## PREFACE TO PART FIRST.

In a systematic course of general education, Arithmetic claims a place among the primary objects. Its elementary exercises, when rationally condurted, are adapted to the capacities of children at a very early age. Ita influence on the character of children, in developing the reasoning faculties, and habituating the mind to investigation, is highly conducive to progress in every other branch of knowledge. Notwithstanding the obvious truth of the above remark, the practice of postponing arithmetic till pupils arrive at the age of nine or ten years, still prevails in a great part of our cotatry, and calls for the attention of those, to whom the concerns of pupular education are intrusted.

The purpose of this Manual is, to facilitate the instruction of the younger classes in common schools. It contains the first part of a Course of Exercises in Arithmetic, which is to be published in three parta. The plan of the lessons accords with the method of instruction practised in the school at Stantz, by the celebrated Pestalozzi. The method of illastration, by the use of cuts, and the location of unit marks under queetions. it is hoped, will be found to be an inprovement.

PART FIRS'1 has been confined to the simple elements of arithmetic, with a view of rendering it a suitable introduction to the subsequent atady of the science from books, which are already in use, and which are thought to be deficient in elementary excrcises.

The slate and pencil are not required, in the performance of the lessons contained in Part First. On the tille page, will he seen, a drawing of an improved structure of the Abacus. It is a convenient apparatus for illustrating the combinations of numbers, and may be used in conuexion with these lessons, although it is not indispensable.
F. E.

Eoston, August 20, 1820.
$00^{-}$The Publishons of this book have had the pleasure to leam, that it in recommentel by all the Masters of the Deproments of Writing and Arithmen tic, in the City of Buston; and, that the Buston Schoul Cumaittee have ordered its intruluction into the City Srhools, to be used hy nil the pupile sa ararly as they are able to read.

## ARITHMETIC．

## NUMERATION．

Note to Teachers．All the lessons in Nameration，are designed to be performed while the learners have their books open．

## LESSON I．

Here is the picture of some apples ：count them．

## LESSON II．

Count the stars in each line across this page．

## 莎

## LESSON III．

How many stars are one star and one star ？
洸 米。

How many stars are two stars and one star ？
米 米 米

How many stars are three stars and one star？
米米米 米
How many stars are four stars and one star？

How many stars are five stars and one star？
米 米 米 米 米
How many stars are six stars and one star ？

How many stars are seven stars and one star ？
米 米 米 㫧 米 米 米
How many stars are eight stars and one star ；
米 棌 米 米 米 鿊 米 米

How many stars are nine stars and one star？

Note to Teachers．The design of the preceding lessons has been，to teach the names，and the comparative magnitude of numbers，from one to ten．The teacher should now inform the pupils，that numbers are represented by figuris．He may direct them，to obtain the names of the figures by counting the unit marks，（from left to right，）which stand against the figures severally，in the following table．As this exer－ cise will tend to fix a mental association of each figure with the number of units，which it represents，the lesson should not be omitted，even by children，who are already able to read figures．

## LESSON IV．

Note to Teachers. The parpose of the following lesson is, to teach Counting, and Reading Fiesures, as high as oue hundred. It will easily t,e etfected, by exercising the learners in reading the numbers, writen in columas ; and, at the same time, leading thea to abserve the aualugies, two-twenty; thrce-thirty; four-forty; \&c.

## LESSON V.

-1 One,

- 2 two,
- 3,three,
- 4 four,
-- fivo,

- 15 fifteen,

116 sixteen, 17 seventeen, 18 eighteen; 19 nimeteen, 20 twenty,
21 twenty-one,
22 twenty-two,
23 twenty-thrce, 2f twenty-four,

- 25 twenty-five, 20 twenty-six, 27 tweaty-seven, 28 twenty-eight, 61 sixty-one, 29 tweuty-nine, 62 sixty-two, 30 thirty,
Q1 thirty-one, S3 thirty-two, 33 thirty-three,

34 thirty-four, 35 thirty-five, 36 thirty-six, 7 3. 37 thirty-seven, 38 thirty-eight, 71 seventy-one, 39. tiurty-nine, 72 seventy-two, 4) forty,

