aside over any distance, but the latter declined. In order to counteract the designs of the opposition steamboat company Fulton and Livingston sought the advice of Thomas Addis Emmet, brother of Robert Emmet the Irish patriot and a famous advocate, who gave a long opinion, dated January 19, 1811, in which he first recites the essential substance of the grants and the acts upon which their monopoly was based, substantially as has been given already. He then sets out the questions to be answered as being:

"1st. What is the effect and validity of the State Laws in conferring any and what exclusive right on Messrs. Livingston and Fulton.

2nd. By what process can they carry into effect their right under the State Laws to the boat and to the Penalty."

After discussing the powers that the several States delegated to the Federal Constitution when the latter was formed, particularly with reference to useful inventions, he gives it as his opinion that:

"After the adoption of the Federal Constitution no State Legislature had any authority to grant an exclusive right of making, constructing, or employing any machine or invention."

This opinion of course covered both questions, but assuming the State law to be valid, he gives it as his further opinion that the forfeiture of the boat, &c., could be enforced, and also that Livingston and Fulton might: "take and hold possession of the forfeited property without any preceding process of law, if they can accomplish that object without a breach of the Peace." There are marginal notes on the document signifying disagreement with the opinion expressed which cannot have been otherwise than unpalatable. There was, however, no need to let the opinion be known, and Fulton and Livingston evidently decided to rely still on their original Act of Legislature. That Emmet's opinion was a true one the decisions of the courts subsequently showed. The danger that threatened them only deepened when on January 25, 1811, the Legislature of New Jersey passed an Act declaring that: "the citizens of New Jersey have a full and equal right to navigate and have and use vessels and boats upon all the waters lying between the States of New Jersey and New York, in all cases whatever not prohibited by the constitution, or any law of the United States." The Act further provided that any person whose boat might be seized under the law of New York should have a right to retaliate upon any steamboat belonging to citizens of that State which might come into New Jersey waters. The provisions of this Act were much less defensible than were the claims of New York. It carried matters from bad to worse, and was in fact a direct encouragement to piracy. The New York Legislature quickly responded in April 1811 by a law

STEPHEN WANTON GOULD

authorizing Livingston and his associates to seize any steamboat infringing their monopoly, but providing that such steamboat should be held till the settlement of the case. The only course now open was to attack the opposition steamboat company in the law courts. Fulton must have felt shaky about the validity of Livingston's original Act if submitted to searching attack in the courts, and he seems to have thought it best to prepare evidence by affidavit or deposition as to his actual priority in successful steam navigation. For this purpose he wrote to all his friends to secure their interest. One letter to Earl Stanhope is so interesting that we give it in full:

NEW YORK, April 10, 1811.

"MY LORD, In my former letters I gave you an account of the success of my steam boats, which has been so great that, like every other useful and profitable invention, attempts are now making to evade my patent rights, and deprive me of my mental property. I am therefore under the necessity of collecting all possible evidence of the originality and priority of my invention, in which water wheels of right proportions and velocities are of first importance portage. Your Lordship will recollect that, while was in Devonshire in 1793, I wrote you a letter on using perpendicular oars or wheels to propell steam Vessels, of which the inclosed is an exact Copy; it was accompanied with other mechanical speculation which you may yet find among your papers; if so or your Lordship can distinctly recollect it, it will be of infinite service to me, and my cause, and I shall esteem it a particular favour if you will certify on the inclosed letter and drawing before the American consul or a notary public that the inclosed is a true copy of a letter written to you by me on steamships in 1793: such testimony will be important on the tryal which will commence in September next, in this City, and on which I have at least 7000 pounds sterling a year at stake. No one feels more sensibly than your Lordship the sacred right of mental property, no one knows better the difficulties which interposed to rendering steam Boats useful, and my clear right to my specific combinations; which have rendered them useful, In which the wheel in my opinion is indispensable. Your Lordship will therefore in so important a suit not hesitate to give evidence for an old friend and have the goodness to certify on the inclosed letter the time you received the original from met after which certificate have the goodness to deliver it to the American Consul general in London, who will forward it to me. I will also thank your Lordship to let me know if there be any steam boat in operation in England or Ireland, if so, when built, by whom and how is she constructed; this information will be esteemed a favour in a private letter. I have seen the specification of your Lordship's Stanhope Weatherers with a plan for defending them against torpedoes, the ship is Very ingenious, but the Torpedoes are now so far improved that any plan I have yet seen cannot defend a ship against a Vigorous attack with them. Our friend Barlow is going Ambassador to St. Cloud at which place I hope his talents

will be of use to our country, which is rapidly improving and every day gaining strength although our exterior commerce is much embarrassed. The Edict of Nantz gave manufactures to England which she never lost but improved and multiplied to the sapping of the resources of France, the British orders in Council, the Berlin decrees, the war in Spain and Portugal, which has sent 8000 Mireno Sheep to this country in which they thrive and Improve, has given to us manufacture in Cotton, in Wood and Iron for which we now have the raw material in abundance, which manufactures we shall never loose but improve and multiply and which must tend to diminish or at least to produce the effect of not increasing in so rapid a degree the resources of England and France.

Have the goodness to remember me kindly to Mrs. Falkner; may success attend your Lordship's useful pursuits and happiness be your companion, is the sincere wish of

Your most obedient

ROBT. FULTON

THE RIGHT HONBLE. THE EARL OF STANHOPE.

P.S. When I left London in 1806 there was no such thing as a steam boat anywhere in use in Europe; if any thing of the kind has since been established in England or Ireland, I will thank your Lordship for the particulars of her size and Velocity, to what purposes applied; by whom made and at what time and how propelled?

In a letter to Barlow, dated June 28, 1811, he gives further details with reference to this opposition steamboat company:

"My time is now occupied in building North River and Steam ferry boats, and in an interesting lawsuit to crush 22 Pirates who have clubbed their purses and copied my boats and have actually started my own Inventions in opposition to me by running one trip to Albany: her machinery however gave way in the first voyage and she is now repairing, which will detain her I presume until we obtain an Injunction to stop her. A more infamous and outrageous attack upon mental property has not disgraced America. Thornton has been one of the great causes of it. In this interesting suit which places a great fortune at stake I want you to go or send Lee to Thornton's office and demand a certified copy of my transfer of one half of my United States patents to Robert R. Livingston and let the certificate state that such transfer is legally registered in the patent office."

The transfer of one half of Fulton's interest in his patents to Livingston was in accordance with their original agreement. Fulton also sends with the letter a deposition as to what his achievements in steam navigation had been; this he asks Barlow to persuade Thornton to sign, as if it were his own production. Thornton did not do so, by the way, but the deposition, giving as it does Fulton's side of the case, may be taken as correct where it gives credit to another than himself, as he does in one sentence:

STEPHEN WANTON GOULD

"John Stevens Esq. of Broadway, in the City of New York, is the first ... who has communicated the power from the piston rod to the water wheels by means of crank wheels and shackle bars which work on each side of the Cylender."

This was the return connecting-rod or steeple engine. The lawsuit dragged on wearily, as only lawsuits can; and Fulton, evidently thinking he must get further evidence, wrote to Boulton, Watt & Co., asking for an affidavit from the great James Watt himself. As Watt had retired from business twelve years before, it is unlikely that he would want to be worried with such a matter; the firm may have sent a reply; if so, we have no record of it. Fulton's letter is as follows:

NEW YORK, January 4th, 1812

MESSRS BOULTON & WATT
GENTLEMEN,

In consequence of the non-intercourse and the impossibility of getting the original to this country at present I have delayed for a long time to answer your letter, But you will please to finish the engine in the usual way with perpendicular Valves, as the wheels must have the power of turning Backwards and forwards and I will remit you the remainder of the Cost. In a conversation with Mr. Watt Senior in Paris I think in 1803 or 2 I believe he gave it to me as his opinion that it was impracticable to make a useful steamboat or Vessel, I have however succeeded to make a Vessel 176 feet long 23 feet beam drawing 2 feet 6 inches of Water run 6 miles an hour in Still water, which Useful invention like your useful steam engine is already copied without my consent and my patent right Violated I am involved in a very expensive and important lawsuit, the Enemy cannot deny that they have copied, But they hope to succeed in proving that I am not the Inventor, for which purpose all abortive projects to navigate boats or Vessels by steam wheels [that] have been made within the last 30 years will be collected, in evidence against me, some of which however bear the least resemblance to the combinations or principles of my boats: But as such high authority as Mr. Watt would be of great importance to me on the tryal, I should esteem it as a great favour if he would State whether there was to the best of his knowledge a steam boat of any kind or what kind anywhere in permanent and efficient operation anywhere in the three kingdoms in 1803 or to the best of his knowledge anywhere in Europe. And what was his opinion and appeared to him to be the prevailly [sic] opinion of the practicability of making good steam boats, such for example as should run 5 miles an hour in still water and carry 100 tons; was it his opinion in 93 that such a project was practicable or was the mode of effecting it know[n] to him at that time or, to the best of his knowledge known to any other person, A Certificate of these facts as they appeared to him in 93 And affirmed to before the mayor of Birmingham And in presence of any American who may be at Birmingham and witnessed by by [sic] him, and particularly if he should be a person resident

in New York, Boston or Phila would be exceedingly useful to me. Or should any respectable gentleman of Birmingham see Mr. Watt affirm to the certificate and such person be going to London could swear before Mr. Jonathan Russel American Charge des affairs that he knew it to be Mr. Watts handwriting. It would render the evidence on the science of steam boats in 93 Legal in our courts and Mr. Russet would transmit the certificate sealed with his official seal to me; Gentlemen, you have known so much of the unblushing piracy of your own Inventions and the importance of evidance to defend such rights, That I shall hope for this most respectable and friendly evidence on the opinion and state of the science of steamboats in 93 which is the year I built my first boat, on the Seine near Paris and established all the powers proportions and velocities of parts which have given complete success to all the boats since built on these principles. hoping for an answer to this letter as soon as possible
believe me gentlemen with the greatest esteem and respect your most obedient
ROBT. FULTON.

The conversation that he mentions as having had with Watt in Paris in 1802 or 1803 cannot have taken place, as Watt was not there in those years. Besides, from the tone of Watt's reference to Fulton in a letter to a third party about this time, it would appear that they had never met. The case was tried at Trenton, N.J. Fulton's party was represented by their friend Thomas A. Emmet; lawyers of equal eminence being on the other side. Great stress was laid on the letter written from Torquay to Lord Stanhope in 1793, and capital was made out of the fact that the letter put in by Fulton was a recent copy of it. No one seems to have thought of Fulton's book on Canals, where this correspondence is referred to; that would surely have substantiated his statement. In the end, an injunction against the opposition steamboat company was obtained, and their boats, of which two had been built, were confiscated and destroyed. Hardly had this case been disposed of than opposition arose in another quarter. It appears that Colonel Aaron Ogden, an eminent citizen of New Jersey, in conjunction with Daniel Dod, a well-known engine-builder, had constructed a steamboat called the Sea Horse, with which they intended to establish a ferry service between Elizabethtown, N.J., and New York. The engine of this vessel, by the way, was the first of the walking-beam type, which afterwards became so common, and Dod is usually credited with its introduction. Finding that the Fulton monopoly prevented him carrying out his plan, Colonel Ogden petitioned the New York Legislature to rescind the monopoly. The resolution, to effect this, was lost by one vote only. However, Colonel Ogden, who had been chosen by the Legislature of New Jersey on 29th October 1812 to succeed Joseph Bloomfield, as Governor, managed to get a law passed by that body on November 3, 1813, granting to himself and Dod the exclusive right to run steamboats on the waters of New Jersey. The Livingston party were at once up in