41 forty-one, 42 furty-tivo, ...
43 forty-three,
44 forty-four,
45 forty-five, 46 forty-six,
47 forty-seven,
48 forty-eight,
49 forty-niae,
50 fifty,
51 fifty-one,
59 fifty-two,
5.3 fifty-three,

54 fifty-four,
55 fifty-five,
56 fifty-six,
57 fifty-seven,
58 fifty-eight,
59 fifty-nine,
60 sixty,
62 sixty-two,

64 sisty-four,
65 sixty-five,
66 sixty-six,

67 sisty-seven,
68 sixty-eight,
69 sixty-nine,
70 seventy,
71 seventy-one,
72 seventy-two,
73 seventy-three,
74 seventy-four,
75 seventy-five,
76 seventy-six,
77 seventy-seven,
78 seventy-eight,
79 seventy-nine,
80 eighty.
81 eighty-one, 82 eighty-two,

- 83 eighty-three,

84 eighty-four,
85 eighty-five,
86 eighty-six,
87 eighty-seven,
88 eighty-eight,
89 eighty-nine,
90 ninety,
91 ninety-one,
92 ninety-two,
93 ninety-three,
94 ninety-four,
95 ninety five, 96 ninety-six, 97 ninety-seven, 98 uinety-eight,
09 ninety-nine,
100 one-hundred.

Note to Teachers. The pupils having been accustomed to consider each line of units separately, it will now be necessary for the teacher, to give them an example of continuing the count from line to line. He should, also, instruct them to take into one view, all the lines of gtars, which they count, in order to obtain a just idea of the number.

How many stars are there in the upper line, counted across the page, from left to right?

If you count the stars in the first and second line jogether, how many will they make?

In three lines, how many stars are there?
In four lines, how many stars are there?
In five lines, how many stars are there?
In six lines, how many stars are there?
In seven lines, how many stars are there?
In eight lines, how many stars are there?
In nine lines, how many stars are there?
In ten lines, how many stars are there?
What numbers are expressed by these figures?

| 30 | 50 | 20 | 60 | 40 | 50 | 70 | 90 | 10 |
| ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| 32 | 51 | 24 | 63 | 45 | 89 | 77 | 98 | 16 |
| 3 |  |  |  |  |  |  |  |  |

## ADDITION.

Note to Teachers. In all the following exercises, (until we arrive at Miscellaneous Examples, page 43,) the pupils must answer the questions, and recite the sections of the tables appended to the several lessons, with their books closed.

## LESSON I.

How many trees are 1 tree and 2 trees?

Henry's sister gave him 1 apple, and his mother gave him 3 more. How many apples had Henry? 1 and 3 are how many?

James found 1 pear under the tree, and John gave him 4 more. How many had James then ?

1 and 4 are how many ?

Sarah's brother gave her 1 cherry, and her mother gave her 7 more. How many had Sarah then ?

1 and 7 are how many ?

To be committed to memory, and recited verbatim.

## LESSON II.

2 houses are on one side of a street, and 2 on the other side. How many are there on both sides?

2 chairs are on one side of a rooms and 4 on the other side. How many are there on both sides? 2 and 4 are how many ?

Suppóse 2 hats are in one place and 5 in another; how many will there be, if we put them together? 2 and 5 are hów many?

There are 2 lamps on one side of a table, and 7 on the other side. How many lamps are there in all ? 2 and 7 are how many?

If 2 candles were burning on one table, and 10 on another, how many would there be on both? 2 and 10 are how many?

To be recited.

2 and 6 are 8
2 and 7. are 9
2 and 3 are 10
2 and 9 are 11
2 and 10 are 12

## LESSON LII.

3 birds are on one branch of a grape vine, and 2 on another branch. How many on both branches ?

3 and 2 are how many?

3 boys are up to recite, and 3 others are coming to recite with them. How many will there be?

William owns 3 fish-hooks: if he should buy 6 more, how many would he then have?

3 and 6 are how many?

Jane put 3 pins into a cushion, and Lucy put in 9 more. How many were there in the cushion then ? 3 and 9 are tow many?

Andrew had 3 marbles, and, returning from chool, he found 10 more. How many had he then ?

3 and 10 are how many?

## (3)

3 and 1 are 4
3 and 2 are 5
3 and 3 are 6
3 and 4 are 7
3 and 5 are 8

## 20 0 0 0 0 0 0

Ta be recited.

Note to Teachers. The numbers embraced in the succeeding questions are represented by unit marks, respectively placed under each question. The learners may be directed, to count these marks, as they have been accustomed to count the pictures.

## LESSON IV.

If you had 4 cents in one pocket and 3 in the other, how many cents would you have in both pockets?

$$
\begin{aligned}
& 4 \text { and } 3 \text { are how many ? } \\
& \text { IIII III }
\end{aligned}
$$

Joseph had 4 marbles, and his brother gave him 4 more. How many marbles had Joseph then ?

## IIII IIII

If you had 4 nuts in your pocket, and I should give you 5 more, how many would you then have?

$$
4 \text { and } 5 \text { are how many? }
$$

## IIII IIIII

Sophia put 4 cents into a charity fund, and Augusta put in 7 cents. How many cents did both put in?

$$
\begin{aligned}
& 4 \text { and } 7 \text { are how many? } \\
& \text { IIII IIIIII }
\end{aligned}
$$

If you had 4 pins on one sleeve, and 8 on the other, how many pins would you have on both sleeves? 4 and 8 are how many?

## IIII IIIIIII

Samuel gave 4 cents for a picture, and 9 cents for a book. How many cents did he give for both of them ? 4 and 9 are how many?

## IIII IIIIIII

To be recited.
4 and 1 are 5
4 and 2 are 6
4 and 3 are 7
4 and 4 are 8

4 and 5 are 9 $\quad$| 4 and 6 are 10 |
| :--- |
| 4 and 7 are 11 |
| 4 and 8 are 12 |
| 4 and 9 are 13 |
| 4 and $10-r$ |

## LESSON V.

Daniel gave 5 cents for a bow, and 1 cent for an arrow. How many cents did both of them cost ?

5 and 1 are how many ?
111111
5 boys are on one end of a form, and 3 on the other end. How many boys are on the whole form? 5 and 3 are how many ?

## |l||| |l|

Harriet owned 5 school-books and 5 story-books. How many books did Harriet own in all?

## |l|||l||

Susan has 5 plums, and George has 7. If George give his to Susan, how many will she then have? 5 and 7 are how many?

## \|\|\| \|\|I\|\|

5 boys are playing at foot-ball onone side, and 8 onthe other side. How many boys on both sides? 5 and 8 are how unany?

## |l|| |l||||

How many cents would it take to buy two picturebooks, if one cost 5 cents and the other 9 cents? 5 and 9 are how many?

## \|l|| |l|l|l||

If an orange cost 5 cents, and a book 10 cents, hownany cents will it take to buy both of them? 5 and 10 are how many ?
||||| |||||||||
To be recited.
5 and 1 are 6
5 and 2 are 7
5 and 3 are 8
5 and 4 are 9
50
5
5 and 6 are 11
5 and 7 are 12
5 and 8 are 19
5 and 9 are 14
5 and 10 are 18

## LESSON VI.

If I put $\sigma$ books down in a pile, and you put on 4 more, how many books will there be in the pile ?

## \|II\|I \|\|I

6 books and 5 books, would be how many books ?

How many bonnets are 6 bonnets and 6 bonnets ?
||||||
|l|||

6 hats and 9 hats together, are how many hats ?

##  <br> To be recited.

| 6 and 1 are | 7 |

10 boys and 6 boys, would be how many boys ? II\|IIIII IIIIII

How many houses, are 10 houses and 8 houses? |||||||| |||||||

How many men, are 10 men and 10 men together ? \|III\|\|IIII\|II\|I

To be recited.
10 and 1 are 11
10 and 2 are 12
10 and 3 are 13
10 and 4 are 14
10 and 5 are 15
10 and 6 are 16
10 and 7 are 17
10 and 88 are 18
10 and 9 are 19
10 and 10 are 20