STEPHEN WANTON GOULD

FRIEND STEPHEN WANTON GOULD

GO TO MASTER HISTORY OF QUAKERISM

arms, and appealed to the next Legislature in 1814, to repeal the Act. Again the Livingston party were represented by Thomas A. Emmet; while the other party had two equally famous lawyers. The result was that the New Jersey grant was repealed on February 4, 1815. Unfortunately, while this struggle was going on, Chancellor Livingston had died at *Clermont*, on February 26, 1813, at the age of sixty-seven; and just in the hour of victory Fulton contracted the chill which cut short his career. We must, however, briefly pursue the vicissitudes of the steamboat monopoly. The matter was settled for a time by Colonel Ogden buying from the executors of Livingston and of Fulton the exclusive right to run ferry-boats for ten years on the route between Elizabethtown and New York. He did not enjoy the privilege long before another storm began to gather on the horizon. Thomas Gibbons, a wealthy Southerner, who passed the summers at Elizabethtown, saw the desirability of running steamboats, and started an opposition line with the Bellona and the Stoudinger. By a strange vicissitude of fortune, it was the turn of Colonel Ogden, who had been the bitterest opponent of the steamboat monopoly, now to defend it against Gibbons. The latter was a lawyer and a man of means; as neither party would give way, the suit dragged on till it reached the U.S. Supreme Court, which in 1821 dismissed Gibbons case on technical grounds. Beaten, but not crushed, he instituted a fresh trial. He engaged as his counsel Daniel Webster, the famous jurist, who argued that the monopoly infringed the prerogative of the Federal Government to regulate commerce, and that therefore it was unconstitutional. The result of it was that in March 1825 the United States Court of Errors, sitting at Albany, decided by a majority of 22 to 9 that no State could grant a monopoly of navigation. The Senate Chamber and gallery were crowded with people anxious to hear the decision of the Court on this momentous case. Thus ended a most oppressive monopoly, at the cost of ruining one at least of the parties. The Boundary dispute, however, still flourished, and it is interesting to note the sequel. In 1829 at the instance of the State of New Jersey, the Supreme Court appointed a Commission, with representatives drawn from both States, to settle the question. They arrived at an agreement whereby New York so far abandoned their previous claims as to fix as the boundary the middle of the Hudson River, of New York Bay, and of the waters between Staten Island and New Jersey, subject to certain claims of jurisdiction over the Bay and the Hudson south of Spuyten Duyvel Creek. This agreement was ratified by both States in 1834. As the meaning of the term "middle" was not clearly defined, it was not long before renewed controversy arose. This was brought to an acute stage when about 1870 the Central Railroad reclaimed land from the Hudson at Communipaw, by filling in. Under their agreement of 1834, New York State claimed jurisdiction over the reclaimed land. The case was taken to the New York Court of Appeal, who decided that the jurisdiction given to New York under that agreement was only for sanitary and police purposes.

FRIEND STEPHEN WANTON GOULD

Finally, in 1888, Commissioners from the two States exactly located the boundary-line in the middle of the channel of the river and bay. Thus was settled a controversy which had lasted for over a hundred years. We must now cast our minds back a little way to the year 1810 which may perhaps be said to have been the heyday of Fulton's mental and commercial activities; for besides the large number of steamboats built or projected for various parts of the Union, Fulton meditated nothing less than the introduction of steam navigation throughout the civilized world, so great was his belief in its commercial future. To this end he enlisted in his interest, for exploiting English territory, the services of Mr. J.C. Dyer, a man already favorably known as an inventor. Many years later, after he had settled down to end his days in this country, he, when an octogenarian, told the story of his voyages on the *Clermont*, and his connection with this enterprise: "I undertook, in 1811, the task of inducing some of the leading engineers and capitalists of London to engage in the construction of steamboats, on Fulton's plan, to run on the Thames and other waters in this country. I had obtained from Mr. Fulton (through a mutual friend) a full description, and the drawings of his inventions and discoveries relating to steam navigation with the result of his labours in America. But I found it impossible to convince any of them that steamboats could be made to run with safety and profit in the English waters...." "...Many of my personal friends urged me strongly not to waste my time and money on so hopeless a task as that of introducing steam navigation into England. Even the great and scientific engineer, John Rennie (father of the present eminent Sir John Rennie), urged me, with parental kindness, to drop all thoughts of bringing these boats into use and this after having Fulton's plans before him, and fully admitting their success in America." In the spring of 1814 Mr. Peter Ewart expressed to Dyer the opinion that "it did not appear likely that they (i.e. steamboats) could ever come into general use in the waters of England," and this in spite of the fact that he knew of Bell's success on the Clyde in 1812. Dyer goes on to say: "In that year (i.e. 1814) I lent Mr. Ewart Fulton's specifications and drawings, which were sent by him to Boulton and Watt, and returned to me about six months after. have reason to believe that that eminent house was led thereby to make further and more exact inquiries concerning the progress of steam navigation in America; for they, as well as several other engineers, commenced building steamboats in 1815 and 1816. Even Bell's success with his vessel the *Comet*, the centenary of which has just been celebrated, must be attributed in some measure to Fulton. Bell's account of their intercourse is given in a letter he wrote in 1824. He came at different times to this country, and stopped with me for some time. He published, soon afterwards, a Treatise on Canal Declining Railways. I have this Book at hand, but you may obtain it by applying to Mr. Taylor, bookseller, London, price 21s. Mr. Fulton published this work in England in 1804 and on his way to France called on me; and

also when he returned. He was employed by the American Government to come to England, to take drawings of our cotton and other machinery, which quickened his desires after all the engineering branches; these he took up very quickly. He was also a good painter, and excelled in miniature likenesses. When I wrote to the American Government on the great importance of steam navigation they appointed Mr. Fulton to correspond with me.... "Although, from what has gone before, we know that this is a garbled account, yet it is just what one might expect from a comparatively uneducated man like Bell. We shall not be far wrong in gathering from it that he and Fulton first met in 1804 because that date is corroborated by another account given by Bell in 1816. If so, it must have been at the time that Fulton went to see Symington's Charlotte Dundas. It was a letter of Fulton's, written after he had achieved success with the *Clermont*, that stirred up Bell. He says:

"This letter led me to think of the absurdity of writing my opinion to other countries and not putting it in practice in my own country; and from these considerations I was roused to set on foot a steamboat for which I made a number of different models before I was satisfied."

The story of the difficulties and trials that beset his path is a long one; suffice it to say that five years, almost to a day, elapsed before he succeeded, although on a much smaller scale, in repeating Fulton's achievement. James Watt, Junior, in 1816 engined an experimental boat, and tried her across the German Ocean and up the Rhine. Thereafter his firm engaged very extensively in the marine engine business. It was not very many years later to be exact, in 1819 that Mr. Rennie had quite changed his mind, and he constantly thereafter urged upon the Admiralty the value of steam-tugs in towing men-of-war. Thus were the tables completely turned. It will not be difficult for the engineering reader with the aid of the drawings attached to Fulton's patents to trace the evolution of the side-lever engine from his first engine of 1804; and we can, therefore, with every confidence, attribute the germ of this design to him, and thus give the credit where it is deserved. After England, Russia appears to have had an attraction for Fulton as a field for enterprise. He wrote, in November 1811 to John Quincy Adams, then American Ambassador in Russia, to ask him to obtain an exclusive right for twenty years for a steamboat-service between St. Petersburg and Cronstadt, to be established in three years after obtaining the grant. A Russian gentleman, Chevalier Swinine, wrote to Fulton a very significant letter, offering his services. How he had got wind of the affair does not appear, but an extract from his letter will be of interest:

"Doubtless, Sir, it is known to you that for several months past I have been taken up with your admirable invention of the steam boat, dedicating all my knowledge for its introduction in Russia. As you have received the Imperial permission for this introduction, I offer you, Sir, my services which I flatter

FRIEND STEPHEN WANTON GOULD

STEPHEN WANTON GOULD

myself may be of great utility. Certainly it will be necessary for you to have the plan of the River Neva and of the channel from St. Petersburg to Cronstadt to have the clearest information of the value of materials necessary for the construction of the steamboat, the description of other communications by water in Russia."

His conditions were that he should have the title "Superintendent of the Steamboats of Russia"; and, of course, that he should have an annual salary. The principal point to observe is that Fulton had received the Imperial permission to introduce steamboats. Naturally he wanted a good deal more than this, and on April 12 1812 he wrote to the Chevalier, saying, that he must wait for Mr. Adams's answer, for until then he could not decide what to do. We know that a steamboat, the Emperor of Russia, was on the stocks at the time of Fulton's death, and it has been suggested that it was built for the service under consideration, but as there were no means of getting it to Russia, this could not have been the case; the name must have been given merely as a compliment, but it goes to show that there was something below the surface. As a matter of fact, the first experiments on the Neva were made in November 1815 by Charles Baird, Superintendent of the Mines, with a barge which had been rebuilt for the purpose, and fitted with an engine of the side-lever type and an externally fired boiler having a brick chimney. These experiments were successful, and in 1817 Baird built a vessel 60 feet long especially for steam propulsion and with her established a passenger service between St. Petersburg and Cronstadt. This engine was almost identical with that shown on Sheet 2 of Fulton's second specification and if the design was not obtained from him then all that can be said is that the coincidence is very remarkable. The boiler, too, was just the kind that Fulton was in the habit of fitting. Some day the true relation to one another of these significant facts will be made plain. We do know that Baird had a monopoly of steam navigation on the Neva for twenty years and thereout drew no small return. Then again India seems to have had a fascination for Fulton, attracted no doubt by the size of her rivers and the teeming population on their banks. He entered into an agreement with a certain Thomas Law to introduce steamboats on the Ganges. In a letter to him dated April 16, 1812 Fulton says: "I agree to make the Ganges enterprise a joint concern. You will please to send me a plan how you mean to proceed to secure a grant for 20 years and find funds to establish the first boat. This work is so honorable and important. It is so grand an Idea that Americans should establish steam vessels to work in India that it requires vigor, activity, exertion, industry, attention, and that no time should be lost. My Paragon beats everything on the globe for made as you and I are, we cannot tell what is in the moon; this Day she came in from Albany 160 miles in 26 hours, wind ahead." The letter finished with the words "Keep the Ganges Secret." Here again, sad to relate, some hitch occurred, whether due to Fulton's death or not we do not know, and no steamboat was seen

January 12, Thursday: Two persons standing upon the remote beach at Sandside, Caithness, Scotland, saw a face “round and plump and of a bright pink hue” in the sea. Observing more closely, they saw what appeared to be well-formed human breasts. Upon occasion this creature lifted what appeared to be a long white arm above the waves and tossed back what appeared to be its long green hair. When this was reported in the local newspapers, a schoolteacher responded that some 12 years earlier he also had seen such a being on a local beach, which “remained on the rock three or four minutes after I observed it, and was exercised during that period in combing its hair, which was long and thick, and of which it appeared proud; and then dropped into the sea, from whence it did not reappear to me.”

January 16, Monday, noon to 7PM: During the Peninsular War, in a battle in Spain's province of Corunna that is bounded on the north and west by the Atlantic (centered on the port of La Coruña), the British commander, General Sir John Moore, was mortally wounded and command passed to Baird and in due course to Sir John Hope. The battle was a delaying tactic while the British destroyed their stores and extricated themselves by embarking before they could be fully engaged by superior French pursuing forces under General Soult, and is considered by the British despite 2,300 casualties as a victory — because they did indeed succeed in extricating themselves.

CHARLES WOLFE

Henry Thoreau would not be much impressed by this sort of military obedience unto death:

“RESISTANCE TO CIVIL GOVERNMENT”: Visit the Navy Yard, and behold a marine, such a man as an American government can make, or such as it can make a man with its black arts — a mere shadow and reminiscence of humanity, a man laid out alive and standing, and already, as one may say, buried under arms with funeral accompaniments, though it may be

“Not a drum was heard, not a funeral note,
As his corse to the rampart we hurried;
Not a soldier discharged his farewell shot
O'er the grave where our hero we buried.”

The mass of men serve the state thus, not as men mainly, but as machines, with their bodies. They are the standing army, and the militia, jailers, constables, posse comitatus, etc. In most cases there is no free exercise whatever of the judgment or of the moral sense; but they put themselves on a level with wood and earth and stones; and wooden men can perhaps be manufactured that will serve the purpose as well. Such command no more respect than men of straw or a lump of dirt. They have the same sort of worth only as horses and dogs.

The child named Abraham would go on to become revered first as the bravest of frontier Indian-slayers and then as the author of an “[emancipation](#)” order in which he purported to have set free all persons whom he had no power to set free while keeping in slavery all persons whom he had the power to keep in slavery — surely one of the most cynical political documents ever produced by the powers of the human mind. The child named Charles would go on to author one of the most inspiring scientific treatises ever produced by the powers of the human mind, on the origin of species, and to be condemned as the creator of a new pseudo-scientific legitimization for the black [slavery](#) that as a young man he had seen in brutal practice along the coast of South America — a slavery which, for the remainder of his life in his comfortable home in Down, England, would be giving him recurrent nightmares and attacks of panic.