Note to Teachers. I have attempted, in the preceding lessons, to present to the eye and mind of latners, a clear view of the union or cadition of small mumbers, in forming larger munbers. It now remains, to fix the sums of the several admions in the menory. For this purpose, the teacher may cantrace each of the following conbinations in two separate quentions. For example, (Lesson AJ, combination first.) 4 and 4 ure how many? - ihsm, 4 and 9 are how many?

| XI. | XII. | XIII. | XIV. |  |
| :---: | :---: | :---: | :---: | :---: |
| 9 and 4 | 9 and 6 | 8 and 6 | 9 and 5 |  |
| 6 and 3 | 8 and 1 | 5 and 8 | 7 and 3 | 3 |
| 8 and 5 | 6 and 6 | 10 and 3 | 4 and | 4 |
| 2 and 2 | 10 and 8 | 8 and 3 | 10 and 3 |  |
| 10 and 4 | 5 and 4 | 6 and 4 | 8 and 4 | 4 |
| 7 and 7 | 8 and 2 | 9 and 2 | 5 and 2 | $2{ }^{2}$ |
| 4 and 1 | 3 and 2. | 10 and 6 | 7 and 4 | 4 |
| 9 and 7 | 9 and 3 | 3 and 3 | 10 and 5 | 5 |
| 5 and 5 | 7 and 6 | 7 and 2 | 8 and 7 | 7 |
| 10 and 1 | 6 and 5 | 4 and 3 | 6 and 2 | 2 |
| 9 and 8 | 10 and 2 | 7 and 5 | 8 and 3 | 3 |
| 4 and 2 | 9 and 9 | 10 and 7 | 10 and 10 |  |

## SUBTRACTION.

Note to Teachers. Children, who have learned addition, may easily be tanght subtraction, by leading them to observe the correspondence of the two operations. Questions in addition, (distinguished by Italic print,) are therefore connected with the questions in subtraction.

The teacher must here inform the learners, that the cipher, ( 0 ) reprerents nothing of itself, being used only to occupy a place.

## LESSON I.

There was 1 pitcher on the table, but a careless boy knocked it off. What is left on the table ?

1 , taken from where there was 1 , leaves what?

2 trees stood near by, but the wind has blown 1 of them down. What number is left standing? 1 , taken from 2, leaves what number?

3 chairs were standing in a row, but a child has thrown 1 of them down. How many are, upright?

1 from 3 leaves how mtany? Hovomany are 1 and 2 ?

7 sugar loaves are on a shelf'; one of them has the top broken off. How many of them are whole?

1 from 7 leaves how many 3 How many are 1 and 6 ?

To be committcd to meinory, and recited verbätim.
1 from 1 leaves 0
1 from 2 leaves 1
1 from 3 leaves 2
1 from 4 leaves 3
1 from 5 leaves 4
1 from 6 leaves 5
1 from 7 leaves 6
1 from 8 leaves 7
1 from 9 leaves 8
1 from 10 leaves 9

## LESSON II.

There are 3 pitchers, 2 of which have broken handles. What number of them is whole?

2 from 3 leaves what number? How mony are 2 and 1 ?

5 boys came up to recite, but 2 of them were sent back, for having no lesson. How many recited ?

2 from 5 leaves how many? How many are 2 and 9 ?

7 bottles were standing on a table, but $2^{\circ}$ of them are turned down. How many are still upright?

2 from 7 leaves how many? How many are 2 and 5 ?

- Edward has 9 lead pencils, and he has pointed 2 of them. How many has he, which are not pointed ?

2 from 9 leaves how many? Hovo many are 2 and 7?

Harriet has 11 pins, but 2 of them have lost their heads. Haw many have their heads on ?

## MULTTPLICATION.

## MULTIPLICATION.

## LESSON 1 .

On Monday morning, Andrew's father told him, that he would give him one new book for every time he recited correctly, during the week. On Saturday it appeared, that he had recited correctly only once. What number of books did he receive?

Once 1 is what number?

Charles caught 1 fish, every time he went out to angle. How many did he catch, in going 2 times ? 2 times 1 are how many?

A young cooper worked three days, and made 1 barrel each day. How many barrels did he make ? 3 times 1 are how many?

Stephen lost 1 ball, evary time he went upon the common. How many did he lose in going 4 times ? 4 times 1 are how many?

To be committed to memary, and recited verbatim.
Once 1 is 1
2 times 1 are 2
3 times 1 are 3
4 times 1 are 4
6 times 1 are
7 times 1 are 7
8 times 1 are 8
9 times 1 are 9
10 times 1 are 10

## LESSON II.

A boy has 2 hands : how many hands have 2 boys? 2 times 2 are how many ?

A rabbit has 2 ears: how many ears have 3 rabbits? 3 times 2 are how many?

James caught 2 fishes, every time he went fishing. How many did he catch, in going 4 times? 4 times 2 are how many?

A clerk lost 2 keys, every time he went to the theatre. How many did he lose, in going 5 times? 5 times 2 are how many?

Harriet lost 2 pins every time she went to school. How many did she lose, in going 7 times?

7 times 2 are how many?

To be recited.

## LESSON III.

- When the sails of a ship are furled, her masts are distinctly seen. How many masts has 1 ship ? Once 3 is how many?

Since 1 ship has 3 masts, how many have 2 ships ? 2 times 3 are how many?

Richard was learning to write, and he used 3 quills every week. How many did he use in 3 weeks? 3 times 3 are how many?

If 1 fork have 3 points, how many have 4 forks? 4 times'3 are how many ?

We generally find 3 clover leaves, growing upon one stem. How many leaves grow upon 5 stems? 5 times 3 are how many?

To be recited.

| Once 3 is 3 | 6 times 3 are 18 |
| :---: | :---: |
| 2 times 3 are 6 | 7 times 3 are 21 |
| 3 times 3 are 9 | 8 times 3 are |
| 4 times 3 are 12 | 9 times 3 are 27 |
| 5 times 3 are 15 | 10 times 3 are |

## LESSON IV.

3 horses are trotting off without riders. Each horse has 4 feet : how many feet have they all ? 3 times 4 are how many?

2 boys went a fishing, and each of them caught 4 trouts. How many trouts did they both catch ? 2 times 4 are how many ?

## |III III

A lady, who had 4 daughters, gave each of them 4 books. How many did she give them all ?

4 times 4 are how many?
|III |II| |II |III
6 chairs are standing in a row, and each chair has 4 legs. How many legs have all the chairs? 6 times 4 are how many?
||II |III ||II |III |||| ||II
Luey has 5 picture books, which cost 4 cents apiece. How many cents did they all cost ? 5 times 4 are how many?

## |II ||I| |II |II| |III

Susan gets 4 merit-marks, every time she recites. How many does she get, in reciting 7 times? 7 times 4 are how many ?

$$

| 4 in 20 | 3 in 12 | 9 in 69 | 10 in 100 |

Note to Teachers. It will be perceived, that, in the preceding examples, Division has been viewed in only one of its purposes-that of investigating the number of times a small number is contained in a larger. Wa have now to punsue the same process, for the purpose of dividing the larger number into as many equal parts, as there are unita in the manaliar number, and discovering the magnitude of one of the parts.

## LESSON XIV.

James and Henry had six raisins, to divide between them. They said, 'We are 2 boys, and there are 6 raisins. Now if each of us take up one raisin, then twoo raisins will be taken up ; therefore, we can each of us take up as many raisins, as there are twos in the six.' How many could each boy take up?

$$
4144
$$

When a number is divided into 2 equal parts, one of the parts is called, one half of the number. What is one half of 6 ?

III III
Three boys, George, John and Thomas, found 6 marbles, and wished to share them equally. George said to the others, 'Here are 3 boys of us : let us find how many times 3 marbles there are, and then we can each of us take 1 marble from every 3 marbles.' How many marbles did each boy get ?

When a number is divided into 3 equal parts, one of the parts is called, one third of the number. What in one third of 6 ?

4 little girls, who own eight books together, wish to divide their books, and take their shares. As many times as 4 is contained in 8 , so many books must each girl have. How many must each girl have?

## 111111

When a number is divided into 4 equal pars, one of the partsiscalled; one fourth of the number. What is one fourth of 8 ?

Note to Teachers. The learners may be referred, if necessary, to the preambles of the second, fourth and sixth questions in the next preceding lesson, for answers to the first three questions in this lesson.