I hold that people are guilty of Sin in proportion to the light & knowledge they have received & that contracting matrimony with one not of Society [not a Quaker] is more sinful for him than most young men of my acquaintance, is, what I firmly believe, because he hath known more of religion & been more remarkably visited with the inshinings of that light which would have been as a light to his paths & a lamp to his feet than most young men - My dear H

6th day 26th of 5th Mo 1809// My dear H again rested well last night & little Caleb never waked from the time he went to bed till nearly sunrise - I feel gratitude indeed for this days favor, & Oh father increase in me a grateful disposition for all thy mercies, all they Blessings - Wrote to my dear friend Susanna Barker giving her an account of our well fare & my feelings - This evening called at D Huntingtons to see our ancient friend James Bringhurst, he has been a long time confind at Holder Almys but is now recruiting, tho' very feeble - he gave me the following lines written very fine on a peace of paper with his own hand, since his confinement, being 78 Years of age last 12th Month -

*Could but our tempers move like this machine
Not urged by passion or delay'd by Spleen
But true to Natures regulating power
By virtuous acts distinguish every hour
Then health & Joy would follow as they ought
The Laws of motion & the laws of thought
Sweet health to pass the present moments o're
And endless Joy when time shall be no More*

It was written in lines about an inch & 1/4 long & all the lines within an 1/2 of paper which for a man so advanced in life is remarkable -

While setting with the dear old Man so advanced in life I could but reflect on the apparent difference between him & myself, he near the grave weak & feeble, & I in Youth & activity, & yet may be called to render an account much sooner than him. Oh that I may when the time comes, be in a frame of mind like his

[Thomas Paine](#) died in New-York (well, we all must die somewhere). His request that he be buried as a [Quaker](#) had been refused by the [Religious Society of Friends](#). His age (72) would be incorrectly registered on what is said to be his gravestone on his farm in New Rochelle, New York (a stone which neglects to mention the interesting fact that although it is stating the truth when it states that he was buried there, in fact his body is no longer in the vicinity). An obituary notice published throughout the United States would sum up his life in the phrase “He had lived long, did some good and much harm.” What was this man’s offense, that had called forth such a bitter dismissal in an obituary? Well, it seems that when this citizen’s country had fucked him over, while he had been serving it selflessly at great personal risk and loss during the period of its greatest difficulties, **he had noticed and he had objected**. A word to the wise chauvinist: when your country eventually fucks you over, **you aren’t to notice** — no, that’d be very disloyal of you. You’re supposed to just grin and grit your teeth, and go on playing the patriot.

"The death bed scenes & observations even of the best & wisest afford but a sorry picture of our humanity. Some men endeavor to live a constrained life — to subject their whole lives to their will as he who said he might give a sign if he were conscious after his head was cut off — but he gave no sign Dwell as near as possible to the channel in which your life flows."

June 9, Friday: Horace Mann, Sr.'s father made his will. He left Horace enough to finance a college education, although later, in the grip of the “log cabin” school of greatness, the great Mann would assert that he had been provided only with an “example of an upright life” and a “hereditary thirst for knowledge.” – Since he was encouraging everyone to be like him and rise like him, **it would hardly do to tell the truth.**

July 6, Thursday: In retaliation for Emperor Napoléon's excommunication of June 11th, French troops arrested Pope Pius VII and conveyed him to Grenoble.

After two days of fighting at Wagram, the cost of the battle had been 70,000 casualties or approximately a quarter of each of the opposing armies. When the Austrians retreated the French were too exhausted to pursue.

On this day or the following one, [George Gordon, Lord Byron](#) and Hobhouse arrived in Lisbon

July 10, Monday: French troops caught up to the retreating Austrians at Znaim (Znojmo). As the battle was joined, the Austrians asked for an armistice.

Friend [Stephen Wanton Gould](#) wrote in his journal:

2nd day 10 of 7th Mo // I understood early this morning by Uncle Wm & aunt Hannah Mitchell that Anne Merrett had a prospect of appointing a meeting for Members today - which after breakfast was concluded upon, & accordingly I gave information generally in the North part of the town

In understood also that last evening they were at father R's & that Anne appeard sweetly in supplication - I wish My H & I could have been there, but as we did not know of it & she could not have gone if she had. I hope we shall be contented, perhaps it will be made up to us in some other way -

At 4 OClk this Afternoon the meeting met according to appointment. Anne Soon stood up & addressed several states in a very pertinent manner, & considering our state it was a pretty, indeed very good meeting, the middle aged parents & youth were particularly encoraged to come forward with firmness in the cause of truth & lift up the Ancient standard to those around us that our light may shine as in the early days of our Society. She feelingly [?] put a precious seed among our youth & indeed among each class among us who were laboring to be faithful in their day

In the eveng Anne, with Uncle Wm & Aunt H Mirchell, father & Mother R & Elizabeth Hosier came up to make my dear H a little visit as she could not be at meeting this Afternoon. Still the prospect of Issue was dreaded as an expence & burden that I could not bear at least with fortitude - but now having come to the touch, I find I can get along for aught I see at present as well as before, & that so far from the childs being troublesome it is an amusement & affords a Secret something to the mind that I am incapapble of describing -In short it is an addition that I am sure no one in the married state can be compleatly happy without - Yet I know the most difficult or critical time has not come yet. I have much more to see & feel both inwardly & outwardly. The dear little fellow may be sick & cost me many sleepless nights, my buisness may fail, & many things happen to break my happiness, but Oh that I may be thankful for the present favor, & all that I have received & may receive.  July 29, Saturday: [George Gordon, Lord Byron](#) and Hobhouse arrived in Cadiz.

American slaver captains like La Coste of South Carolina, caught red-handed and convicted, were usually at the last moment the beneficiaries of “executive clemency” by the President of the United States. For instance, on this day our new President, [James Madison](#), himself the proud owner of other human beings, pardoned the skippers of 15 vessels arriving at New Orleans from Cuba with 666 white persons and 683 negroes (in fact, as we can see by inspecting PARDONS AND REMISSIONS, I. 179, this President would remit each and every such penalty incurred, during his entire term in the office, under the Act of 1807). He must have been a truly compassionate man, for he never met a slaver he couldn’t sympathize with.

INTERNATIONAL SLAVE TRADE

It appears that our President, although he could sympathize with the sinner, could not sympathize with the sin, for during this year he would appear before the federal Congress to challenge the Representatives and Senators thusly: “[I]t appears that American citizens are instrumental in carrying on a traffic in enslaved Africans, equally in violation of the laws of humanity, and in defiance of those of their own country. The same just and benevolent motives which produced the interdiction in force against this criminal conduct, will doubtless be felt by Congress, in devising further means of suppressing the evil.”⁶²

GO TO MASTER HISTORY OF QUAKERISM

3rd day 8 of 8 Mo// Tho' a friend has been in the Shop this afternoon with whom I have conversed sociably, yet I feel depression hanging about me, may way seems hedged about, I feel no great encouragement as to an outward Subsistence, tho' I have been married a Year lacking about three days, & have made out to live comfortably & pay my rents & am not more behind hand than I am able to pay, except one debt recently contracted & I have the property on hand which occasioned it - yet I do not gain ground & am pretty much where I was last year, I desire to be thankful for even that, & it is no small matter to be thankful for, but it would seem a little more like security to be in a way of laying up a little so as by & bye to be able to procure a small dwelling place for myself & dear Wife to live in, but Oh that for every favor, however small, may I have a thankful heart to him who maketh Rich & maketh poor at his pleasure & may my confidence continue & increase for his mercy & tender regard is over all his works - I dont know but for the last six months I may have experienced something of a growth in Wisdom, but there is much Yet to be done, many deaths to die, before the will can be brought into a right subjection. Oh that the work may not stop but progress untill it is fully accomplished

Our abovementioned friends, accompanied by Gideon Seman & Abigail Robinson made us a visit this Afternoon. H Field began first, by observing that it was very comfortable to see a young pair coming up together speaking the same language & striving to be helpful one to another & in society & spoke very encoring [encouragingly] that we might hold on our way. E Griffin spoke next to the same effect - then A Robinsons had considerable to say desiring that we might be helpful in raising the standard of truth from its low condition among us & Said considerable

to my dear H Rodman While at meeting I reflected on what passed
twelve months ago, but could not realise it as at some other
seasons - so it is Times & Seasons are not at our command - Our
friends Easter Griffin & H field with their companion Gideon
Seaman were with us A Robinson opened the service in a few words
which is the first time in a long time that she has opened her
mouth in a public meeting in [Newport](#). H Field then had a long &
living testimony to bear among us wherein she couched much
excellent doctrine & intructive counsil to many State,
particularly the Youth - Then Easter appeared in supplication
in a most Powerful Manner on behalf of all classes & ranks,
particularly the Aged, Youth, those that are at ease in Zion the
Ministers, the Elders, & burden bearers of society, a sweet
solemnity coverd many minds & I have no doubt but the living
Power of truth was over the Assembly many being melted into tears
- A young man by the name of [here there is a blank] Parker was
at meeting from Boston, he was very attentive to the friends
when there & invited them to his fathers house & seem'd very
desirous of being acquainted with friends principals & asked
many questions relative to them, & now being at [Tiverton](#) &
hearing of their being here came on purpose to see them - he is

6th day 8th of 9th Mo// Dear Old James Brinhurst has been this forenoon to my shop & set a little while & has just gone, he seems to be in a very sweet frame of mind & indeed such a visit I have not had from any body in a long time. I was much affected at being in his company, & a spark of (I trust) divine life was livingly kindled in my mind. – to see an Old man who has wethered out the adverse storms of life & been thro' all preserved in sweet innocency is truly beautiful, he appears now to have nothing to do but patiently wait the final change which will doubtless be very soon – Oh saith my soul may all that is within me that is opposed to the divine will be brought into Subjection –

My mind has reverted frequently this Afternoon to the Visit from Dear Old James – It did seem like the renewal of love & life in my heart – My H & little Son, with Cousin Eleanor spent the day

Lord for his many favors to the workmanship of his hands in continuing the day of visitation, raising one here & another there, who are standard bearers &c Then Rowland in testimony spoke largely to the different states present in a remarkably pertinent & solemn manner, recommending love among bretheren; pointed out its beauty & usefulness, exhorted us to Watch & be sober, & not to slight the day of visitation, for in proportion as we reject the light that is manifested within, in the same proportion we loose [lose] our spiritual strength, & the light that is within us becomes darkness

Then M Morton concluded in solemn supplication, which embraced the exercise of the opportunity in a manner as solemn & beautiful as any I ever heard - it was a favor'd meeting indeed, & I believe the hearts of many (or at least) some who have for many Months sat in desolate places were again made to rejoice, & comforted with the hope that the lines in "New England Judged" are not yet applicable, or at least fully so, to us.

*"Thy candle light forevermore extinguished shall be

December 6, Wednesday: KNICKERBOCKER'S HISTORY OF NEW YORK by "Diedrich Knickerbocker" (the 26-year-old [Washington Irving](#)) was published by Inskeep and Bradford of Philadelphia.

READ THE FULL TEXT

This would go through many editions, translations, revisions, and reprintings during the author's lifetime. In 1812 Irving would negotiate with the Philadelphia publisher for a revised edition correcting some misprints, altering spelling and punctuation throughout, eliminating various allusions to chivalry and the classics, condensing the comic preamble on world history, and deleting various references to Knickerbocker's problems as an historian. About 1/10th of the material would be replaced, leaving the book still at 130,000 words. Among the additions would be a "Further Account of the Author," Chapters 4 and 5 of Book II which narrate the exploration for the New Amsterdam settlement and Oloffe's dream, and the history of the Long Pipes and Short Pipes in Chapter 6 of Book IV (a satire of American political parties which replaced the quarrel of the Squareheads and Platterbreeches). In 1815 Irving would desire a 3d edition of A HISTORY OF NEW YORK, illustrated by the drawings of [Washington Allston](#) and C.R. Leslie. Irving would continue to revise A HISTORY OF NEW YORK periodically over the next 30 years, until the Author's Revised Edition, G.P. Putnam's collected edition of his writings, in 1848. Although a subsequent edition in 1854 would contain a number of minor corrections and revisions supplied by Irving, and a Grolier Club edition in 1886, after Irving's death, would reprint A HISTORY OF NEW YORK with additional small changes based on Irving's 1848 manuscript, for all practical purposes the last major form of the text would be per the 1848 Author's Revised Edition. For it, Irving would revise Books V, VI, and VII, rework the Peter Stuyvesant section, add material on Van Rensselaer, delete the allusions to Jefferson's policies, delete passages regarded as "coarse," soften the satire of the Dutch, polish the style, and add "The Author's Apology," making this 1848 text some 7,000 words longer overall than previous editions. In 1848 he was 65, a revered American man of letters, a diplomat, and an international celebrity. The edition of A HISTORY OF NEW YORK issued 1848 would be a vastly different book from the version he had written as a young unknown.