## LESSON XV.

What do we mean by one half of a number?
What do we mean by one third of a number?
What do we mean by one fourth of a number?
What is one half of 2 cents? One third of 3 cents? One fourth of 4 ? One fifth of 5 ? One sixth of 6 ? One seventh of 7 ? One eighth of 8 ? One ninth of 9 ? One tenth of 10 ?

5 boys had 20 marbles to share between them, and the oldest boy performed the division. He said, ' One boy must have one fifth of the marbles. One fifth of 5 is 1 , and one fifth of 20 is as many times 1, as there are fwes in 20.' To prove what he said, he placed the marbles in a row, and, after rolling out 1 from every 5 for himself, requested the other boys to roll out theirs. How many did each boy take?

If 4 boys, who own 20 marbles together, take their separate shares, how many does each boy take?

We have 18 books, to be placed in 6 equal piles.' We first find how many times 6 books there are, and then take 1 book from every 6 , to make a pile. How many books will there be in each pile ?

## LESSON XVI．

I have 30 quills for 10 boys；each boy must have one tenth of them．How many must I give to 1 boy ？ ［1IIIIIUIIIIIUIIIIII

30 roses were given to 3 girls ；each girl received one third of them．How many did 1 girl receive？ ШШШШШШЩШЩШ
－If 28 cents be required for 4 story books，how many cents would 1 book cost，at the same rate ？

## ШIШШШШШШЩШЩ

32 chestnuts were roasting，which 4 boys owned in equal shares．How many belong to each boy？

## ШリШゆゆШゆゆШゆШШ

5 is contained in 20，how many times？Then one fifth of 20 is what？One fourth of 20 is what？

10 is contained in 30，how many limes？Then one tenth of 30 is what？One third of 30 is what？

6 is contained in 24，hoso many times？Then one sixth of 24 is what？One fourth of 24 is what？

3 is contained in 6，how many times？Then one third of 6 is what？One half of 6 is what ？

8 is contained in 16，how many times？Then one eighth of 16 is what？One half of 16 is what？

4 is contained in 12，how mamy times？Then one fourth of 12 is what？One third of 12 is what ？

10 is consained in 90，hove many times？Then one tenth of 90 is what？One ninth of 90 is what ？

5 is contained in 15，how many times？Then one fifth of 16 is what？One third of 15 is what？

## MISCELLANEOUS EXAMPLES.

Note to Teachers. Scholars will be found able, at this period of the course, to perform all the simple operations, which do not imply the combination of numbers higher than 10. Further practice, however, will be requisite, to enable them to determine the operations proper to be adopted in Promiscuous questions.

The books may be open duriag the recitation of all the succeeding lessons, and the questions may be read either by the scholars or the tencher. The scholars should perform the operations audibly, and give their own reasons for the process they adopt. It is cssential, that tho papils' own apprehensions should direct them, in the process of solution. Therefore, they should not be compelled, nor even allowed to use any form of expression, which they have not made their own. Their first attempts at reasoning, however puerilc, should not be rejected-they should be received with complacency, and corrected in a manner, not likely to destroy their reliance upon their own understanding.

## J, ESSON I.

1. Ann has 4 sisters older than herself, and 3 younger than herself. How many sisters has she ?

Solution. 'I'he number of sisters older, and the number of sisters younger than herself, must be added together. 4 and 3 are 7 , which is the answer.
2. Alfred learned the answers of 13 questions, but he forgot 3 of them. How many did he remember ?

Solution. We take the number of answers which he forgot, from the number he learned, and the number left is the answer. 3 from 13 leaves 10.
3. There were 17 apples in a basket; only 8 of them were sound. How many were defective?
4. A hat-maker displayed 10 hats in one window, and 6 in another. How many were there in both?
5. If 5 plates lie on one side of a table, and 4 on the other, how many will there be on both sides?

- 6. At the window, I saw 8 ladies pass up street, and 4 down street. How many passed both ways?

7. A boy, who had 12 buttons upon his jacket, lost off 5 of them. How many were left on?
8. While a flock of 15 wild geese were fying over, 6 of them were shot. How many escaped ?