For instance, in this year 1810 one Alexander Rogers of Waterford CT, in his 83rd year, published a tract entitled "Petition to My Fellow Countrymen" pointing out that he was being forced to "suffer for conscience's sake, in defense of the gospel of Christ; on the account of my son, who is under age, in that it is against my conscience to send him into the train-band."⁶⁹

[Henry Thoreau](#) would describe this day, in his journal for January 11 and January 22, 1857, as “Cold Friday,”

January 11, 1857: Began snowing yesterday afternoon, and it is still snowing this forenoon.

Mother remembers the Cold Friday very well. She lived in the house where I was born. The people in the kitchen—Jack Garrison, Esther, and a Hardy girl—drew up close to the fire, but the dishes which the Hardy girl was washing froze as fast as she washed them, close to the fire. They managed to keep warm in the parlor by their great fires.

January 22. Snows all day, clearing up at night, — a remarkably fine and dry snow, which, looking out, you might suspect to be blowing snow merely. Yet thus it snows all day, driving almost horizontally, but it does not amount to much. P. M.—To Walden. I never knew it to make such a business of snowing and bring so little to pass. The air is filled so that you cannot see far against it, i. e. looking north-northwest, yet but an inch or two falls all day. There is some drifting, however. You wonder how the tree sparrows can seek their food on the railroad causeway, flying in the face of such a fine, cold, driving snow-storm. Within the woods it is comparatively still.... I asked M. about the Cold Friday. He said, “It was plaguy cold; it stung like a wasp.” He remembers seeing them toss up water in a shoemaker’s shop, usually a very warm place, and when it struck the floor it was frozen and rattled like so many shot. Old John Nutting used to say, “When it is cold it is a sign it’s going to be warm,” and “When it’s warm it’s a sign it’s going to be cold.”

having already made mention of it in [WALDEN](#):

[WALDEN](#): Though, when I had been exposed to the rudest blasts a long time, my whole body began to grow torpid, when I reached the genial atmosphere of my house I soon recovered my faculties and prolonged my life. But the most luxuriously housed has little to boast of in this respect, nor need we trouble ourselves to speculate how the human race may be at last destroyed. It would be easy to cut their threads any time with a little sharper blast from the north. We go on dating from Cold Fridays and Great Snows; but a little colder Friday, or greater snow, would put a period to man’s existence on the globe.

THE GREAT SNOW

STEPHEN WANTON GOULD

FRIEND STEPHEN WANTON GOULD

GO TO MASTER HISTORY OF QUAKERISM

The weather that winter had been unusually moderate. December had been warm and very little snow had fallen. The ground was bare in southern New England, though there was snow in the northern states, enough “for good sleighing.” The previous day had been mild, with a warm south wind, but about four o’clock in the afternoon there had been a snow squall and the wind had come up, changed around to the north-northwest, and increased in force until it blew “with great violence.” The temperature, which was 45 degrees in Salem MA, suddenly began to plunge. Eighteen hours later, it had fallen 50 degrees. In Springfield MA, people witnessed a heavy fog passing down the Connecticut River. The cold air congealed into a fine snow, which rose 40 feet above the water and was most conspicuous about 2PM. At Amherst NH, it was 14 below zero. At Weare NH, the temperature fell 55 degrees between Thursday morning and Friday morning. Few people ventured out. A winter hurricane had swept in. At times and places the wind was so strong it was difficult to stand. The gale force wind continued all day, and houses and barns were blown away. Huge stands of trees were blown down, or splintered so as to “render them unfit for timber.” In Chester NH, the wind so moved a house that one corner fell into the cellar. At Sanbornton, three children died while their parents were attempting to get them in a sleigh from their home, the roof of which had gone, to a neighbor’s house. The sleigh kept blowing over, and though a neighbor attempted to help, the children froze. The neighbor would not recovered from snowblindness.

The cold would continue until the morning of the following Monday, when the wind would change to the southwest and the temperature begin to rise. Many of the livestock, however, would be found to have frozen where they stood.

1/23/57 several degrees below zero last night, violent wind, more drifting. ...Most inclement has been the past week. It has produced in every bosm a thrill of grateful thankfulness that a shelter from the freezing cold and food are available to sustain existence. (The next day he would report that the cold Friday was -20 to -28.)

1/26 I ventured to go to the mills today [but a later entry would indicate that he didn't make it all the way]. The roads are in places cut through deep snow drifts. It has been difficult to keep the attic stories of either of the mills warm. The water wheels have all been kept sufficiently free of ice to operate regularly and no delay and no delay has occurred from the destruction of ice. But the snowstorm on Monday last was so severe that only 3/4 of the hands went into the mills. The inclemency of the weather has prevented me from going out to the mills since the 17th of January, nine days ago. On the south side of the dam the road is blocked by a snowdrift 16 feet deep. I think there will be snow remaining from this drift until the 10th of April next. The icehouse at Allendale was nearly full last Saturday night when the snowstorm commenced One or two days work more will be requisite to complete the filling of the icehouse.

1/28 William D Ely returned from Hartford last evening by the first train that has come through from Hartford to Providence since the 17th The drifted snowbanks are high as the top of the locomotive chimney in the deep cuts along the road. (He here pasted in a number of newspaper articles that showed all the records that were broken often for the coldest temperature ever recorded throughout the NorthEast.)

Here are Oliver Ames's diary entries for the storm as experienced in North Easton, Massachusetts:

January 18th — this was a cloudy dark day & verry cold thermometer in the morning from 8 to 10 degrees below 0 cold all day. I had a yoke of oxen brought here by Caleb Easton the 17th and left on trial for two weeks— the weighd 3400 — one measures 7 feet & 1 inch & the other 7 feet & 2 inches.

The 19th it began to snow yesterday afternoon wind northeast and snowd until noon today the wind blew verry hard last night and today the snow was verry fine and dry and blew into heaps verry badly & fild up the cannal so that we could not run the enjoin the river was fild up so that it would not run in the chanel & flowd out onto the land it was the worst time about managing the water that I have ever known.

the 20th and 21st were fair days but pritty cold

the 22nd there was a fine snowstorm today with a high wind & cold wind about north west there was about 4 inches of snow fell

the 23rd this was a fair day & verry cold & windy thermometer 18 degrees below zero in the morning & 9 below at noon the wind yesterday and today fild up the roads badly

24th the thermometer was 30 degrees below zero this morning it rose rapidly and at noon was 19 above 0 it was fair in the forenoon and a little cloudy in the afternoon wind about south

the 28th it is colder today wind northeast but thaws some and our cannal is thawd out and they are at work at Joel's Shop for the first time since the 17th

Feb 4th the wind was southwest & much the warmest day we have had for a long time the snow melted pritty fast

you will serve, if God be God serve him but if Baal be God serve him" but I suffered so much with the tooth Ach that I could feel but little else, however these thoughts run thro' my mind, that when a person had the tooth Ach they were for putting off the sure remedy (extraction) & trying Paliatives which only tend to keep us longer under suffering, when if we would come to the point at once & have it out, our suffering would be soon over - so I thought it is with those who are called to make religious sacrifices, allways dreading the thing required & putting it off from season to season in hopes to make something else answer, but nothing will give permanent peace but A sacrifice of that which is required at our hands -With these thoughts I went home concluding to try one prescription more, & if that did not answer I would then think more seriously of extraction, which I did, & staid from meeting to make the experiment, but all would not do, so accordingly I put on my boots early in the evening come out of the house not letting any boody know where I was going, & went to J Lawton & had it pulled & return'd on my way rejoicing, as did my dear H when She found my sufferings in that respect (at least for a time) were ended

March 29, Thursday: John H. Farnham, a student of [Harvard College](#), wrote his sister Mary B. Farnham in Newburyport to tell of a [duel](#) that had taken place involving Daniel Ripley (a law student, son of the Reverend [Ezra Ripley](#) and Madam [Phoebe Bliss Emerson Ripley](#) of [Concord](#)):

This morning I was saluted with no very agreeable piece of intelligence, which perhaps you may not be informed of & so I will give you a rough draft of. I was asked whether I had heard anything of Ripley's fighting a Duel. No I answered with much surprise when I learned that D.B. Ripley attended on tuesday evening the company of Cadets - that among the officers nominate for Election was a Mr. Wells for captain whose nomination Mr. Ripley & Mr. Bourne strenuously advocated. The election of Mr. Wells was last - after the business of the company was transacted, sat down to a party of whist - Bourne presently came up to the table & observed with marked [?] chagrin & contempt that had it not been for Ripleys foolish defence of said Wells as Captain, his election would have been carried. Poor Daniel was puzzled for an answer to so severe an attack. Presently he replied No sir, you mistake, had it not been for your duplicity he might have been elected. -Bourne knocked Ripley down. In the interim I know [not] what passed - but in the morning Ripley sent a note to B demanding some honorable satisfaction or reparation for the gross insult he had received. Bourne answered his note with contempt and scurrilous abuse & defiance. Ripley then sent him a challenge - which Bourne accepted - Each of them with their seconds - immediately took horses & carriages & rode as far as [Pawtucket](#) to boundary town between Massachusetts and [Rhode Island](#) [because duels were illegal in Massachusetts] - & walked out onto the field of combat - The first fire fell to Ripley - He fired & shot Bourne through the Coat - Bourne then apologised & said if Mr. Ripley was satisfied he was. Mr. Ripley was satisfied - thus ended this unfortunate affair, which will certainly be a great disadvantage to Ripley - although he had the best side....

May 8, Tuesday: [Walter Scott](#)'s THE LADY OF THE LAKE was published. It featured a "Lord James of Douglas" character who had unjustly been outlawed:

Frederick Douglass's NARRATIVE

On the morning after our arrival at New Bedford, while at the breakfast-table, the question arose as to what name I should be called by. The name given me by my mother was, "Frederick Augustus Washington Bailey." I, however, had dispensed with the two middle names long before I left Maryland so that I was generally known by the name of "Frederick Bailey." I started from Baltimore bearing the name of "Stanley." When I got to New York, I again changed my name to "Frederick Johnson," and thought that would be the last change. But when I got to New Bedford, I found it necessary again to change my name. The reason of this necessity was, that there were so many Johnsons in New Bedford, it was already quite difficult to distinguish between them. I gave Mr. Johnson the privilege of choosing me a name, but told him he must not take from me the name of "Frederick." I must hold on to that, to preserve a sense of my identity. Mr. Johnson had just been reading the "Lady of the Lake," and at once suggested that my name be "Douglass." From that time until now I have been called "Frederick Douglass;" and as I am more widely known by that name than by either of the others, I shall continue to use it as my own.

5th day 10 of 5 M 1810// My mind has been favor'd with the sweet precious arisings of life this morning under which I wrote a few lines to my friend P Dunham - Oh! that at meeting I may experience a continuance of it -

At meeting the life arose but like the ebbings of the sea returnd again, & then return'd again - alternatly, but on the whole it was a good quiet favord time to what I have some times And again this afternoon at the funeral of Rowse Taylor's child I had a sweet little opportunity in silence & for the favor this day experienced it is in my heart to Say God be praised. - Our friends D Buffum & E Thornton arrived in the forepart of the Afternoon from their journey to Philadelphia - Recd a letter from Micajah Collins which convey'd the melancholly tidings that D. B Alley & his wife were in a state of delirium & he so bad as to be chained & that some hopeful friends at Concord had been so unwatchful as to make them their oracles & were like to be carried quite off from the ground of Truth. -

June 6, Wednesday: In Vermont, there is an abrupt watershed in which high lakes on one side drain directly into Lake Champlain, while high lakes not far from them drain another way, into Lake Memphremagog. The waters being low at the mills on the Barton River, a trench was cut across the divide from one high lake, Long Lake, which was draining by way of a small stream into Lake Champlain, to another lake some 200 rods distant but at a much lower altitude which flowed in the other direction. The idea was to let some of the Long Lake waters flow down the other way at least temporarily. But “on a sudden the lake burst its borders, and poured with its whole mass down the descent, rushing with inconceivable velocity in an immense column, three quarters of a mile wide and eighty feet in depth, across the country.”

1st day 17 of 6 M 1810// At Meeting this morning D Buffum was concerned in a very lively testimony concerning the light within & in a very feeling & Affectionate manner addressed the Youth present

After meeting I went to Sam Thurstons & dined & from there to the Widow Anthonys & after I had rested, a little to Cousin Alice Goulds Where I found them in a very distressed State the dear old Woman low in body near unto the conclusion of all things here - And dear Cousin Alice Junr in a very distressing condition both to herself & those around her; her breast & indeed her whole boody is in excruciating misery from the effects of her cancerous humor which has now struck over her whole boody & the Smell of the room so extreamly offensive that it is with difficulty it can be endured, but comfortable to add, amidst all her pain & suffering she seems very quiet & comfortable in mind, patient & resigned to the Solemn Scene of Death which is fast hastening upon her, her situation was such that while I was there, I thought my mind was very uncommonly solemnized & brought into stillness & did not say much neither at entering nor parting, except that I was glad to see her & felt comfortable in her presence, she enquired after my Wife & child & fathers family -

Not finding that I could be of any use there Henry & I walked up into Cousin John's Woods & so down to his house & set sometime. he (Cousin John) related an anecdote of his grandfather & my great great grandfather that took such place in my mind that to preserve it in remembrance I will insert it here. he said that Collins told him that he Watched with old Danial Gould the night he died & that he (Collins) was a young man at that time, & Daniel appeard to have his perfect senses & would frequently call him by name & say "Oh This is the Truth, What I have been professing is the Truth, I feel it so" by which it appears that in his last moments he was confirmed in the Truth as he had been professing it & that so far from being shaken at the revilings & Whipings which he had received at Boston in the early part of his days that he was faithful & perserved [preserved] with an undeviating step, that path which seem'd cast up for him, & that even in Death his confidence was strong in the Lord -

Well this brings to my remembrance what Was told me a few days past of one of my Mothers relations by the name of Wanton a Son of old Edward Wanton that was so much persecuted & Whiped at Salem, he Was by birth right a member of our Society, but married a presbyterian, & when married they could not agree on What place of public Worship to attend, he would not go to the presbyterian Meeting, nor she to the [Quakers](#), so they agreed to go to the Church of England, & he said in reply to a person that asked him about it "We have concluded to go to the Church & will both go the Hell together" he retained a love for Friends as long as he lived & entertain'd many in his house And in his last Illness, on his Death bed, declared, "My fathers God, is my God & I die in the faith of the Quakers." by which it evidently appears to

me that he had lived in reblion [rebellion] to the light that he had received, but at the last was compelled to declare his principals, tho' he had practiced others & those that he did not fully believe in - And I may now add that I believe it is a very uncommon occurance for one to leave Society & become fully confirmed in another mode of Worship, or another set of principals, but that they allways feel a certain something condemning the path they are persuing, & secret something drawing their mind in love to friends & their principals, which in the conclusion of time with many that have gone off into the broad road, they have been compelled by the just witness of Truth in their mind to acknowledge, so that I believe it is not an easy matter to Quench or put down, that light & Witness for Truth which is early implanted in the tender mind

Hoffmann wrote that Beethoven's instrumental music "opens up to us the kingdom of the gigantic and the immeasurable. Glowing beams shoot through this kingdom's deep night, and we become aware of gigantic shadows that surge up and down, enclosing us more and more narrowly and annihilating everything within us, leaving only the pain of that interminable longing, in which every pleasure that had quickly arisen with sounds of rejoicing sinks away and founders, and we live on, rapturously beholding the spirits themselves, only in this pain, which, consuming love, hope, and joy within itself, seeks to burst our breast asunder with a full voiced consonance of all the passions." He sure had enjoyed the heck out of the performance! Don't you wish you could have been there?

& my H & Self took Chaise & having buisness at Cundels Mills stoped there & walked round to view the curiosity of the carding spinning & weaving Machines, also the beauty of the place which my H thought exceeded any thing she had ever seen in nature. I was there at near as I can calculate about 15 years ago in the Winter, & both my Age & the Season proclued much knowledge of the place, but now at a pleasant season & at more maturer years can say it is a place which nature has done an abundance for, & by the hand of Art might be still more improved, but in my mind it does not exceed Lawtons Gulley in the West road – before meeting we stoped a little while at the usual stoping place (Holder Almays) – The Meeting was large & I must add was a favord season as, I was ever witness of – James Green opened the Meeting with a few words which I thought well off being edifying to my mind – then John Casey in a living testimony, then Elisha Thornton proclaimed the truth with life & great Power, I think to exceed any thing I ever heard from him – And I thought & it was the opinion of better judges that truth was greatly in dominion, to the gladening of the hearts of many that have set under depression & that were in doubt with respect to certain doctrines – Our last meeting I have but little to say about, the first part of that Was good, but the latter was hurt by the introduction of a Money Matter which was improperly managed – Thos Howland of [Greenwich](#) was appointed to the Station of an Elder – We dined at Uncle P Lawtons & on our way home Called again at Cundels Mills to settle the buisness we went upon in the morning & brother D & Sister E R riding in company with us, we took another stroll into the Gulley which I believe was reciprocally pleasant to us then rode home & found our little boy well & had done well thro' the day, which with our favor at Meeting is cause of real thankfulness – I had forgotten to mention another cause of gratitude in riding home our horse stumbled & came very near to throw us both out of the Chaise, but happily no damage was done –

August 9, Thursday: DeWitt Clinton recorded in his diary a reading of a pamphlet about an interview a Mr. Eddy had had with Universal Friend (he had not himself met her) at her settlement of Jerusalem in upstate New York: "I ... purchased a pamphlet relative to [Jemimah Wilkinson](#).... Mr. Eddy, who visited her at the Crooked Lake, says, that she is about fifty-seven years of age, of Rhode Island, but of what sect he could not learn. That she has about forty or fifty adherents, the principal of whom is Rachel Miller [actually, Rachel Mallin], aged upwards of forty, formerly a Quaker seamstress, of Philadelphia, in whose name the title deeds of the property are held. That she lives in a handsome, plentiful style, and is about completing a very large and elegant house, on a commanding position. That a large tract of land was purchased from Gorham and Phelps for eighteen cents an acre, but what proportion is held by Rachel, for the Friend, as she is called all over the country, he does not know, as some of her followers have receded from her and appropriated part of the land to their exclusive use. That her dress, countenance, and demeanor are masculine in a great degree; and that her conduct is marked by garrulity and vanity; and that when closely questioned she evinces great irritation. That she adopts the [Quaker](#) style of preaching; like them she is opposed to oaths and war, and does not prohibit, although she discountenances, marriage. That her discourses, as well set as conversational, are texts of Scripture combined without regularity or connection, but indicative of a retentive memory. That she has no peculiar creed, unless in relation to herself; that in this respect she veils herself in mystery, and does not distinctly say what being she is, although she represents herself as a spirit from heaven, animating the defunct

body of Jemima Wilkinson. But what kind or order of divine being, whether the soul of a departed saint, an angel, or a second Christ, she does not communicate to the profane. Her power is founded on the extreme ignorance of her followers, operated on by her impudence and cunning. Vain, ignorant, and talkative, but shrewd to a degree, she will maintain her dominion, notwithstanding, over some of her sect – a dominion tottering, however, with the decadence of her mind and the failure of her personal charms. When interrogated as to her doctrine, she referred to a book published by Bailey, of Philadelphia, of five or six pages, consisting merely of salutary advice written by her, and full of Scripture quotations, but containing no peculiar creed or dogmas [THE UNIVERSAL FRIEND'S ADVICE TO THOSE OF THE SAME RELIGIOUS SOCIETY].”

From the (London) Gentleman's Magazine.

"Died at her seat at Colebrook Dale, Deborah Derby, widow of Samuel Derby, Colebrook Dale, Shropshire aged about 58. This worthy woman had been a very acceptable Minister among the Society of Friends for 30 Years. She paid a religious visit to the meetings of Friends in America (having the plenty & accomodations of this World, in which she abounded) with earnest desires to promote the great cause of Christianity in those remote regions"

I had a destitute meeting, & was disappointed for I was in hopes to have felt more of the sap of life to arise than I did, feeling as I apprehended in a pretty good frame of mind before I went –

How shall I arise to newness of life? sure there is no way for any of us to arise untill the great fountain of Love & Life is opened for our reliefe, & that I fear & indeed it is plain that it cannot be opened untill there is more inward faithfulness, untill we live in the daily watch against those little things which obstruct the ways of divine Life in the mind. There are many things which are accounted little things in themselves, but alass we find by Scripture testimony that the little foxes spoiled the tender vines, & I have been confirmed by years experience, that those little

things that are offensive in the divine sight, do nip the tender buddings of Divine Life in the Mind & thus our journey to the city of religious establishment, is protracted, to a painful degree. -

It was singular to me that at meeting my mind should be full two thirds of the time occupied in reflecting on a certain Man (A.. C..) who has not been to meeting five times in 20 Years & never discovered that he was present untill towards the conclusion of the setting when I happened to look in a direction different from what I had done in the meeting & saw him setting - But I know not why I should think it singular, I frequently find that when I am thinking of a person, he suddenly & unexpectedly presents to view or I hear something from him -

Another person that I have known from infancy lays near an end of things in this World – her name is Judith Casey, a person guilty of allmost every vice, as Drunkeness Whoredom Theft & lying, my Aunt P Stanton called to see her this morning (as an old neighbor) & found her sensible that Death was near, & her account of her so took hold on my mind that I believe I shall go to see her, before long. –

I did for the best, & accordingly we wrapped the dear little creature up & brought him down with which he seem'd pleased, - he seemd comfortable after he got there & I saw nothing why I should not go to [Portsmouth](#) to attend the Moy [Monthly] Meeting, having some papers which was necessary to be there & the School committee was to meet, I thought it best to go & accordingly I took sister E & we went -

We had a good meeting & H Almy preached at least to my edification, buisnefs also in the last went on in a comfortable way & I thought & still believe it was best & right for me to go. We dined at Isaac Almys & on our Way home Stopped at P Lawtons to see Sister Ruth a few minutes, & then rode homeward & as we got to the corner of Obadiah Williams house in Broad Street, brother David Rodman met us & convey'd the hevy tidings that Our Dear & Precious little Son was no more in this life. We rode home & found him a sweet little Corpse in the Cradle - He continued much as when I left him untill about 2 OClock in the Afternoon & was then taken more alarmingly ill & died about 1/2 after 4 OClock. It was remarkable that a child of his age being only One Year, three Months & six days should manifest so much patience as he has since his sickness, he has never been peevish or fretful but allways Mild & placid, he continued to know all around him & about half an hour before he left time he sucked, & his Mother, as was her usual practice told him to kiss his dinner, he kissed her breast & then as usual began to suck & after that kissed his grandmother Gould & several others, apparently looking with his dear little eyes & noticing all around him as long as he lived he died so easy that they could scarcely determine the moment his breath left his body -he was buryed in the upper burying ground by the side of his little cousin Wm on Sixth day following, & has beyond doubting gone to the Arms of his Saviour & is now fleeing around the throne of God with Angellic Sweetnefs.

He has been so remarkable observing, & sweet disposition child that many have said that he was not long for this world & indeed there has not been a day pass over our heads but that we have remembered that he was mortal & even before he was born his Mother seemd impressed that the Child was not long for this World & both before & since would frequently weep at the prospect - the dear little fellow whenever he saw his Mother weep would sob & cry as if his heart would break & his countenance could not be changed until hers was. -

He has been a remarkable healthy child & has enjoyed as much happiness as possible for him too, he would amuse himself by the hour together with his little play things, & every fly, very Dog, Cat, Duck, Hen Pigeon or what ever else that was animated, he would seem delighted with, & want to have them in his hands - he had just got so as to lispe a few Words, would imitate the Dogs barking, the ducks & utter many monysyllables, which with his very numerous little endearing ways renderd him a very desirable Object - but he is taken from the evil to come, Our lofs is his gain. & tho' we may be blefsed with other Children,

Our beloved friends Sarah Robinson & her daughter Abigail set the Afternoon & forepart of the evening with us - they are both friends & relatives that I set store by - And very valuable many ways, particularly in Society - This is the first visit they have made us since we were housekeepers & I am very apprehensive it will be the last we shall ever receive from Sarah as she goes abroad but seldom & is quite Aged. -- My Mother also took tea with us -

September 16, Sunday: Silvana, a romantic opera by Carl Maria von Weber to words of Heimer after Steinsberg, was performed for the initial time, in Frankfurt-am-Main, conducted by the composer. The work was a moderate success but was overshadowed by a spectacular balloon ascent by Mme Madeleine-Sophie Blanchard, first female professional balloonist and widow of Jean-Pierre Blanchard, balloon pioneer — at the theater, everyone including the singers could talk about nothing else.