## LESSON II:

1. If 8 girls recite, and each of them answer 4 questions, how many will they all answer?

Solution. 8 girls will answer 8 times as many questions as one girl. 8 times 4 questions are 32 puestions.
2. How many roses would there be on 5 rose bushes, if each of the bushes bore 5 roses?
3. There are 13 windows in a house. How many of them are open, while only 6 of them are shut?
4. If a house have 6 windows open, and 7 windows shut, how many windows has the house ?
5. How many squares of glass are there in a window, that has 4 squares in length, and 3 in width ?
6. If 10 barrels of cider can be carried in one wagon, how many can be carried in 4 wagons?
7. A wagoner sold 10 barrels of cider, at 3 dollars a barrel. How many dollars did he receive?

## LESSON III.

1. It takes 4 boys to play a game at ball. How many games can 24 boys play, at the same time? Solution. 24 boys can play as many gaines as there are fours in 24. 4 is contained in 24,6 times.
2. How many oranges can you purchase for 27 cents, when they are sold at 3 cents apiece?
3. If oranges can be purchased for 3 cents apiece, how many cents will 9 oranges cost?
4. A boy, who had 11 cents, paid 9 cents for a football. How many cents had he left?
5. The sun rises every day, and there are 7 days in a week. How many times does it rise in 7 weeks ?
6. William was sick; and was confined to the house 49 days. How many weeks was he sick ?
7. There are 7 questions in this lesson, and 7 in .the next preceding lesson. How many in both ?

## LESSON IV.

1. One of 5 brothers, who owned 30 doves in company, sold his share. How many did he sell?

Solution. 1 boy is one fifth of 5 boys, and he sold one fift of 30 doves. One fifth of 30 is 6 .
2. A farmer, who raised 48 lambs, found, that 1 of every 6 was black. How many were black?
3. In fishing, this morning, I caught 13 fishes; but 7 of them escaped. How many had I remaining ?
4. There were 5 pears upon each of 3 young pear trees. How many pears were there in all ?
5. There are 8 rose bushes on one side of a garden path, and 8 on the other. How many on both ?
6. If it take 8 squares of glass for a window, how many squares are required for 8 windows?
7. A boy gave 40 kernels of corn to 5 ducke. How many kernels were there for each duck?

## LESSON V.

1. Martha is 10 years old, and Maria is 7 yeara old. What is the difference in their ages ?

Solution. We take 7 years from 10 years, and the number left is the difference. 7 from 10 leaves $s$.
2. A certain farmer has 20 sheep and 10 lambs. How many more sheep than lambs has he ?
3. A boat crossed the ferry with 6 horses, and returned with 5 . How many both ways?
4. If a baker use 18 barrels of flour in 9 weeks, how many barrels does he use in one week ?
5. How many weeks will 21 barrels of flour last a baker, who uses 3 barrels every week ?
6. There are 9 lines ruled upon one page of my writing-book. How many are there on 5 pages ?
7. If you have 17 cents, and pay 7 of them for a writing-book, how many will you have left ?

## LESSON VI.

1. If you wished to divide 54 nuts equally among 6 boys, how many would you give to each boy?
2. What is one sixth of 6 ? of 54 ? of 60 ?
3. One day, there were 7 girls at hool, and 5 times as many boys. How many boys were there?
4. How many are 5 times 7 ? 5 times 5 ? 6 ?
5. How many oranges can be purchased for 25 cents, when they are sold at 5 cents apiece?
6. How many times 5 in 25 ? in 50 ? in 35 ?
7. Richard gave 9 cents for a kite, and 8 cents for a line. How much did he give for both ?
8. How many are 9 and 8 ? 9 and 1? 9 and 4 ?
9. George answered 11 questions, and Stephen 6. How many more did George answer, than Stephen ? 10. 11 are how many more than 6 ? than 9 ? 7 ?
10. If 4 boys pay 40 cents for breaking a square of glass, how many cents does each boy pay?
11. What is one fourth of 4 ? of 40 ? of 20 ?