Father Miguel Hidalgo y Costilla placed himself at the head of a band of laborers, Indians, and prisoners in Dolores to the northwest of Ciudad México, in resistance to Spanish rule in Mexico. He inspired them with a cry “Long live religion! –Long live Our Lady of Guadalupe! –Long live the Americas and death to the corrupt government!” His act would be constructed to have been the beginning of the Mexican Revolution.

September 28, Friday: It was suggested in the Herald of Gospel Liberty that Calvinism provoked in some cases a condition of melancholy so extreme as to produce self-hatred leading even to suicide.⁷⁶ In a few years the famous case in point would become that of the self-murdering Reverend Joseph Buckminster (1751-1812), the one who had courted the Elizabeth Whitman and who was later to be fictionalized as Reverend Boyer in Hannah Webster Foster's account of the Whitman tragedy, *THE COQUETTE*. Whether Whitman's fate had any bearing on Buckminster's suicide is unclear, for according to Cathy Davidson, Buckminster had been known even in his prime to have been prone to fits of depression. Leon Jackson's doctoral dissertation has dealt very extensively in this regard with the Unitarian controversy and quotes an *ms* letter (original now in private hands) which suggested that the minister's death was the result of (Calvinism-induced) madness: immediately prior to his death Buckminster "was oppressed with religious melancholy, which became absolute derangement, and he made an attempt to destroy himself."⁷⁷

What cheer can the religious sentiment yield, when that is suspected to be secretly dependent on the seasons of the year, and the state of the blood? I knew a witty physician who found theology in the biliary duct, and used to affirm that if there was disease in the liver, the man became a Calvinist, and if that organ was sound, he became a Unitarian.

 December 5, Wednesday: President [James Madison](#) got up on a platform so he could be seen (he was shorter than our Senator Paul Wellstone) and addressed both houses of the federal Congress.

"Among the commercial abuses still committed under the American flag, ... it appears that American citizens are instrumental in carrying on a traffic in enslaved Africans, equally in violation of the laws of humanity, and in defiance of those of their own country. The same just and benevolent motives which produced the interdiction in force against this criminal conduct, will doubtless be felt by Congress, in devising further means of suppressing the evil." HOUSE JOURNAL (reprint of 1826), 11th Congress, 3d session, VII. 435.

INTERNATIONAL SLAVE TRADE

W.E. Burghardt Du Bois: Undoubtedly, the Act of 1807 came very near being a dead letter. The testimony supporting this view is voluminous. It consists of presidential messages, reports of cabinet officers, letters of collectors of revenue, letters of district attorneys, reports of committees of Congress, reports of naval commanders, statements made on the floor of Congress, the testimony of eye-witnesses, and the complaints of home and foreign anti-slavery societies.

"When I was young," writes Mr. Fowler of Connecticut, "the slave-trade was still carried on, by Connecticut shipmasters and Merchant adventurers, for the supply of southern ports. This trade was carried on by the consent of the Southern States, under the provisions of the Federal Constitution, until 1808, and, after that time, clandestinely. There was a good deal of conversation on the subject, in private circles." Other States were said to be even more involved than Connecticut.⁷⁹ The African Society of London estimated that, down to 1816, fifteen of the sixty thousand slaves annually taken from Africa were shipped by Americans. "Notwithstanding the prohibitory act of America, which was passed in 1807, ships bearing the American flag continued to trade for slaves until 1809, when, in consequence of a decision in the English prize appeal courts, which rendered American slave ships liable to capture and condemnation, that flag suddenly disappeared from the coast. Its place was almost instantaneously supplied by the Spanish flag,

which, with one or two exceptions, was now seen for the first time on the African coast, engaged in covering the slave trade. This sudden substitution of the Spanish for the American flag seemed to confirm what was established in a variety of instances by more direct testimony, that the slave trade, which now, for the first time, assumed a Spanish dress, was in reality only the trade of other nations in disguise."⁸⁰

So notorious did the participation of Americans in the traffic become, that President Madison informed Congress in his message, December 5, 1810, that "it appears that American citizens are instrumental in carrying on a traffic in enslaved Africans, equally in violation of the laws of humanity, and in defiance of those of their own country. The same just and benevolent motives which produced the interdiction in force against this criminal conduct, will doubtless be felt by Congress, in devising further means of suppressing the evil."⁸¹ The Secretary of the Navy wrote the same year to Charleston, South Carolina: "I hear, not without great concern, that the law prohibiting the importation of slaves has been violated in frequent instances, near St. Mary's."⁸² Testimony as to violations of the law and suggestions for improving it also came in from district attorneys.⁸³

The method of introducing Negroes was simple. A slave smuggler says: "After resting a few days at St. Augustine, ... I agreed to accompany Diego on a land trip through the United States, where a *kaffle* of negroes was to precede us, for whose disposal the shrewd Portuguese had already made arrangements with my uncle's consignees. I soon learned how readily, and at what profits, the Florida negroes were sold into the neighboring American States. The *kaffle*, under charge of negro drivers, was to strike up the Escambia River, and thence cross the boundary into Georgia, where some of our wild Africans were mixed with various squads of native blacks, and driven inland, till sold off, singly or by couples, on the road. At this period [1812], the United States had declared the African slave trade illegal, and passed stringent laws to prevent the importation of negroes; yet the Spanish possessions were thriving on this inland exchange of negroes and mulattoes; Florida was a sort of nursery for slave-breeders, and many American citizens grew rich by trafficking in Guinea negroes, and smuggling them continually, in small parties, through the southern United States. At the time I mention, the business was a lively one, owing to the war then going on between the States and England, and the unsettled condition of affairs on the border."⁸⁴

The Spanish flag continued to cover American slave-traders. The rapid rise of privateering during the war was not caused solely by patriotic motives; for many armed ships fitted out in the

United States obtained a thin Spanish disguise at Havana, and transported thousands of slaves to Brazil and the West Indies. Sometimes all disguise was thrown aside, and the American flag appeared on the slave coast, as in the cases of the "Paz,"⁸⁵ the "Rebecca," the "Rosa"⁸⁶ (formerly the privateer "Commodore Perry"), the "Dorset" of Baltimore,⁸⁷ and the "Saucy Jack."⁸⁸ Governor McCarthy of Sierra Leone wrote, in 1817: "The slave trade is carried on most vigorously by the Spaniards, Portuguese, Americans and French. I have had it affirmed from several quarters, and do believe it to be a fact, that there is a greater number of vessels employed in that traffic than at any former period."⁸⁹

I have often found myself much annoyed by them to the dimunition of my spiritual Strength, they may be compared to the little foxes which nip the buds of life, but they are little things & may by attention be kept out from the enclosure of our mind -.

January 8, Tuesday-10, Thursday: In what has been the largest slave revolt in the United States, Louisiana [slaves](#) revolted in two parishes. The leader of the revolt was [Charles Deslondes](#), a buggy driver from St. Domingue, property of the widow Deslondes. At a plantation about 35 miles from New Orleans the Andry family and their overseers were attacked, killing Mr. Andry's son Gilbert Thomassin Andry and putting the family to flight. The servile insurrectionaries were able to supplement their hoes, machetes, and clubs with a few firearms and some ammunition and set out downriver. At another plantation, Jean Francois Trepagnier was killed. The slave army by day's end had gotten almost 25 miles in the direction of the city by the time the wounded Mr. Andry returned with a local militia of some 80 white men. Communication had been made to Claiborne and US troops were approaching, under the command of General Wade Hampton. Troops from Baton Rouge were also approaching. The slaves were immediately overwhelmed by this firepower. Those who hadn't simply been shot down, including Deslondes and his leaders, were summarily executed and decapitated, and 45 heads were mounted on pikes. At the Destrehan Plantation, there were quick trials in which 21 of some 30 accused were found guilty and immediately executed, and their heads added to the long row of pikes along the levees.

February 5, Tuesday: [William Henry Harvey](#) was born at Summerville near Limerick, [Ireland](#), the youngest of 11 children of Friend Joseph Massey Harvey and Friend Rebecca Mark Harvey. His father, Friend Joseph Massey Harvey, was a prominent merchant. He would start his education at Ballitore School in County Kildare (a [Quaker](#) institution, emphasizing science). Upon leaving school he would join the family business.

In person I am tall, and in a good degree awkward. I am silent, and when I do speak say little, particularly to people of whom I am afraid, or with whom I am not intimate. I care not for city sports, or for the diversions of the country. I am equally unknown to any healthful amusement of boys. I cannot swim nor skate. I know nothing of the delight of these, and yet I can amuse myself and be quite happy, seemingly without any one to share my happiness. My botanical knowledge extends to about thirty of the commonest plants. I am very fond of botany, but I have not much opportunity of learning anything, because I have only to show the plant to James White, who tells me all about it, which I forget the next minute. My mineralogy embraces about twelve minerals, of which I know only the names. I am totally unacquainted with foreign shells, and know only about two hundred and fifty native ones. As to ornithology, I have stuffed about thirteen birds. In chemistry I read a few books, and tried some experiments. In lithography I broke a stone and a printing press. These are my pretensions to science.

(Although by strict interpretation the Regency Era begins in this year and ends in 1820 with the death of George III and the crowning of the Prince Regent as King George IV, in common use the term often describes a broader era, to wit the period between the end of the Georgian age and the beginning of the Victorian age, many of what we term “Regency” romances actually being set during the previous decade.)

(The family was of Huguenot descent, chased out of France in 1685, and its name had originated as “Des Horts,” meaning “of the gardens.” He was an autodidact who studied paleontology and glacial phenomena. He studied at the University of Giessen and then at Heidelberg before studying in the College of France at Paris. In early years he was an associate of [Professor Louis Agassiz](#), and his contributions to glaciology derive from Agassiz’s Ice Age concept and from summers he spent with Agassiz on the Unteraar glacier. He studied echinoderms of the Jurassic period. He investigated the old lake-habitations of Switzerland. He made observations on the physical features of the Sahara desert. He would visit the locale in France from which his Protestant ancestors had been exiled during the great diaspora. Eventually he inherited property, retired to Combe Varin in Val Travers, Switzerland, and died on vacation in Nice, France.)

March 1, Friday: When [Muhammad Ali Pasha al-Mas'ud ibn Agha](#) had come to be pasha of [Egypt](#) in 1806, [Mameluke](#) factions had retained control of much of the nation. Under their ancient baronial rights they had been able to stonewall many of his measures. Consequently, on the occasion of a celebration in honor of his son Tusun, implying that he wanted to come to terms with them, Muhammed Ali Pasha invited Shahin Bey and the other leading Mameluke lords (accounts differ as to the guest list, all the way from 64 to 700) to a banquet at the Citadel of Cairo. After the reception, as they were departing ostensibly to serve as a rear-guard in a parade, they mounted up and rode out of the citadel down a sloping corridor toward Roumaliya Square — only to have the huge brass-bound external doors suddenly slam shut in front of them. Trapped and rendered defenseless in the citadel's Bab al-Azab gateway complex, they were then picked off by a squadron of

Albanians firing down upon them. During the following weeks the Pasha's followers would search out and exterminated thousands of caste members in various locales, so that only a small group would manage to escape into the Sudan.

Reportedly only one of the warrior guests, named perhaps [Amin](#), survived this Cairo massacre, by urging his horse to leap over the parapet of the citadel wall and down some 30-40 feet or more (the horse being killed in the fall) — which story would lead to [Henry Thoreau](#)'s remark "...till I am ready to leap from their court-yard like the Mameluke bey":

GO TO MASTER HISTORY OF QUAKERISM

WALDEN: I live in the angle of a leaden wall, into whose composition was poured a little alloy of bell metal. Often, in the repose of my mid-day, there reaches my ears a confused *tintinnabulum* from without. It is the noise of my contemporaries. My neighbors tell me of their adventures with famous gentlemen and ladies, what notabilities they met at the dinner-table; but I am no more interested in such things than in the contents of the Daily Times. The interest and the conversation are about costume and manners chiefly; but a goose is a goose still, dress it as you will. They tell me of California and Texas, of England and the Indies, of the Hon. Mr. _____ of Georgia or of Massachusetts, all transient and fleeting phenomena, till I am ready to leap from their courtyard like the Mameluke bey. I delight to come to my bearings, - not walk in procession with pomp and parade, in a conspicuous place but to walk even with the Builder of the universe, if I may, - not to live in this restless, nervous, bustling, trivial Nineteenth Century, but stand or sit thoughtfully while it goes by. What are men celebrating? They are all on a committee of arrangements, and hourly expect a speech from somebody. God is only the president of the day, and Webster is his orator. I love to weigh, to settle, to gravitate toward that which most strongly and rightfully attracts me; -not hang by the beam of the scale and try to weigh less, - not suppose a case, but take the case that is; to travel the only path I can, and that on which no power can resist me. It affords me no satisfaction to commence to spring an arch before I have got a solid foundation. Let us not play at kittly-benders. There is a solid bottom every where. We read that the traveller asked the boy if the swamp before him had a hard bottom. The boy replied that it had. But presently the traveller's horse sank in up to the girths, and he observed to the boy, "I thought you said that this bog had a hard bottom." "So it has," answered the latter, "but you have not got half way to it yet." So it is with the bogs and quicksands of society; but he is an old boy that knows it. Only what is thought said or done at a certain rare coincidence is good. I would not be one of those who will foolishly drive a nail into mere lath and plastering; such a deed would keep me awake nights. Give me a hammer, and let me feel for the furring. Do not depend on the putty. Drive a nail home and clinch it so faithfully that you can wake up in the night and think of your work with satisfaction, -a work at which you would not be ashamed to invoke the Muse. So will help you God, and so only. Every nail driven should be as another rivet in the machine of the universe, you carrying on the work.

March 25, Monday: [Percy Bysshe Shelley](#) had just written A POETICAL ESSAY on war according to which it was the “cold advisers of yet colder kings” who had “the power to breathe / O’er all the world the infectious blast of death”:

Millions to fight compell'd, to fight or die
In mangled heaps on War's red altar lie . . .
When legal murders swell the lists of pride;
When glory's views the titled idiot guide....
Man must assert his native rights, must say
We take from Monarchs' hand the granted sway;
Oppressive law no more shall power retain,
Peace, love, and concord, once shall rule again,
And heal the anguish of a suffering world;
Then, then shall things which now
confusedly hurled,
Seem Chaos, be resolved to order's sway,
And error's night be turned to virtue's day –

He and Thomas Jefferson Hogg were expelled from University College for refusing to answer questions about the authorship of THE NECESSITY OF ATHEISM.

That evening in Viviers, France, Honoré Flaugergues noticed without a [telescope](#) a [comet](#) (C/1811 F1) in the area of the sky covered by a “constellation” that we no longer use for such purposes, one then termed [Argo Navis](#).

March 26, Tuesday evening: Honoré Flaugergues again viewed the [comet](#) (C/1811 F1) he had noticed on the previous evening, low in the south, and it was moving northward and brightening. He estimated its orbit to be RA=8h 01.7m, DEC=-29° 03' and such an orbit indicates that it was being discovered while still at the distance of the asteroid belt, 2.72 AU from the sun.

April 1, Monday: The town of [Concord](#) directed that the woods on the ministerial lot, and on one in Carlisle, should be cut and sold so that pews could be created in the meetinghouse, and sold. The proceeds from this was to be handed over to a group of trustees as a fund for the support of the town's minister.

FINANCES.— In the early ages of the town, several lots of land were reserved for the "public good," and donations were made by individuals for the same purpose. Most of them, however, were disposed of without producing much permanent benefit, or accomplishing the wishes of the donor. Captain Timothy Wheeler,⁹³ in 1687, bequeathed to the Rev. Edward Bulkeley and

the Rev. Joseph Estabrook, who were then the ministers of the town, 20s. apiece; and to the town about three acres of land, with a house standing on the same, to be improved, all but half an acre (which was "laid out to the training place" at the northwesterly end of the public common), "for the furtherance of learning and the support of a school in the said town." This lot was that on which the grammar school-house now [1835] stands, and then embraced nearly all which would be included in a line drawn from the north side of the house recently built by Ephraim Merriam, to the brook and by the brook round to the Middlesex Hotel and the common. These premises were several years leased and the rents applied according to the wishes of the donor; but piece after piece was unfortunately sold, till the school-house lot was contracted to its present [1835] highly inconvenient dimensions. Captain Wheeler also bequeathed to the town 40 acres of woodland, "to be improved from time to time for the use and benefit of the ministers of the said town." This was the present [1835] ministerial lot; and the people were long accustomed to hold a bee, when a sufficient quantity of wood for the minister's annual consumption was drawn from this lot to his door.

The town directed, April 1, 1811, that the wood on this lot, and on one in Carlisle, should be cut off and sold; and that pews should be erected on some vacant floor in the meeting-house, and also sold; and that the proceeds should be vested in the hands of trustees, as a ministerial fund. Their first report was made November 7, 1814, and shows the following results.

Proceeds of sales of wood on the ministerial wood-lot	\$2,566.13
Proceeds of sales of wood on a lot in Carlisle	364.27
Proceeds of sales of pews in the meeting house	1,365.55

Total on interest from January 1st, 1814 \$4,295.95
The first trustees were [John White](#), [Francis Jarvis](#), and John L. Tuttle; and they and their successors were incorporated by an act passed February 27, 1813, as "The Trustees of the Congregational Ministerial Fund in Concord." This fund has since been accumulating; and it received the additional legacy of Humphrey Barrett,⁹⁴ in 1829, of \$500. No appropriations were made from it till 1830; and on the first of January, 1831, it amounted to \$11,431.45.

In 1732, a committee was appointed, consisting of the Rev. Mr. Whiting, James Minott, Jr., John Fox, and Samuel Heywood, to make sale of the common and ministerial land in the town, and vest the proceeds in other real estate. A "ministerial pasture

93. Captain TIMOTHY WHEELER died July 10, 1687 aged 86. He came to [Concord](#) in 1638, tradition says from Wales. Besides holding, at different times, most of the important trusts in various town affairs, he was captain of a military company, and represented the town *eighteen* years in the General Court, between 1653 and 1672. In all stations he appears to have conducted himself with great propriety. At his death he was possessed of a very respectable estate. His will, which is recorded in the Suffolk Probate Records, was dated the 1st of March next before his death. His second wife was Mary, daughter of Captain Thomas Brooks. They had no male issue. One of his daughters, Elizabeth, married Ebenezer Prout, some time clerk of the House of Representatives; and another, Rebecca, married James Minott, Esq., and was the ancestor of many distinguished individuals.

94. HUMPHREY BARRETT was the son of Lieutenant Humphrey Barrett, and died without issue, March 13, 1827, aged 75. Abel B. Heywood inherited, and lives on [1835], his real estate.

and plow land," was accordingly bought west of the almshouse and some time used as a "perquisite" lot. During the Rev. Mr. Emerson's ministry, it was sold for £75, or \$250, and the annual interest, \$15, applied for the benefit of the minister. In consequence of losses sustained during the revolution, it became reduced to \$100 nearly. In 1819, the town voted that the minister should receive \$15, the original prerequisite; and the balance \$9, has been annually raised by a tax.⁹⁵

According to an article in the Trewman’s Exeter Flying Post or Plymouth and Cornish Advertiser of Exeter, England for June 6, Thursday, 1811, copied from the London Gazette Extraordinary for June 3, Monday, 1811, containing information released by “Downing-Street” on June 2d, a list of officers killed, wounded, and missing on the 10th May, 1811 had included the name of “Lieut. Although the list contained modifiers such as “severely,” “slightly,” “since dead,” and “lost an arm,” this information failed to indicate the nature of the wound sustained by [Lieutenant John Thoreau](#). (His subsequent career would indicate that the wound, although it might have put him on the sidelines for awhile, could not have been all that bad.)

May 24, Friday: At St James Church in Bath, England [Walter Savage Landor](#) got married with Julia Thuillier. This idyll would not last, for during the following three years [Landor](#) would be vexed by his neighbors and tenants, the local lawyers and lords-lieutenant, and the Bishop of St David's. [Landor](#)'s troubles with his neighbors would stem from petty squabbles, many of his own creation. His trees were uprooted and his timber stolen, much of this in retaliation. He made the mistake of employing Charles Gabell as his solicitor — a fee professional who proceeded to milk him like a cow. A man against whom he had been forced to “swear the peace” would proceed to drink himself to death, and he would be accused of causing this man's intemperance. May 31, Friday night: There was an extreme conflagration in Newburyport MA, beginning in a stable on Merchants' Row and proceeding before a dry wind toward the market house and the ferry wharf. The "most ancient, wealthy, and commercial" part of town was consumed despite a long line of citizens passing buckets of water. Then an abrupt change in the wind drove the flames across State Street and into the large brick buildings which the townspeople were counting on to shield the lower end of the town. Many of the refugees gathered at Farnham's and at the Tracy mansion which serves now as the Newburyport public library:

The five-year-old William Lloyd Garrison would never forget being held aloft to watch the leaping flames that seared the sky. The glare of light was intense, yet smoky clouds obliterated the moon and the night air became as sultry as a summer's noon. Firemen's trumpets rang out over the crash of chimneys and the cries of distress, while explosions of stored powder and spirits from the wharfside distilleries gave off thunderous sounds of war. Shortly after dawn, when a cooling fog helped quench the blaze, the fire at last came under control, and Newburyport stared devastation in its grimy, acrid face. Two hundred and forty buildings destroyed, thirteen wharves consumed, ninety families homeless, every dry goods store a wreck, the town library a ruin, and the Baptist meetinghouse in shambles. A visitation without parallel, the fire burned the heart out of the town and broke up forever the possibility of family life for Sister Garrison and her children.

The sympathetic neighboring town of Ipswich would vote \$1,000 to these sufferers by fire.

June 19, Wednesday: Death of Samuel P. Chase (born April 17, 1741), Supreme Court Justice since 1798, revolutionary, attorney, Declaration of Independence signer. Justice Chase had been served with 6 articles of impeachment for political bias by the House of Representatives in late 1804 and then a couple more articles had been added. The Jeffersonian Republican-controlled Senate had begun its impeachment trial in early 1805, and on March 1, 1805 he had been acquitted on all charges (he remains the sole Supreme Court justice to be impeached — which is something we should all bear in mind as we stare in amazement at Justice Clarence Thomas).

Friend [Stephen Wanton Gould](#) wrote in his journal:

4th day 19 of 6 Mo// I have had an exercising job to do this morning but got along better than I expected & was measurably relieved releived from a depressive exercise. Our meeting was occupied principlly on the subject of the School fund, this forenoon. Nothing done but to recommend to the Several Quarterly meetings to enlarge the general fund, & the care of it left as in 1803 to the Meeting for Sufferings - R Mott Spake largely in the subject of education - Dear Thos Scattergood spake sweetly & powerfully to the dear Youth, reciting his experience of his younger years, & observed that his first commencement of public preaching was in these parts ([Portsmouth](#)) while travelling with a beloved Aged friend in these parts, many others spake a little which helped the meetings.

Afternoon Met by Adjournment (2 OClock) Epistles to all the Yearly Meetings were presented & were the only buisness- towards the close Mehitabel Jenkins came in to pay us a little visit which was very sweet & salutary. She called upon us in the name of the Lord & in a very tender frame of spirit to be faithful, testifying to us (particularly the youth) that she had found the good effects of it from long experience, very soon after she took her seat Thos Scattergood kneeled in Supplication which was very solemn & impressive on behalf of the Aged, but the Youth was remembered also - after he arose, the dear old Woman pronounced her blessing upon us & as she went out she says, "farewell, farewell my dear friends farewell" to which Thos Scattergood rply'd "farewell in return", This witnessed, & I believe affected many minds with deep impression, particularly to see so aged so devoted & living friend come in & take leave of us with such feeling concern for our wellfare, & more particularly as she is just setting out on a journey to Nine Partners & perhaps as far as Canada -- After she went out R Mott W Williams expressed a few words & the meeting closed with a very solemn covering. -

June 21, Friday: After a siege of six weeks, French forces began the final assault on Tarragona.