## LESSON VII.

1. Of the 9 pictures which hung n my room, I have taken down 3. How many remain hanging ?
2. 3 from 9 leaves how many? 3 from 8 ?
3. I have 8 cows, but my farm will feed twice as many. How many will my farm keep?
4. How many are twice 8 ? twice 6 ? twice 9 ?
5. If you had 7 pins in one sleeve, and 5 in the other, how many would you have in both ?
6. How many are 7 and 5 ? 7 and 3 ? 7 and 9 ?
7. A landlord, who had 10 rooms, received 20 men to lodge. How many might he put in a room?
8. What is one tenth of 20 ? of 40 ? of 60 ?
9. If 6 boys put' 6 books apiece upon the table, how many books will there be on the table?
10. How many are 6 times 6 ? 6 times 8 ? 9 ?
11. James found a cluster of 14 grapes. After giving me 7 of them, how many had he left?
12. 7 from 14 leaves how many? 7 from 8 ?

## LESSON VIII.

1. At 9 o'clock, John was asked, what o'clock it would be 3 hours after that time. You may answer.
2. Howmany are 9 and 3 ? 9 and 6 ? 9 and 4 ?
3. Suposea goldsmith can make 7 finger rings in one dow how many can he make in 6 days?
4. How many are 6 times 7? 6 times 8 ? 10 ?
5. James has 6 story books, and Sarah has 6 picture books. Who has the greater number of books ?
6. 6 from 6 leaves how many? 6 from 11 ?
7. 24 persons rode to the city in 3 coaches. How many were there to ride in each coach ?
8. What is one third of 24? of 15 ? of 12 ?
9. If 8 persons can ride in one coach, how many coaches are required to carry 24 persons?
10. How many times 8 in 24 ? in 72 ? in 80 ?
11. A coachman has 4 coaches; and for every coach, has 4 horses. How many horses has he?
12. How many are 4 times 4 ? 4 times 6 ? 9 ?

## LESSON IX.

1. If we plant 5 kernels of corn in one hill, in how many hills should we plant 45 kernels ?
2. How many times 5 in 45? in 30 ? in 20 ?
3. Caroline has read 10 pages, in a book of 19 pages. How many pages has she yet to read?
4. 10 from 19 leaves how many? 10 from 20 ?
5. 16 chairs are placed in equal numbers on the 4 sides of a room. How many are on one side ?
6. What is one fourth of 16 ? of 4 ? of 36 ?
7. There were 6 geese in the pond, and 6 others on the shore. What was the whole number?
8. How many are 6 and 6 ? 6 and 4 ? 6 and 9 ?
9. On a high mountain I found 7 eagles' nests, and in each nest, 2 eaglets.' How many eaglets in all ?
10. How many are 7 times 2? 7 times 4? 8?
11. If one writing desk accommodate 3 scholars, now many desks are required for 15 scholars?
12. How many times 3 in 15 ? in 9 ? in 27 ?

## hasson $X$.

1. How many are 8 and $S$ and 8 and 8 and 8 and 3? Then 6 times 3 are how many? How many are 6 and 6 and 6 ? Then 3 times 6 are
2. How many times 7 are there fl What is one seyenth of 7? What is one severth of 28 ?
3. How many times 4 are there in 28 ? What is one fourth of 4 ? What is one fourth of 28 ?
4. If we take 4 and 4 and 4 from 12 , what wilt be left? Then how many times 4 are there in 18
5. If we take 5 atd 5 , and 5 from 15 , what will be left? Then how many times 5 are there in 15 i
6. How many are 7 times 4 ? How many timen 4 are there in 28? What is one fourth of 28 ?
7. How many are 8 tímes 5 ? How many times 5 are there in 40 ? What is one fifth of 40 ?
8. How many are 9 times 7 How many times 7 are there in 68? What is one seventh of 68?
9. What is one eighth of 8 ? How many times 8 are there in 56 ? What is one eighth of 56 ?
10. What is one ninth of $\theta$ ? How many times ? are there in 90? What is one nimh of $90^{\circ}$ ?
11. What is one tenth of 10 ? How many timen 10 are there in 100 ? What is one tenth of too?
12. If you should be $\$$ times as long in going through the next book, as you have been in going through this, when shall you get through it?

[^0]:    -The learners may be inetractod to select any four markn bowe, and conat thom ter many times as there are fours in tho line of sugued.