John Adams, who had served on the drafting committee of the Continental Congress for the preparation of a [Declaration of Independence](#) along with [Thomas Jefferson](#) and others, was feeling resentful at the claims that were being made that Jefferson had authored the document. "The Declaration of Independence I always considered as a theatrical show," he wrote at this point. "Jefferson ran away with all the stage effect ... and all the glory of it."⁹⁷

"The United States of America had human slavery for almost one hundred years before that custom was recognized as a social disease and people began to fight it. Imagine that. Wasn't that a match for Auschwitz? What a beacon of liberty we were to the rest of the world when it was perfectly acceptable here to own other human beings and treat them as we treated cattle. Who told you we were a beacon of liberty from the very beginning? Why would they lie like that? [Thomas Jefferson](#) owned slaves, and not many people found that odd. It was as though he had an infected growth on the end of his nose the size of a walnut, and everybody thought that was perfectly OK."

A parabolic orbit computed for the comet during this month was predicting that C/1811 F1 would pass perihelion on September 15th at a distance of 1.134 AU from the sun. In [Newport, Rhode Island](#), Friend [Stephen Wanton Gould](#) wrote in his journal:

*4th day 31 of 7 Mo // I feel this morning the renewal of love & life in my heart. I have many times repeated that I love to feel it & Oh saith my soul may it continue with me, whether it is for the want of a more holy life, & whether it is permitted for a trial it certainly is that I am not only very often in a state very destitute of life, but also very long at a time in a painful state of Poverty & death as respects the precious life, incapable (even if I search & turn the mind inward) to raise a good thought or a devotional sigh –
This Afternoon, attended the funeral of Cousin Polly Lawton. – while setting there my mind was brought into a good feeling state.*

 August 1, Thursday: Catherine Byron, [George Gordon, Lord Byron](#)'s mother, died.

According to a report in the [Edinburgh Review](#) based upon a news account in the [Liverpool Mercury](#), a vessel arrived on this day in the port of Liverpool with a cargo from Sierra Leone. It was the vessel *Traveller* the owner and master (Captain [Paul Cuffe](#)), mate and crew of which, this publication was interested to point out, were free blacks.

From the [Liverpool Mercury](#).
MEMOIRS OF CAPT. PAUL CUFFEE.
“ On the first of the present month of August, 1811, a vessel arrived at Liverpool, with a cargo from Sierra Leone; the owner, master, mate, and whole crew of which are free blacks. The master, who is also owner, is the son of an American slave, and is said to be very well skilled both in trade and navigation, as well as to be of a very pious and moral character. It must have been a strange and an animating spectacle to see this free and enlightened African, entering as an independent trader, with his black crew into that port, which was so lately the nidus of the slave trade.—*Edinburgh Review for August, 1811.*”

The article continued by remarking on what a strange and animating spectacle it must have been, to see this free and enlightened African sail with his black crew into such a port on the coast of Africa — a port which had been so lately the *nidus* of the slave trade.

It rained & we had a wet ride to Portsmouth before meeting we stopped at Holder Almys, & saw several of our friends & acquaintances from off the Island, which was pleasant & agreeable

At Meeting James Greene as usual opened the Service, then our dear & much lov'd friend Nathan Hunt from North Carolina, delivered a powerful Gospel testimony, which according to my sense was to exceed any thing I ever heard from him or hardly any one else. The meeting seem'd cover'd with an Awful solemnity while he was speaking & the hearts of many deeply affected with the truths that he declared. It was to my mind an highly favor'd season for which I desire to be thankful. -

In the meeting for discipline the buisness went on with a good degree of love & condescention - We dined at Anna Anthonys, & then Rode home, & tho it raind & we had an uncomforatble ride both in & out of town & my dear H got some wet, yet she appears not to have taken cold, for which also I desire to be thankful —

The LeGross couple had resided on nearby property they rented from Peter Wheeler in Walden Woods. Francis had died at the age of 45 on September 11, 1809. There is no evidence that Brister Freeman would move out after this sale. Rather, given the recent death of [Fenda Freeman](#), it seems likely that he cohabited with the widowed Rachel Harrington LeGross and that this land transaction was meant to insure her possession of the property if she was predeceased by Brister Freeman. The couple obviously could not formalize their relationship, as interracial marriage was impossible in Massachusetts. The race aspect of this bonding and the fact that LeGross was Peter Wheeler's former tenant may explain the harassment Freeman would experience from Wheeler in the following year.

In [WALDEN](#); OR, LIFE IN THE WOODS, [Henry Thoreau](#) would be able to write of Brister's relationship with Fenda, but not with Rachel.

[WALDEN](#): Down the road, on the right hand, on Brister's Hill, lived Brister Freeman, "a handy Negro," slave of Squire Cummings once, -there where grow still the apple-trees which Brister planted and tended; large old trees now, but their fruit still wild and ciderish to my taste. Not long since I read his epitaph in the old Lincoln burying-ground, a little on one side, near the unmarked graves of some British grenadiers who fell in the retreat from Concord, -where he is styled "Sippio Brister,"- Scipio Africanus he had some title to be called, -"a man of color," as if he were discolored. It also told me, with startling emphasis, when he died; which was but an indirect way of informing me that he ever lived. With him dwelt Fenda, his hospitable wife, who told fortunes, yet pleasantly, -large, round, and black, blacker than any of the children of night, such a dusky orb as never rose on Concord before or since.

1st day 8 of 9 Mo// This morning rose early & got breakfast & walked out to Saml Thurstons, from thence he & I rode to [Portsmouth](#), before meeting we stoped at Holder Almays, then to meeting where we had a very favor'd season. Sarah Fish was concern'd in a living supplication. My mind was favor'd with the most life & sweetness that I have experienced in a meeting or out of one, for a long time it did indeed seem as a renewal of the days of my espousals, the days when I was Young & tender, for which my heart was bow'd in humble thankfulness to the Author of every good thing, without whose holy help we are no more than clay as to life of religion in the mind - After Meeting we dined at [Preserved Fishs](#), & from there, (being one of a committee with Sam Thurston & Rich Mitchell to visit Parker Hall in consequence of his request to be admitted under the care of friends-) I went with them to his House, where life was again renew'd on my spirit, to exceed what I felt in the meeting. Sam & Richd had much to communicate in a very lively & pertinent manner. I said but little, but I believe traveled with them in spirit., & was humbled under a sense of my own unworthiness & short comings, & from hence am induced to believe, the opportunity was a proffitable one to me, & that I was not out of my place in being with them. Parkers wife seems to be a sweet spirited & deeply exercised Woman, & if they keep their plans I believe they will be very useful in society. -We return'd from there to P Fishs & took tea & from thence rode home well satisfied with our days work.

October 13, Sunday: John McIsaac of Corphine in Kintyre, Scotland made an oath that he had seen, in the afternoon, upon a black rock on the seacoast, a being the upper part of whose body appeared human and the lower part of whose body appeared fishlike, "covered with scales." He gave a most particular description of its body, noting that its arms were proportionally rather short in comparison with its body and that its eyes were very hollow. After about five minutes this creature "tumbled clumsily into the sea." In an entirely separate deposition relating to an entirely different observation, Katherine Loynachan swore that on that same afternoon, as she was herding cattle near the seashore, she had seen a creature sliding off one of the rocks and dropping into the water, which had had long dark hair, white skin upon its upper part, and dark brown skin upon its lower, fishlike part. "[T]he declarant saw the face of it distinctly which had all the appearance of the face of a child and as white, and at this time the animal was constantly rubbing or washing its breast with one hand, the fingers being close together...."

At this point, although it was still more than an astronomical unit away, the great [comet](#) Flaugergues (C/1811 F1) was at its closest to Earth. Since the head of this gigantic comet measured at up to 28 arc-minutes in width, which is roughly comparable to the apparent size of the disks of the sun and of the moon, and since it was actually somewhat farther away from us than the sun, it is clear that its tenuous coma (nucleus with surrounding visible gasses) actually exceeded the size of the photosphere of Sol. Near the end of his visit to England, Captain [Paul Cuffe](#) saw himself described in the Liverpool [Mercury](#) as preferable “to the proudest statesman that ever dealt out destruction amongst mankind.” That newspaper’s “Memoir of Captain Paul Cuffee” [*sic*] offered a description his early life and many notable achievements, including his 1780 challenge to the Massachusetts legislature against taxation without representation for blacks. (The captain would later receive an English land grant on which he would be able to settle a few worthy immigrants of his choosing. His plans would be delayed by the War of 1812, but in 1815-1816 he would make a successful voyage to Sierra Leone with 38 colonists. On January 16, 1817 he would write that in Sierra Leone, “These few Europeans hath pritty much Control of the Colony Yet the people of Coular Are intitled to every privilege of a free born Subjects.... Yet It cannot be said that Thay Are Equal for the prejudice of tradition is precipitable but I believe much Lieth At thare Doors.”)

Memoir of Captain Paul Cuffee, Liverpool MERCURY

On the first of the present month of August 1811, a vessel arrived at Liverpool, with a cargo from Sierra Leone, the owner, master, mate, and whole crew of which are free Negroes. The master, who is also owner, is the son of an American Slave, and is said to be very well skilled both in trade and navigation, as well as to be of a very pious and moral character. It must have been a strange and animating spectacle to see this free and enlightened African entering, as an independent trader, with his black crew, into that port which was so lately the nidus of the Slave Trade. — Edinb. Review, August, 1811.

We are happy in having an opportunity of confirming the above account, and at the same time of laying before our readers an authentic memoir of Capt. Paul Cuffee, the master and owner of the vessel above referred to, who sailed from this port on the 20th ult. with a licence from the British Government, to prosecute his intended voyage to Sierra Leone.

The father of Paul Cuffee, was a native of Africa,

FRIEND STEPHEN WANTON GOULD

whence he was brought as a Slave into Massachusetts. - He was there purchased by a person named Slocum, and remained in slavery a considerable portion of his life.- - He was named Cuffee, but as it is usual in those parts took the name of Slocum, as expressing to whom he belonged. Like many of his countrymen he possessed a mind superior to his condition, and although he was diligent in the business of his Master and faithful to his interest, yet by great industry and economy he was enabled to purchase his personal liberty.

At this time the remains of several Indian tribes, who originally possessed the right of soil, resided in Massachusetts; Cuffee became acquainted with a woman descended from one of those tribes, named Ruth Moses, and married her. -- He continued in habits of industry and frugality, and soon afterwards purchased a farm of 100 acres in Westport in Massachusetts.

Cuffee and Ruth has a family of ten children. - The three eldest sons, David, Jonathan, and John are farmers in the neighborhood of Westport, filling respectable situations in society, and endowed with good intellectual capacities. -- They are all married, and have families to whom they are giving good educations. Of six daughters four are respectably married, while two remain single.

Paul was born on the Island of Cutterhunkker, one of the Elizabeth Islands near [New Bedford](#), in the year 1759; when he was about 14 years of age his father died leaving a considerable property in land, but which being at that time unproductive afforded but little provision for his numerous family, and thus the care of supporting his mother and sisters devolved upon his brothers and himself.

At this time Paul conceived that commerce furnished to industry more ample rewards than agriculture, and he was conscious that he possessed qualities which under proper culture would enable him to pursue commercial employments with prospects of success; he therefore entered at the age of 16 as a common hand on board of a vessel destined to the bay of Mexico, on a Whaling voyage. His second voyage was to the West Indies; but on his third he was captured by a British ship during the American war about the year 1776: after three months detention as a prisoner at New York, he was permitted to return home to Westport, where owing to the unfortunate continuance of hostilities he spent about 2 years in his agricultural pursuits. During this interval Paul and his brother John Cuffee were called on by the Collector of the district, in which they resided, for the payment of a personal tax. It appeared to them, that, by the laws of the constitution of Massachusetts, taxation and the whole rights of

STEPHEN WANTON GOULD

citizenship were untied. -- If the laws demanded of them the payment of personal taxes, the same laws must necessarily and constitutionally invest them with the rights of representing, and being represented, in the state Legislature. But they had never been considered as entitled to the privilege of voting at Elections, nor of being elected to places of trust and honor. -- Under these circumstances, they refused payment of the demands. -- The Collector resorted to the force of the laws, and after many delays and vexations, Paul and his brother deemed it most prudent to silence the suit by payment of the demands. But they resolved, if it were possible, to obtain the rights which they believed to be connected with taxation.

Two works by Carl Maria von Weber were performed for the initial time, in München: The Clarinet Concerto no.2 J.118 and the concert aria Qual altro attendi J.126.

This was Evacuation Day, the 28th Anniversary of the departure of the British from New-York at the successful completion of the American revolution. The fortifications of Manhattan Island finally standing ready to defend the exposed population center against the armament of any previous conflict, the southwest battery⁹⁸ fired the first of the many, many broadsides that it would fire over the centuries “at nothing more dangerous than a harmless hulk moored in the river for practice.”
